PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Partnered with HR Business Partners and People Leadership Team to translate complex workforce data into clear, compelling narratives and recommendations, delivering **15+ quarterly business reviews (QBRs)** and **40+ ad hoc people analytics requests** that informed organizational health metrics and strategic hiring decisions using **Power BI, SQL, and data storytelling** methodologies.
- Conducted proactive workforce analysis across attrition, hiring, performance, mobility, and organizational design, connecting data across disparate people systems using **SQL, Python, and ETL pipelines** to identify **3+ significant retention risks** and **5+ cost-saving opportunities** totaling **\$500K+ annual impact** for Sales and Go-To-Market leadership.
- Served as go-to People Analytics expert for sales and revenue-generating teams, supporting **Sales organization QBRs** and **GTM performance tracking**, delivering real-time dashboards using **Power BI and DAX measures** to monitor hiring velocity, retention rates, and organizational effectiveness against people plan objectives with **98% data accuracy**.
- Developed standardized **workforce analytics frameworks** and **data models** across **Workday, talent acquisition systems, and performance management platforms**, establishing **single source of truth** for people data; built **automated reporting pipelines** using **Python, Power Query, and scheduled ETL jobs** reducing manual reporting overhead by **60%**.
- Applied statistical analysis, **exploratory data analysis (EDA)**, and **hypothesis testing** methodologies to uncover trends and opportunities in organizational health; conducted **A/B testing** on retention initiatives and **time-series analysis** on attrition patterns, enabling leaders to make data-driven decisions on compensation, mobility, and L&D; strategies.
- Demonstrated consultative, business-facing mindset by building trusted advisor relationships with senior business leaders and People team stakeholders; documented insights in **Confluence**, created **executive dashboards** using **Tableau and Power BI**, and presented findings to C-suite audiences, translating **machine learning clustering models** and **predictive analytics** into actionable workforce recommendations.

SKILLS

People Analytics & Workforce Data – organizational health metrics, attrition analysis, hiring analytics, retention strategies, performance tracking, mobility analysis, workforce forecasting, headcount planning, people data storytelling.

Analytics & BI Tools – Power BI, Tableau, Power Query, DAX, data modelling, data warehousing, QBR development, executive dashboards, automated reporting.

Data Engineering & SQL – SQL (PostgreSQL, MySQL, Oracle), ETL pipelines, data integration, disparate systems connectivity, Python (pandas, NumPy, scikit-learn), scheduled data jobs, data validation.

Statistical & Predictive Methods – exploratory data analysis (EDA), hypothesis testing, A/B testing, time-series analysis, regression analysis, clustering models, supervised/unsupervised machine learning, evaluation metrics.

Business Systems & HR Platforms – Workday, talent acquisition systems, performance management platforms, change management, business partner collaboration, cross-functional stakeholder engagement, UAT support.

Technical Stack – Python, SQL, Git, Jira, Confluence, Linux, REST APIs, data pipelines, cloud data platforms, statistical software (R/RStudio).

Business Acumen – sales and go-to-market (GTM) dynamics, revenue-generating teams, business strategy alignment, organizational design, total rewards, learning & development (L&D;), strategic HR partnership, consultative advising.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Sales & GTM Workforce Intelligence Platform – Real-Time Organizational Health Dashboard (HCL Technologies)

- Architected end-to-end **workforce analytics platform** integrating **Workday**, **talent acquisition systems**, and **performance management data** using **Python ETL pipelines**, **SQL**, and **Power BI** to deliver unified people analytics for Sales and Go-To-Market leadership; **reduced data consolidation time by 75%** and established **single source of truth** for hiring, retention, and organizational effectiveness metrics.
- Developed **Power BI dashboards** with **DAX measures** and **data models** tracking **real-time hiring velocity**, **sales team attrition**, **retention cohort analysis**, and **performance-to-pay correlations**; delivered **quarterly business reviews (QBRs)** using **data storytelling** methodologies that identified **2 critical retention risks** in top-performing sales teams, enabling proactive interventions that improved retention by **12%**.
- Applied **advanced statistical methods** including **time-series analysis**, **regression modeling**, and **clustering algorithms** to forecast attrition, segment high-risk employees, and predict hiring bottlenecks; delivered predictive insights to **People Leadership Team and senior business leaders**, supporting strategic decisions on compensation, mobility, and organizational design.
- Built **automated reporting infrastructure** using **Python** (pandas, NumPy), **Power Query ETL**, and **scheduled SQL jobs** generating **weekly insights reports**, **ad hoc analytics requests**, and **monthly stakeholder narratives**; reduced manual analytics work by **60%** while improving data accuracy to **99%** and enabling **faster decision-making cycles** across GTM teams.
- Partnered closely with **HR Business Partners**, **Talent Acquisition leads**, and **Total Rewards teams** to translate complex people data into **clear, executive-ready recommendations**; presented insights to C-suite audiences, influencing **\$800K+ annual investment decisions** in retention programs and organizational restructuring initiatives.

Cross-Functional People Data Integration & Standardization Framework (HCL Technologies)

- Designed and implemented **standardized data models** and **workforce analytics frameworks** connecting disparate people systems—**Workday**, **ATS platforms**, **performance management tools**, and **compensation systems**—using **SQL**, **Python**, and **data warehousing principles**; established governance, data quality standards, and **single source of truth** eliminating **15+ manual reconciliation processes**.
- Delivered **consultative advisory services** to **People Business Partners**, **L&D; teams**, and **organizational leaders**, translating **exploratory data analysis (EDA)** findings into **actionable strategic recommendations** on attrition, hiring efficiency, mobility, and organizational effectiveness; created **Tableau and Power BI executive dashboards** presenting insights to senior leadership with **95%+ adoption rate**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023

- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
