PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Deployed and operated multi-tenant **Kubernetes** workloads on **AWS** (EKS equivalent) using **Docker** containerisation and **Jenkins** CI/CD pipelines; implemented **RBAC**, network policies, and identity controls across 40+ microservices, reducing manual deployment toil by **60%** and enabling self-service application team deployments.
- Authored and maintained **Terraform** modules for infrastructure provisioning, cloud networking (VPCs, subnets, peering), and AKS-equivalent cluster configuration; contributed to **Infrastructure as Code** best practices across 15+ cloud resources, achieving **100%** reproducible infrastructure deployments and **zero** manual console clicks.
- Built **Bash** and **Python** automation scripts to eliminate toil: log aggregation via **Splunk**, scheduled health-check pipelines, and runbook automation; reduced manual incident-response overhead by **45%** and improved platform reliability SLA from **98.5%** to **99.8%**.
- Implemented **GitOps** delivery using **Git** branching, **Jenkins** pipelines, and declarative configuration management; managed change control workflows for 30+ production system updates with **zero** deployment failures, ensuring compliance audit trails and **100%** infrastructure-as-code coverage.
- Configured cloud networking fundamentals including **TCP/IP**, **DNS**, **VPC** peering, and identity/access controls (SAML, OIDC); designed network policies and security isolation for multi-tenant **Kubernetes** platform supporting **50+** application teams across production and non-production environments.
- Documented platform services, runbooks, and onboarding guides for **15+** internal developer tools; enabled junior engineers to operate shared infrastructure independently, reducing platform-team escalations by **70%** and supporting GitOps self-service catalog adoption.

SKILLS

Cloud Platforms & Networking – Azure, AWS (EC2, S3, Lambda, CloudWatch), VNets, VPCs, subnets, peering, VPNs, cloud networking fundamentals, TCP/IP, DNS, L2 to L7.

Kubernetes & Container Orchestration – AKS, EKS, pods, deployments, services, RBAC, namespaces, multi-tenant Kubernetes clusters, workload deployment and operations.

Infrastructure as Code & Configuration Management – Terraform, module composition and patterns, Helm, Kustomize, declarative infrastructure, GitOps principles.

CI/CD, Version Control & GitOps – Git (branching, code review, fluency beyond commits), Jenkins pipelines, GitLab, ArgoCD, GitOps delivery, change control management.

Automation & Scripting – Bash, Python (pandas, automation tasks), shell scripting, cron jobs, Linux, log analysis.

Identity, Security & Access Control – RBAC, network policies, SAML, OIDC, identity and access management, security controls implementation.

Observability & Monitoring – Splunk, CloudWatch, Dynatrace, Grafana Cloud, dashboarding, production alerting, SLA management.

EDUCATION AND TRAINING

PROJECTS

Multi-Region Kubernetes GitOps Platform with Internal Developer Platform (HCL Technologies)

- Led design and rollout of multi-tenant **Kubernetes** cluster on **AKS** spanning 3 regions, implementing **Terraform** modules for cluster provisioning, **VNet** peering, **DNS**, and **RBAC** isolation; enabled **50+** application teams to deploy independently via **GitOps** (ArgoCD, Helm, Kustomize) without manual infrastructure changes.
- Architected Internal Developer Platform (IDP) self-service catalog with **15+** platform services (databases, queues, observability stacks); automated onboarding and provisioning via **Terraform** modules, reducing infrastructure request fulfillment time from **3 days to 2 hours** and eliminating manual platform-team bottlenecks.
- Implemented comprehensive identity and networking controls: **SAML/OIDC**-backed access management, **network policies** for pod-to-pod isolation, **VPC** segmentation, and **TCP/IP** security baselines; achieved **zero** unauthorised cross-tenant access incidents across **6 months** production operation.
- Built **Python** and **Bash** automation for platform operations: health-check pipelines, cluster scaling logic, **Splunk**-based log aggregation for observability; reduced mean-time-to-incident-resolution by **55%** and eliminated **40+** manual weekly operational tasks.
- Authored runbooks and platform documentation for **20+** IDP services; trained junior Platform Engineers on **Kubernetes** operations, **Terraform** module patterns, and **GitOps** workflows; reduced platform-team on-call escalations by **65%** through knowledge consolidation.

Enterprise SWIFT Payments Dashboard with Production Observability & Change-Control Automation (HCL Technologies)

- Deployed and operated **multi-tenant observability** dashboard for SWIFT messaging platform using **Splunk** and **CloudWatch**; implemented real-time alerting for payment-message flows, transaction-settlement tracking, and SLA compliance monitoring, reducing P1 incident response time by **40%**.
- Managed change-control workflows for **30+** production infrastructure and application updates across interconnected ERP and payments systems; coordinated UAT, post-go-live triage, and rollback procedures with cross-functional banking operations teams, achieving **zero** unplanned outages over **12 months**.
- Automated compliance audit reporting via **Python** scripts and **SQL** queries (PostgreSQL, Oracle); generated GDPR and regulatory compliance audit trails for payment transaction data; reduced manual reporting overhead by **75%** and ensured **100%** audit trail completeness for regulatory reviews.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
