PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **face-to-face IT support and troubleshooting** for 200+ enterprise end users across banking and payments operations at HCL, resolving hardware configuration, software installation, and desktop environment issues with **94% first-contact resolution rate** and SLA compliance of **99.2%**.
- Managed IT incident response via **ITSM ticketing systems** and **telephony support**, categorizing and prioritizing P1/P2 incidents, coordinating with cross-functional teams, and delivering timely resolution to ensure minimal business disruption across interconnected enterprise systems.
- Configured, assetized, and prepared **hardware and software installations** for end-user deployment in high-security banking environments, documenting asset lifecycle, tracking configurations in change-control workflows, and maintaining audit trails compliant with financial regulatory standards.
- Created and maintained **technical documentation** and user guides for IT processes, troubleshooting procedures, and system configurations; shared knowledge artifacts across team members to support onboarding and operational consistency across **40+ support staff**.
- Demonstrated proactive problem-solving and independent initiative across **Windows desktop and server operating systems, Active Directory, and DNS/DHCP networking infrastructure**, collaborating effectively with colleagues at all technical and business levels to resolve complex multi-system issues.
- Supported enterprise business system integrations and change-management workflows using **SQL query language** for data validation and system-level troubleshooting, enabling seamless post-implementation UAT support and reducing configuration-error incidents by **32%**.

SKILLS

IT Service Desk & Support – face-to-face IT support, telephony support, incident management, ITSM ticketing systems, problem-solving, customer service, resolution-driven support.

Hardware & Systems Administration – hardware configuration and installation, assetization, Windows desktop operating systems, Windows server operating systems, Active Directory, Group Policy, DNS, DHCP, networking infrastructure.

Networking & Infrastructure – Cisco networking systems, DNS/DHCP administration, network troubleshooting, system integration support.

Database & Query Language – SQL query language, PostgreSQL, MySQL, Oracle, data validation, ad-hoc queries.

Documentation & Knowledge Management – technical documentation, user guides, training materials, knowledge sharing, Confluence, change-control documentation.

Professional & Soft Skills – team collaboration, cross-functional communication, independent problem-solving, proactive support delivery, approachable demeanor, business acumen.

Additional Technical Knowledge – Linux, Python scripting, Git, CI/CD pipelines, AWS fundamentals, Docker, data pipeline concepts.

EDUCATION AND TRAINING

PROJECTS

Enterprise End-User IT Support & Asset Management Platform (HCL Technologies)

- Architected and deployed a **face-to-face IT support workflow** handling hardware provisioning, software installation, and desktop configuration for **200+ concurrent end users** across a multi-site banking operations environment, reducing provisioning time by **35%**.
- Designed **technical documentation framework** and user-guide repository covering hardware configuration procedures, troubleshooting playbooks, and system integration pathways; onboarded **8 new support analysts** with **3x faster ramp-up time** versus legacy processes.
- Integrated **ITSM ticketing system** with **Active Directory**, **DNS/DHCP** provisioning, and asset-tracking backend; enabled proactive incident categorization and **94% first-contact resolution** through SQL-driven issue triage and **Windows server/desktop environment** diagnostics.
- Implemented **hardware assetization and change-control workflows** compliant with financial regulatory audit requirements; tracked **2,800+ IT assets** with configuration-history auditing, reducing compliance-violation incidents by **32%**.

SWIFT Payments Operations Dashboard & Incident Alerting System (HCL Technologies)

- Built operational monitoring and **face-to-face support escalation process** for **SWIFT MT/MX message flows** across cross-border payments operations; delivered real-time visibility into **ISO 20022** transaction routing, SEPA/instant-payment settlement, and tokenization workflows for banking operations teams.
- Designed **technical documentation suite** covering SWIFT message format specifications, reconciliation procedures, and PSD2 compliance checkpoints; trained business analysts and operations staff on payment-system architecture, reducing incident resolution time by **28%**.
- Troubleshoot payment-system integration issues via **SQL query language** and database-level diagnostics across **PostgreSQL and Oracle** backends; identified root causes of transaction-routing failures and coordinated with ERP integration teams to prevent settlement delays affecting **€2.5M+ daily transaction volume**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
