PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Responded to enterprise customer cases in line with **Service Level Agreements**, achieving **95% first-contact resolution rate** through systematic **log gathering, configuration analysis, and issue reproduction** using **Splunk, CloudWatch, and Dynatrace** to troubleshoot production incidents across Java, .NET, and cloud-native applications at HCL Technologies.
- Proactively identified and resolved potential problems by **researching the Knowledge Base, documentation, and cross-functional team support**, addressing underlying issues uncovered during customer engagement to ensure optimal product performance; escalated complex cases in a timely manner with full customer transparency and internal accountability for **drive-to-resolution on P1/P2 incidents**.
- Provided **in-depth technical training and mentoring** to team members and customers on **system integrations, REST API troubleshooting, and interconnected enterprise business systems** across **PostgreSQL, MySQL, and Oracle**, acting as a **subject matter expert** on **ERP modules, change-control procedures, and cross-system data flows** with **25+ documented training sessions** delivered to support engineers and business users.
- Documented all customer interactions and case details within **customer tracking databases** with detailed issue descriptions and recommended solutions; participated in **Knowledge Base documentation initiatives and technical discussions** to drive enterprise knowledge sharing, creating **40+ articles** covering integration procedures, troubleshooting workflows, and best practices.
- Gathered and analyzed **production logs, configuration details, and system telemetry** to troubleshoot complex multi-system issues involving **Docker containerization, AWS (EC2, S3, Lambda, CloudWatch), and Jenkins CI/CD pipelines**; provided technical reviews of user documentation, product requirements documents, and functional specifications to ensure alignment with customer needs and regulatory compliance standards.
- Demonstrated accountability and results-driven execution in **SLA compliance, case prioritization based on severity and customer impact**, and transparent communication with stakeholders; performed ad-hoc analysis using **Python scripting, SQL queries, and data visualization** to identify root causes and recommend solutions that reduced customer downtime by **30%** and improved support efficiency metrics across the enterprise customer base.

SKILLS

Technical Support & Incident Management – Service Level Agreement compliance, P1/P2 incident response, case prioritization, customer escalation management, troubleshooting methodology, root cause analysis, proactive problem prevention.

Monitoring & Observability Tools – Splunk, CloudWatch, Dynatrace, log analysis, application performance monitoring, operational alerting, telemetry analysis.

Enterprise Technologies – Java Spring Boot, .NET applications, REST APIs, system integrations, Docker containerization, AWS (EC2, S3, Lambda, CloudWatch), Linux administration, shell scripting.

Database & Data Management – PostgreSQL, MySQL, Oracle, SQL query optimization, schema analysis, data validation, cross-system data flows.

DevOps & CI/CD – Jenkins pipelines, Git version control, change-control management, code reviews, deployment automation, UAT coordination.

Knowledge Management & Training – Knowledge Base documentation, technical mentoring, user documentation review, training delivery, subject matter expertise, knowledge sharing initiatives.

Business Systems & Compliance – ERP integration support, enterprise business systems, change-management procedures, GDPR compliance, regulatory requirements, cross-functional collaboration.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
--	----------------

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021
---	----------------

PROJECTS

Enterprise Application Support & Troubleshooting Platform (HCL Technologies)

- Designed and implemented a **centralized customer issue tracking and resolution workflow** integrating **Splunk, Dynatrace, and CloudWatch monitoring data** with **Jira case management** to correlate production incidents across **Java Spring Boot, .NET, and AWS cloud infrastructure**, reducing mean-time-to-resolution (MTTR) from **4.2 hours to 1.8 hours** for P1/P2 incidents affecting **15+ enterprise customers**.
- Created **Knowledge Base automation pipeline** using **Python scripts, PostgreSQL, and API integrations** to ingest, categorize, and cross-reference **400+ troubleshooting articles** across **50+ product components**, enabling **65% improvement in first-contact resolution** through intelligent document retrieval and recommendation to support engineers.
- Developed **real-time SLA compliance dashboard** in **Power BI with DAX measures** tracking case response times, resolution times, and escalation patterns across **multiple customer tiers**; provided **weekly trend analysis and root-cause reporting** to management, identifying bottlenecks and driving process improvements that achieved **98% SLA compliance**.
- Established **structured mentoring program** with **8 technical support engineers**, delivering **12-week curriculum** covering system troubleshooting, REST API debugging, database query analysis, and customer communication best practices; mentees achieved **92% average performance on certification assessments** and independently handled **30% more complex cases** post-training.
- Conducted **technical review and validation** of **25+ product requirements documents, functional specifications, and user documentation** across **3 major product releases**, identifying **120+ potential support-related gaps** and recommending enhancements to ensure customer-facing materials accurately reflected troubleshooting workflows and system behavior.

Production Support & Payments Operations Dashboard (HCL Technologies)

- Provided **enterprise-grade production support** for a **SWIFT messaging and payments-operations dashboard** serving a global banking client, monitoring and troubleshooting **ISO 20022 message flows, SEPA instant payments, and cross-border payment transactions** with **99.95% uptime SLA** across **multi-region cloud deployment**.
- Performed **cross-functional collaboration** with banking domain business analysts and operations teams to gather requirements, coordinate **UAT testing**, and execute post-implementation triage for **payment message visibility, transaction flow monitoring, and operational alerting** ensuring compliance with **GDPR data protection** and financial-services regulatory standards.
- Analyzed **system logs, transaction data, and reconciliation workflows** using **SQL (PostgreSQL, Oracle) and Python ETL scripts** to validate payment message correctness, identify tokenization and PSD2

compliance issues, and troubleshoot interconnected ERP integrations, resolving **35+ complex production incidents** with zero data loss.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
