PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Conducted **Enhanced Due Diligence investigations** on high-risk payment transactions within a **SWIFT messaging and payments-operations platform**, analyzing transaction flows, customer profiles, and organizational structures to assess **financial crime risks** including fraud, AML/CFT concerns, and sanctions exposure, with **100% audit-trail documentation** in case-management systems.
- Leveraged **open-source intelligence, third-party data sources, and internal systems** to gather and analyze investigative evidence on **politically exposed persons (PEPs)**, adverse media, and cross-border payment activity; identified unusual patterns in **ISO 20022 message flows** and SEPA transaction data to determine appropriate escalation steps, reducing false-positive referrals by **18%**.
- Served as escalation point for **complex financial crime cases** across cross-functional teams including Payments Risk, Compliance, Legal, and Payment Service Providers; provided **subject matter expertise in AML/CFT frameworks, sanctions screening, and evolving regulatory guidance** to support **defensible decision-making** and mitigated **platform abuse on high-value fundraiser accounts**.
- Evaluated fundraiser, account, and organizational activity using **SQL queries on PostgreSQL/Oracle databases** and **Python data-analysis scripts** to detect suspicious patterns in tokenization, reconciliation workflows, and cross-border payment flows; documented **comprehensive investigative findings** supporting risk assessments with **zero compliance exceptions** across **GDPR and Data Protection** audit requirements.
- Analyzed complex organizational structures, beneficial ownership chains, and operational legitimacy using **Power BI dashboards and data-modelling techniques** to consolidate internal monitoring alerts, customer profiles, and transactional intelligence; provided high-quality written communication and guidance to customers and internal stakeholders, balancing **financial crime risk mitigation** with positive user experience across **40+ sensitive case reviews monthly**.
- Drove process improvements in **EDD investigative frameworks** by developing standardized risk-assessment templates, quality-feedback mechanisms, and technical guidance for junior analysts; maintained **subject matter expertise in platform-specific risks, financial crime typologies, and emerging threats** through continuous learning and cross-functional collaboration with banking-domain business analysts and regulatory teams.

SKILLS

Enhanced Due Diligence & Financial Crime – Enhanced Due Diligence (EDD) investigations, AML/CFT compliance, sanctions screening, financial crime risk assessment, fraud detection, politically exposed persons (PEPs), adverse media analysis.

Payments & Regulatory Compliance – SWIFT messaging (MT/MX formats), ISO 20022 message flows, SEPA payments, cross-border payments, PSD2 awareness, tokenization, reconciliation workflows, payments-operations monitoring, GDPR, Data Protection compliance.

Data Analysis & Case Management – SQL (PostgreSQL, Oracle, MySQL), Python (pandas, NumPy, scikit-learn), Power BI dashboards and DAX, data modelling, case-management systems, open-source intelligence gathering, third-party data integration.

Risk & Compliance Frameworks – Global EDD frameworks, evolving regulatory requirements, industry guidance, audit-trail documentation, defensible decision-making, organizational-structure analysis,

beneficial-ownership assessment, change-control management.

Cross-Functional Collaboration – Payments Risk, Content Risk, Legal, Customer Care, Compliance, Product teams, Payment Service Providers, business analysis, UAT coordination, stakeholder communication, escalation management.

Enterprise Tools & Systems – Splunk, CloudWatch, Dynatrace, Jenkins, Git, Jira, Confluence, REST APIs, ERP integration support, production monitoring, incident response.

Analytical & Subject Matter Expertise – Financial crime typologies, emerging-threat identification, investigative consistency standards, quality feedback, process improvement, technical guidance.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Financial Crime Risk Scoring & EDD Case Triage Platform (HCL Technologies)

- Designed and implemented an **automated Enhanced Due Diligence risk-scoring engine** that ingested customer profiles, transactional patterns, organizational structures, and **open-source intelligence feeds** to classify incoming fundraisers and high-value accounts into **AML/CFT risk tiers** (low, medium, high, critical), reducing manual case-assignment time by **35%** and enabling investigative teams to focus on **complex, high-risk investigations**.
- Built **Power BI dashboards** consolidating case-management system data, sanctions-screening results, and **adverse media feeds** to surface **PEPs, unusual payment patterns, and cross-border transaction anomalies**; integrated **SQL queries on PostgreSQL databases** to automate data extraction and refresh schedules, achieving **real-time visibility** into case volume and **financial crime typology trends**.
- Developed investigative workflow templates and **defensible decision-making documentation standards** aligned with **GDPR, Data Protection, and global EDD frameworks** to ensure **100% audit-trail compliance** and consistent risk assessment across the team; provided **quality feedback and technical guidance** to junior analysts, reducing rework by **22%**.
- Integrated **third-party data sources, internal case-management systems, and REST APIs** to enrich investigative records with organizational-structure analysis, beneficial-ownership chains, and tokenization history; enabled **subject matter expertise** escalations to Compliance, Legal, and Payment Service Providers with comprehensive, well-documented findings supporting **defensible decision-making**.
- Established **emerging-threat identification and process-improvement mechanisms** by monitoring industry guidance, regulatory updates, and platform-specific abuse patterns; contributed to quarterly EDD-program reviews that strengthened investigative effectiveness and scalability, reducing **platform abuse incidents by 12%** and supporting **SWIFT messaging and SEPA payment security** across the payments-operations platform.

SWIFT Payments Dashboard & Regulatory Compliance Monitoring (HCL Technologies)

- Conducted production support and **Enhanced Due Diligence monitoring** on a **SWIFT messaging and payments-operations dashboard** supporting a global banking client, analyzing **ISO 20022 message flows, SEPA cross-border transactions, and AML/CFT alert streams** to identify suspicious payment activity and assess **sanctions exposure and financial crime risks**.
- Gathered and analyzed investigative evidence using **Splunk and Dynatrace monitoring dashboards, SQL queries on Oracle and PostgreSQL databases, and SWIFT MT/MX message inspection** to evaluate

account and organizational legitimacy; documented findings in case-management systems supporting **GDPR and Data Protection audit requirements** with **zero compliance exceptions**.

- Collaborated with banking-domain business analysts, operations teams, and regulatory stakeholders across UAT, change-control, and post-implementation phases to escalate complex **financial crime cases, PEP detections, and adverse-media findings**; provided **subject matter expertise in payments-industry frameworks** and emerging compliance threats, supporting **defensible risk-mitigation decisions** across **tokenization, reconciliation, and cross-border payment workflows**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
