PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Troubleshoot and resolved **production application issues** across **Java Spring Boot**, **.NET**, and containerized workloads using **Splunk**, **CloudWatch**, and **Dynatrace** for large enterprise customers with **SLA management** requirements; diagnosed root causes for **P1/P2 incidents** and advocated customer needs to product engineering teams, reducing mean time to resolution by **40%**.
- Performed **systems administration and performance analysis** on **AWS infrastructure** including **EC2**, **S3**, **Lambda** deployments; debugged workload issues across **multi-node environments** using **Linux kernel analysis**, **shell scripting**, and **log investigation** to identify bottlenecks and optimize application reliability for high-traffic production systems.
- Developed **infrastructure automation and diagnostic tools** using **Python scripting** and **CI/CD pipelines via Jenkins**; built change-control workflows and coordinated **system administration updates** across interconnected enterprise platforms, improving deployment velocity by **35%** while maintaining audit trails and regulatory compliance for production environments.
- Supported **containerized application deployments** using **Docker** and cloud infrastructure; configured monitoring dashboards in **CloudWatch** and **Dynatrace** to track system health, network performance, and application metrics across distributed services; collaborated with engineering teams to resolve technical deployment obstacles and achieve product readiness.
- Triaged complex technical issues spanning **computer networking (TCP/IP, DNS, Load Balancing)**, **system administration**, **Developer Operations**, and web technologies; debugged **HTTP**, **REST API**, and **network-layer problems** in large-scale production environments; documented findings and advocated for product improvements to internal stakeholders and customer organizations.
- Applied **data-driven troubleshooting and performance analysis** using **SQL (PostgreSQL, MySQL, Oracle)** query analysis, **statistical methods**, and operational dashboarding via **Power BI** to identify infrastructure inefficiencies; created **exploratory data analysis** reports that informed capacity planning and system optimization decisions, reducing infrastructure costs by **18%**.

SKILLS

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Systems Administration, Performance Analysis, Containerized Workloads, Cloud Computing.

Kubernetes & Container Orchestration – Docker, containerization, multi-node environment debugging, workload troubleshooting, infrastructure deployment.

Developer Operations & Networking – CI/CD (Jenkins, Git), TCP/IP, DNS, Load Balancing, HTTP, REST APIs, Network Debugging, Change-Control Management.

Troubleshooting & Diagnostics – Kernel Debugging, Log Analysis, Root-Cause Analysis, Performance Profiling, Splunk, CloudWatch, Dynatrace, SLA Management, P1/P2 Incident Response.

Programming & Scripting – Python, Java Spring Boot, shell scripting, SQL (PostgreSQL, MySQL, Oracle), REST API development, automation tools.

Data Analysis & Reporting – Power BI, Tableau, DAX, SQL data warehousing, exploratory data analysis, statistical analysis, performance dashboarding.

Enterprise Systems & Consulting – ERP systems, business systems integration, technical consulting, customer advocacy, cross-functional collaboration, UAT coordination.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Multi-Region Kubernetes Infrastructure Diagnostics & Reliability Platform (HCL Technologies)

- Architected and deployed a comprehensive **Kubernetes troubleshooting and performance analysis platform** supporting large enterprise GKE/Anthos deployments across **AWS EC2 and multi-region clusters**; integrated **Splunk, CloudWatch, and Dynatrace** monitoring to enable **exploratory kernel debugging and containerized system performance analysis** for production workloads.
- Built **Python automation scripts and Jenkins CI/CD pipelines** to streamline root-cause diagnosis for customer-reported issues; implemented **system administration best practices** for configuration management and change-control across interconnected infrastructure nodes, reducing issue resolution time by **45%** and improving customer SLA compliance to **99.8%**.
- Developed **operational dashboards using Power BI** integrating **TCP/IP network metrics, DNS resolution times, Load Balancer throughput, and Linux system-level performance data**; created automated alerting for anomalies enabling proactive intervention before customer-facing impact, reducing downtime incidents by **52%** across **6 large enterprise accounts**.
- Collaborated with customer engineering teams to document troubleshooting runbooks, API debugging guides, and deployment best practices; advocated for product improvements to internal Google Cloud engineering stakeholders based on customer-reported issues, driving **12 feature enhancements** to GKE operational tooling.

Enterprise Payment Operations & SWIFT Messaging Dashboard (HCL Technologies)

- Provided **level two technical support and customer advocacy** for a mission-critical **SWIFT messaging and payments operations dashboard** serving a tier-1 banking customer; troubleshooted production issues spanning **REST API integrations, SQL database layers (PostgreSQL, Oracle), and AWS Lambda-based message processors**, maintaining **99.9% SLA** and ensuring regulatory compliance with GDPR and payment industry standards.
- Analyzed **ISO 20022 message flows, SEPA cross-border payment processes**, and tokenization workflows; collaborated with banking-domain BAs and operations teams to diagnose transaction-flow visibility issues and reconciliation anomalies; updated operational documentation and runbooks to improve system adoption and reduce support ticket volume by **28%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
