PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Administered and supported **IBM WebMethods integration platform** (Integration Server, Deployer, API Gateway) across non-production and production environments, managing platform upgrades, patching, security, access controls, clustering, and performance tuning to ensure **99.5% uptime** SLA compliance.
- Built and maintained **CI/CD pipelines using Jenkins** integrated with **Git** branching strategies, coordinating with development and QA teams to automate build, test, and release processes across multiple environments, reducing deployment lead time by **40%**.
- Managed release and environment configuration across development, test, UAT, and production landscapes, implementing **change-control management** processes, coordinating UAT sign-offs, and performing root cause analysis on production incidents with **95% first-time resolution** rate.
- Designed and deployed containerised applications using **Docker** and configured orchestration platforms for scalable platform management; developed **Bash** and **Python** automation scripts for environment provisioning, configuration management, and operational task scheduling, eliminating **30+ manual hours** per month.
- Administered applications across **Windows and Linux (RHEL) environments**, performed system monitoring using operational dashboards, managed patching cycles, troubleshooted infrastructure and integration issues, and provided on-call support for urgent system incidents and occasional evening/weekend releases.
- Implemented Infrastructure as Code principles using **Terraform** for environment provisioning and configuration management; engineered solutions for **REST/SOAP service integration** and **messaging concepts** within the WebMethods platform, supporting seamless API gateway deployments and cross-system data flows.

SKILLS

DevOps & Platform Management – IBM WebMethods Integration Server, Deployer, API Gateway, release management, environment configuration, platform administration, clustering, performance tuning.

CI/CD & Build Automation – Jenkins, Git, Bitbucket, build pipelines, deployment automation, change-control management.

Infrastructure & Cloud – Docker, Kubernetes, Terraform, Infrastructure as Code, Linux (RHEL), Windows administration, Azure.

Scripting & Automation – Python, Bash, shell scripting, cron jobs, automation-focused DevOps mindset.

DevOps Tooling & Monitoring – Jira, Datadog, CloudWatch, Splunk, Dynatrace, system performance monitoring, incident management, root cause analysis.

Integration & Messaging – REST APIs, SOAP services, messaging concepts, API gateway configuration, system integrations.

Certifications & Education – Bachelor of Engineering in Computer Science, MSc in Data Analytics, IELTS Academic Band 7, DevOps & Linux fundamentals, Full Stack Java Spring Boot.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Multi-Environment IBM WebMethods CI/CD & Release Automation Platform (HCL Technologies)

- Architected end-to-end **CI/CD pipeline infrastructure** for **IBM WebMethods Integration Server and Deployer** using **Jenkins** and **Git**, automating code checkout, integration server asset builds, containerisation via **Docker**, and multi-environment deployment orchestration across dev, test, UAT, and production landscapes.
- Developed **Python** and **Bash automation scripts** to manage environment provisioning, configuration synchronisation, and release artifact management; implemented **Terraform Infrastructure as Code** templates for consistent environment setup, reducing environment build time from **8 hours to 45 minutes**.
- Engineered robust **monitoring and alerting dashboards** using operational instrumentation for real-time platform health visibility, performance metrics, and incident escalation; implemented automated root cause analysis playbooks that reduced mean time to resolution (MTTR) by **35%**.
- Established release governance framework integrating **change-control processes**, automated UAT promotion gates, and deployment approval workflows; coordinated cross-functional releases with development and QA teams, achieving **zero-downtime deployments** on **40+ production releases** per quarter.
- Configured **REST API Gateway and SOAP service integration** within WebMethods platform to support seamless inter-system communication; documented deployment runbooks and trained operations team on incident response, reducing on-call escalations by **50%**.

Enterprise Banking Integration Platform & Payments Operations Dashboard (HCL Technologies)

- Delivered production support and operational monitoring for **SWIFT messaging and payments-operations dashboard** supporting high-volume cross-border payment processing; managed platform availability through **Splunk** and **CloudWatch** monitoring, ensuring **99.8% SLA compliance** for mission-critical payment flows.
- Administered integration platform supporting **ISO 20022 message flows**, **SEPA/instant payments**, and **PSD2 Open Banking APIs**; collaborated with banking-domain teams on UAT coordination, regulatory compliance validation (GDPR/Data Protection), and post-go-live triage to ensure operational stability across interconnected systems.
- Implemented **Python ETL scripts** for transaction reconciliation, payment status reporting, and anomaly detection; engineered data pipelines integrating **PostgreSQL, MySQL, and Oracle databases** to support real-time operational dashboards and audit trail management for regulatory compliance.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
