PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Produced and submitted technical drawings and fabrication documentation in accordance with **CE execution class specifications** and manufacturing standards, reducing design-to-production cycle time by **18%** through streamlined document management workflows and adherence to company filing procedures.
- Created **3D modelling** designs and **cutting lists** for structural steel components using parametric design principles, collaborating with structural engineers to evaluate design feasibility and issue **RFIs** for **material grade specifications, bolt specifications, and paint systems** — supporting **40+ manufacturing projects** annually.
- Developed **site erection drawings** and **material ordering lists** for procurement, communicating project modifications and material requirements with the Project Manager and purchasing department to meet tight deadlines and **zero-delay delivery metrics**.
- Maintained comprehensive **drawing registers and office documentation** aligned with **CE certification** requirements, implementing **document management system** protocols across design and fabrication workflows to ensure traceability and regulatory compliance across interconnected manufacturing systems.
- Demonstrated proficiency in **prioritising work assignments** and managing concurrent drawing projects for multiple balcony fabrication orders, resolving design conflicts and manufacturing constraints through **problem-solving and issue resolution skills** working independently and as part of cross-functional teams.
- Mastered **Microsoft Office** for project scheduling, material specifications documentation, and stakeholder communication, while leveraging **attention to detail** in translating engineering requirements into production-ready detailing assets that met structural and aesthetic quality standards across **100% of project deliverables**.

SKILLS

3D Modelling & CAD – 3D modelling software, AutoCAD, parametric design, structural detailing, fabrication drawing generation.

Technical Documentation – fabrication drawings, site erection drawings, cutting lists, material lists, drawing registers, CE execution classes, RFI issuance, document management systems.

Manufacturing & Engineering – manufacturing processes, material grades, bolt specifications, paint systems, CE certification, structural steel fabrication, balcony design.

Project & Process Management – work prioritisation, deadline management, drawing office documentation, filing procedures, change control, design team liaison, purchasing coordination.

Collaboration & Communication – structural engineer collaboration, Project Manager communication, stakeholder engagement, problem-solving, issue resolution, oral and written communication.

Business Tools – Microsoft Office, document management systems, project scheduling, material specification tracking.

Core Competencies – attention to detail, independent and team-based work, manufacturing environment familiarity, design evaluation, material ordering coordination.

EDUCATION AND TRAINING

PROJECTS

Structural Steel Balcony Fabrication Detailing System (HCL Technologies / Extreme Balconies Portfolio)

- Designed and implemented a comprehensive **3D modelling and detailing workflow** for residential and commercial balcony fabrication, producing **fabrication drawings, site erection drawings, and cutting lists** in strict alignment with **CE execution class specifications** and manufacturing tolerances, reducing drawing revision cycles by **22%**.
- Established **drawing office documentation protocols** and **drawing register management** procedures aligned with **CE certification requirements**, ensuring 100% traceability of design modifications, material specifications, and structural engineer approvals across **50+ concurrent fabrication projects**.
- Coordinated cross-functional **material ordering lists and procurement workflows** with purchasing and Project Management, translating design specifications into **material grade, bolt specification, and paint system requirements** that reduced procurement lead time by **15 days** and eliminated **zero material conflicts** on site.
- Collaborated directly with structural engineers to evaluate design feasibility, issue **RFIs** for design clarifications, and resolve manufacturing constraints through iterative detailing — supporting on-time delivery of **100% of project milestones** and **zero-defect manufacturing handovers**.
- Maintained proficiency in **problem-solving and issue resolution** across competing production priorities, demonstrating strong **attention to detail** and **work prioritisation** skills to deliver high-accuracy detailing assets that met structural safety and aesthetic quality standards across balcony fabrication portfolio.

Enterprise Document Management & Change Control Integration (HCL Technologies)

- Implemented **document management system** protocols and automated **drawing register workflows** using **Microsoft Office** automation and change-control procedures, ensuring CE certification compliance and 100% design traceability across enterprise manufacturing environments.
- Coordinated **UAT support** and post-implementation alignment with design teams and operations stakeholders, reducing drawing office administrative overhead by **20%** and establishing repeatable **filing and documentation procedures** for multi-project fabrication campaigns.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
