PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Led **project management and operational support** across enterprise health and social care data initiatives, coordinating **cross-functional stakeholder engagement** with banking regulators, HSE partners, and Department of Health teams; managed change-control workflows, UAT coordination, and post-implementation triage for compliance-critical systems, reducing operational handoff delays by **40%**.
- Designed and deployed **data management** infrastructure supporting national service-user experience surveys, building **ETL pipelines** in **Python** and **SQL** (PostgreSQL, Oracle, MySQL) to ingest, validate, and transform multi-source health and social care datasets; engineered **data warehousing** schemas and reconciliation workflows handling **50,000+** monthly records with **99.8%** audit-trail accuracy.
- Developed **communication and operational reporting dashboards** using **Power BI** and **Tableau** for health service leadership, creating **DAX measures**, **data modelling**, and **Power Query** ETL workflows to present care-quality metrics, patient experience insights, and regulatory compliance status to diverse stakeholder audiences; published **15+** executive reports annually supporting informed service-delivery decisions.
- Executed **document writing, reviewing, editing and proofing** for health information standards, regulatory guidance, and operational procedures across **multiple audience types** (clinicians, administrators, service-users, policymakers); maintained compliance documentation for **GDPR**, data-protection, and audit-trail requirements in production health-care environments supporting **30+** concurrent improvement initiatives.
- Managed **project administration and digital design support** for the National Care Experience Programme, coordinating survey deployment logistics, stakeholder communication schedules, and data-integrity workflows; tracked project milestones in **Jira** and maintained knowledge repositories in **Confluence**, improving team efficiency and reducing operational bottlenecks by **35%**.
- Applied **statistical analysis, hypothesis testing, and exploratory data analysis** techniques from MSc Data Analytics coursework to evaluate health-care service quality trends; performed **A/B testing, time-series forecasting, and regression modelling** using **R, pandas, NumPy, scikit-learn** to generate evidence-based recommendations for care-experience improvements across HSE and Mental Health Commission partnerships.

SKILLS

Project Management & Operational Support – project planning, change-control management, UAT coordination, stakeholder engagement, operational administration, Jira, Confluence.

Data Management & Digital Design – data pipelines, ETL design, data warehousing, data modelling, SQL (PostgreSQL, MySQL, Oracle), Python, Git, data validation, reconciliation workflows.

Business Intelligence & Communication Dashboards – Power BI, Tableau, DAX, Power Query, data visualisation, executive reporting, KPI dashboards, multi-audience communication.

Health & Regulatory Compliance – GDPR, data protection, audit trails, regulatory documentation, health-care operations, SEPA standards, ISO 20022 message structures, care-quality frameworks.

Analytics & Statistical Methods – hypothesis testing, exploratory data analysis, A/B testing, time-series forecasting, regression modelling, R, pandas, NumPy, scikit-learn.

Technical Stack – Python, SQL, AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Jenkins, REST APIs, Flask, FastAPI.

Professional Qualifications – MSc Data Analytics (National College of Ireland), Bachelor of Engineering Computer Science, IELTS Academic Band 7/9.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

National Care Experience Data & Digital Integration Platform (HCL Technologies)

- Architected end-to-end **data management and digital design system** supporting multi-agency health-care service-user experience surveys across HSE, Mental Health Commission, and Department of Health; consolidated fragmented survey inputs, operational logs, and compliance metadata from **12+ regional health services** into unified **PostgreSQL data warehouse** with **ISO 20022-aligned reconciliation workflows**.
- Built **Power BI executive dashboards** and **Tableau interactive reports** translating raw survey data into care-quality metrics, patient-experience trends, and regulatory-compliance status for health-service leadership and policy-makers; **DAX measures** calculated **30+ KPIs** (wait times, patient satisfaction, safety incidents); published **18 monthly reports** supporting **\$2.5M** in evidence-based service improvements.
- Engineered **Python ETL pipelines** orchestrating **50,000+ monthly health-care records** through validation, transformation, and aggregation layers; automated **data quality checks, audit-trail logging, and GDPR-compliant anonymisation** using **pandas, NumPy, and SQL stored procedures**; achieved **99.8% data accuracy** and reduced manual data-entry errors by **87%**.
- Designed **operational project administration workflows** using **Jira and Confluence** to coordinate survey deployment, stakeholder communication, and change-control across **cross-functional teams** (clinical, administrative, regulatory); standardised **document writing, reviewing, editing, and proofing processes** for health-information standards and regulatory guidance, ensuring consistency across **25+ policy documents**.
- Conducted **statistical analysis and hypothesis testing** on longitudinal care-experience datasets using **R, scikit-learn, and time-series forecasting** to identify emerging patterns in service-user satisfaction, safety metrics, and demographic health-equity gaps; delivered **8 evidence-based recommendations** adopted into national health-care improvement roadmap.

Health-Care Payments Reconciliation & Compliance Standards Automation (HCL Technologies)

- Delivered **data management and operational support** for health-care payment processing dashboard integrating **SWIFT MT/MX messaging formats, ISO 20022 message flows**, and cross-border payment reconciliation; consolidated **SEPA instant payment** transactions and tokenization data across **3 regional health authorities**, enabling real-time compliance audit-trail visibility and **P1/P2 incident response** in **SLA-critical production environments**.
- Developed **operational reporting dashboards** using **Splunk and CloudWatch** to communicate payment-operation status, regulatory-compliance metrics, and exception-handling workflows to health-service finance teams and external regulators; configured **15+ alerting thresholds** for transaction anomalies and GDPR data-protection breaches, reducing mean-time-to-resolution by **45%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)

- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
