PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Architected and delivered enterprise infrastructure modernization assessments for banking and financial-services clients, evaluating legacy application environments across Java Spring Boot, Python, and SQL databases (PostgreSQL, MySQL, Oracle) to identify cloud migration blockers and recommend prioritized roadmaps for **GCP infrastructure and application modernization**, reducing customer technical objections by **40%** in proof-of-concept cycles.
- Demonstrated **cloud infrastructure engineering** and **containerization platforms** by designing and prototyping **Docker**-based deployments on **AWS (EC2, S3, Lambda, CloudWatch)** for production payment-operations systems, translating on-premise infrastructure patterns into **IaaS and PaaS solutions** across SaaS, supporting bid responses and accelerating customer adoption timelines by **3–4 weeks**.
- Guided enterprise customers through **WAN/internet-related architectures** and **distributed systems** integrations by recommending **REST API strategies**, cross-system data flows, and **CI/CD pipelines (Jenkins, Git)** for interconnected ERP and business-system modernization, resolving **15+ enterprise integration technical blockers** and enabling seamless platform migrations.
- Conducted **technical presentations** and training workshops on enterprise infrastructure patterns, payments-processing workflows (SWIFT MT/MX, ISO 20022, SEPA, cross-border payments), and cloud-native application architectures to cross-functional stakeholders including banking domain BAs, operations teams, and regulatory compliance officers, increasing customer technical literacy by **65%**.
- Architected **data and AI solutions environments** and **relational and NoSQL database** strategies using **SQL schema optimization, big-data technologies (Hadoop/Spark concepts), and data warehousing patterns** to support customer analytics and reporting modernization; delivered **Power BI dashboards** and **Tableau** proof-of-concepts demonstrating **real-time operational reporting** on GCP-equivalent platforms.
- Identified and qualified **business opportunities** by conducting deep dives into customer technical infrastructure, production **monitoring and observability stacks (Splunk, Dynatrace, CloudWatch)**, incident-management SLAs, and change-control processes; developed technical resolution strategies that aligned infrastructure modernization with business outcomes, resulting in **8 enterprise customer proof-of-concepts** and **\$2.4M pipeline acceleration**.

SKILLS

Cloud Infrastructure & Virtualization – AWS (EC2, S3, Lambda, CloudWatch), Docker, containerization platforms, on-premise infrastructure engineering, GCP (IaaS, PaaS, SaaS).

Enterprise Architecture & Distributed Systems – REST API integration strategies, microservices architectures, ERP systems, change-control management, cross-system data flows, WAN/internet architectures.

Software Development & Infrastructure – Java Spring Boot, Python (automation, data pipelines), SQL (PostgreSQL, MySQL, Oracle), CI/CD pipelines (Jenkins, Git), Linux, shell scripting.

Data, Analytics & Big Data – Power BI, Tableau, data warehousing, Hadoop, Apache Spark, relational databases, NoSQL databases, data modelling, ETL, Big Data technologies.

Production Support & Reliability – Monitoring and observability (Splunk, Dynatrace), SLA management, incident response, application support, production incident triage.

Domain Expertise – Banking and financial services, payments processing (SWIFT MT/MX, ISO 20022, SEPA, cross-border payments), PSD2 compliance, GDPR, regulatory environments.

Business & Customer Engagement – Technical presentations, customer assessment and qualification, bid response support, proof-of-concept delivery, business stakeholder engagement.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Enterprise Cloud Migration Readiness Platform – Infrastructure & Application Modernization Engine (HCL Technologies)

- Built a comprehensive **infrastructure modernization assessment platform** combining legacy application profiling (Java, Python, SQL), **containerization readiness** analysis via Docker, and **cloud architecture recommendations** (GCP IaaS/PaaS/SaaS positioning) that automated evaluation of **on-premise infrastructure patterns** against GCP capabilities, reducing assessment time from 8 weeks to **2 weeks** and increasing technical customer confidence by **72%**.
- Architected **distributed systems** migration playbooks documenting REST API refactoring strategies, **relational and NoSQL database** selection frameworks, and **CI/CD pipeline transformation** patterns (Jenkins → GCP Cloud Build equivalents); delivered interactive **technical presentations** and proof-of-concept demonstrations to **12+ enterprise banking and financial-services customers**, resulting in **9 successful GCP pilot engagements**.
- Engineered **WAN/internet architecture** assessment tooling and **production monitoring migration guides** (Splunk/Dynatrace → GCP Cloud Monitoring/Logging) with real-time **data and AI solution** recommendations for operational dashboarding, enabling customers to validate infrastructure modernization ROI within **4-week proof-of-concept windows** with **\$1.8M+ deal acceleration**.
- Integrated **big-data and analytics capabilities** (Hadoop, Apache Spark concepts, Power BI, Tableau) into assessment recommendations, demonstrating **data warehousing** and advanced analytics readiness on GCP platforms; supported **enterprise architecture** strategy refinement for **15 customer engagements** and reduced technical blockers to adoption by **58%**.

Payments Operations Dashboard & SWIFT/ISO 20022 Regulatory Compliance Framework (HCL Technologies)

- Delivered a **production-grade payments-operations dashboard** with real-time monitoring of **SWIFT MT/MX message flows**, **ISO 20022 transaction processing**, **SEPA/cross-border payment workflows**, and **PSD2 compliance** requirements; implemented **observability and SLA management** using **Splunk and CloudWatch** to support **GDPR and regulatory audit trails**, achieving **99.95% uptime SLA** across **50+ daily banking transactions**.
- Architected **enterprise integration** layer connecting legacy payment systems to **REST API-based microservices** using **Python ETL pipelines** and **SQL data flows** (Oracle, PostgreSQL) for transaction reconciliation and tokenization workflows; reduced payment-message processing latency by **35%** and enabled real-time compliance reporting for regulatory stakeholders.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023

- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
