PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Researched, tested and implemented **AI automation tools** including **ChatGPT, Microsoft Copilot, Make, Zapier, and Power Automate** across enterprise workflows, building **20+ AI-assisted process templates** for office, sales, operations and customer service teams that reduced manual admin by **35%**.
- Built and deployed **AI knowledge bases and prompt libraries** for internal teams and customer-facing agents, creating **150+ optimized prompts and workflows** documented in **Confluence** for staff training and AI voice agent automation projects, improving response consistency by **40%**.
- Conducted systematic process reviews across CRM, phone systems, spreadsheets, forms and reporting tools to identify **automation opportunities**; architected **API-driven system integrations** using **Python, REST APIs and n8n** to connect **Salesforce** with operational systems, eliminating **8 hours/week** of manual data entry.
- Designed and executed **AI tool testing frameworks** for **Aircall phone system integrations, Power BI dashboards** and customer service automation solutions, documenting accuracy, quality and business impact across **40+ pilot workflows** before full rollout; monitored AI outputs for safety, security and regulatory appropriateness.
- Translated business process requirements from management and cross-functional teams (sales, operations, customer service) into technical specifications for **AI workflow automation, CRM configuration changes and Power Automate integrations**, supporting **UAT coordination and staff onboarding** across **12+ automation initiatives**.
- Developed and maintained **automation dashboards using Power BI and Tableau** with **DAX measures and data models** to track AI tool performance, process efficiency gains and team adoption metrics; stayed current with emerging **AI tools, automation trends and business applications** through continuous research and competitive analysis.

SKILLS

AI & Automation Tools – ChatGPT, Microsoft Copilot, Make, Zapier, Power Automate, n8n, AI voice agents, chatbots, prompt engineering, AI knowledge bases.

System Integration & APIs – REST APIs, API integration, automation platforms, system connectors, Salesforce CRM, Aircall phone systems, workflow automation.

Business Systems & Tools – CRM systems, spreadsheets, forms, documents, digital systems, process documentation, change management, workflow templates.

Data & Reporting – Power BI, Tableau, dashboards, DAX, Power Query, data modelling, reporting, performance monitoring, analytics.

Programming & Development – Python, JavaScript, REST API development, automation scripting, workflow configuration.

Core Competencies – AI research & testing, process improvement, business problem-solving, staff training, documentation, independent project management, attention to detail.

Technical Infrastructure – Git, CI/CD, Linux, cloud systems, AWS, Docker, SQL, database management.

EDUCATION AND TRAINING

PROJECTS

Intelligent Business Process Automation Suite (HCL Technologies)

- Designed and deployed an end-to-end **AI automation platform** spanning office, sales, operations and customer service functions; integrated **Salesforce CRM** with **Aircall phone systems** using **n8n and REST APIs**, eliminating **120+ hours/month** of manual workflow overhead across the organization.
- Built **AI voice agent automation** for customer service using **ChatGPT API integration and Power Automate orchestration**, creating **knowledge bases** and prompt templates that improved first-contact resolution by **28%** and reduced average handling time by **15 minutes per call**.
- Constructed **Power BI dashboards with DAX calculations** to monitor AI output accuracy, tool adoption rates, and process efficiency across **40+ automated workflows**; identified quality issues in real-time and refined prompts, achieving **96% accuracy threshold** for customer-facing AI agents.
- Tested and documented **Zapier and Make integrations** connecting **spreadsheets, forms, CRM, and reporting tools**; created comprehensive process maps and staff training materials that enabled **15 team members** to independently deploy and maintain automation workflows with zero external support after go-live.
- Researched emerging **AI tools and automation trends** (including multimodal LLMs, agentic systems, advanced prompt techniques) and evaluated business-case fit against existing automation stack; recommended and pilot-tested **5 new tools** annually, maintaining competitive advantage in process automation maturity.

Enterprise Data Integration & Reporting Dashboard (HCL Technologies)

- Engineered **cross-system data pipeline** using **Python ETL scripts, PostgreSQL, Oracle and Power Query** to consolidate operational data from ERP, CRM and phone systems; built **Tableau dashboards** with interactive drill-down and KPI tracking for management visibility across **8 business domains**.
- Automated **monthly reporting process** using **Power BI and DAX** to generate 40+ stakeholder reports; reduced manual data compilation time by **22 hours/month** and improved report refresh frequency from monthly to real-time, enabling faster decision-making.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
