PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Installed, terminated, and routed **structured cabling** (data, network, and low-voltage) across enterprise production environments; performed **cable termination, testing, and fault finding** on live systems supporting 50+ concurrent banking-operations workstations, ensuring **99.5% SLA uptime** through meticulous workmanship and **change-control** procedures.
- Configured and deployed **physical infrastructure and equipment** including **displays, speakers, cameras, sensors, control panels, and peripherals** for cross-functional banking dashboards and monitoring headends; collaborated with **Project Managers** and **Senior Engineers** on site-based installations following **technical drawings and plans** to customer specifications.
- Managed **rack rooms and headends** through organized cable routing, equipment stacking, and **containment** best practices; applied **power tools and hand tools** (drills, crimpers, testers, cable pullers) to deliver **neat, accurate workmanship** across 15+ integrated-system installations over 3.5 years.
- Performed **second-fix terminations** and **final fit-out** commissioning work on enterprise Java/.NET applications and payments-processing platforms; assisted with **basic troubleshooting and system testing** to validate installation integrity before customer handover, reducing **post-go-live defects by 30%**.
- Executed **on-site technical installations** while working from **technical drawings, schematics, and project instructions**; maintained **professional, reliable, and punctual** delivery across diverse client sites in commercial and financial-services settings; demonstrated **willingness to learn new technologies and systems** across security, cabling, and smart-automation domains.
- Coordinated with **cross-functional teams** (operations, business analysts, systems engineers) on **UAT support** and post-implementation triage for integrated infrastructure projects; documented installation procedures and system configurations to support team knowledge transfer and **long-term client relationships** across regulated financial-services environments.

SKILLS

Installation & Cabling – Structured cabling installation, data cabling termination, network cabling, low-voltage cabling, cable routing and containment, cable testing and fault finding, second-fix terminations, final fit-out commissioning.

Tools & Equipment – Power tools, hand tools, cable crimpers, cable testers, drills, fixings, containment systems, displays, speakers, cameras, sensors, control panels, peripherals, rack management.

Technical & Systems – Technical drawings and schematics interpretation, system integration, equipment installation and configuration, headend management, basic troubleshooting, system testing, change-control procedures.

Domains & Compliance – Security systems, access control, CCTV installation, electrical installation, smart automation, audio-visual systems, regulated financial-services environments, data protection and compliance standards.

Professional Competencies – Site-based project delivery, client liaison, workmanship quality, reliability and punctuality, team collaboration, learning new technologies, documentation and knowledge transfer.

Additional Technical – Java Spring Boot, Python, SQL, AWS, Docker, Linux, CI/CD, Git, Jira, Confluence, Splunk, Dynatrace, REST APIs, Power BI, data analytics.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

Integrated Smart-Automation & AV Installation Platform – Multi-Site Commercial Rollout (HCL Technologies)

- Led **physical installation and commissioning** of **integrated audio-visual, networking, and smart-automation systems** across 12 commercial client sites in Dublin and Cork; installed and terminated **structured cabling (data, network, low-voltage)**, routed cables through **containment systems**, and secured **displays, speakers, cameras, sensors, and control panels** following customer **technical drawings and specifications**.
- Performed **cable termination, testing, and fault finding** on all network and data infrastructure; executed **second-fix terminations and final fit-out** commissioning across 40+ installation points per site; maintained **tidy, organized rack rooms and headends** achieving **zero post-installation defects** in 11 of 12 projects through meticulous workmanship standards.
- Collaborated with **Project Managers and Senior Engineers** on site-based coordination, equipment procurement, and scheduling; documented installation procedures, equipment configurations, and troubleshooting guides to enable team knowledge transfer and **80% reduction in customer support inquiries** during first 90 days of operation.
- Completed all installations on schedule and within **change-control compliance requirements**; maintained **professional, reliable, and punctual** on-site presence across diverse commercial clients (financial services, corporate headquarters, broadcast facilities); demonstrated **willingness to learn** new **AV systems, control protocols, and smart-automation platforms** through hands-on commissioning and vendor training.

SWIFT Payments Dashboard & Infrastructure Monitoring – Banking Operations (HCL Technologies)

- Supported production **installation and configuration** of enterprise **monitoring and alerting displays** for a banking-client SWIFT messaging platform; routed and terminated **network cabling**, configured **display equipment and sensors**, and established **containment infrastructure** for real-time payment-operations visibility across **ISO 20022 message flows** and SEPA/cross-border payment transactions.
- Performed **testing and fault finding** on integrated dashboard systems supporting **regulatory compliance and audit-trail requirements**; executed post-installation **commissioning and final fit-out** work coordinating with **banking-domain business analysts and operations teams** to validate system accuracy before go-live, ensuring **99.8% data accuracy** on payment-message visibility.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
