PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **healthcare application support and incident management** across enterprise Java/.NET systems at HCL, resolving **P1/P2 production incidents** within SLA using **Splunk, CloudWatch, and Dynatrace** monitoring dashboards, achieving **99.2% uptime** for mission-critical patient-care systems.
- Designed and deployed **operational reporting dashboards** using **Power BI** and **SQL** (PostgreSQL, MySQL, Oracle) to track **system health metrics, incident trends, and resource utilization**, enabling management to make data-driven decisions on staffing and infrastructure allocation with **15+ real-time KPI visualizations**.
- Automated **healthcare data pipelines and ETL workflows** using **Python, Apache Airflow, and scheduled SQL jobs** to integrate patient records, operational logs, and clinical systems across **3+ interconnected enterprise databases**, reducing manual data entry by **80%** and ensuring **GDPR and healthcare data compliance**.
- Developed **REST API integrations** and **microservice features** in **Java Spring Boot** to connect healthcare operational systems, billing platforms, and clinical records repositories; implemented **change-control workflows** and **CI/CD pipelines with Jenkins and Git** to ensure regulated, audit-compliant deployments across **5+ integrated systems**.
- Collaborated with **clinical and business stakeholders** across UAT, requirements gathering, and post-implementation support to translate operational needs into system enhancements; documented **user guides, training materials, and runbooks** in **Confluence** achieving **98% staff adoption** within **2 weeks** of system updates.
- Administered **Linux servers, shell scripting, and containerization** (Docker) for **AWS infrastructure** (EC2, S3, Lambda, CloudWatch) supporting healthcare application deployments; performed **log analysis, system performance tuning, and disaster recovery procedures** to maintain **zero data loss** and **4-hour recovery time objectives**.

SKILLS

Application Support & Infrastructure – Production Support, Incident Management, System Monitoring, SLA Management, Splunk, CloudWatch, Dynatrace, Linux Administration, Shell Scripting, Docker, AWS (EC2, S3, Lambda).

Data Engineering & Analytics – Python, SQL (PostgreSQL, MySQL, Oracle), ETL Pipelines, Data Warehousing, Apache Airflow, Power BI, DAX, Power Query, Tableau, pandas, NumPy, Data Modelling.

Software Development & APIs – Java, Spring Boot, REST APIs, Microservices, Flask, FastAPI, React, Angular, Full Stack Development.

Enterprise Systems & Integration – ERP Support, System Integration, Change Management, CI/CD (Jenkins, Git), Jira, Confluence, UAT Coordination, Cross-System Data Flows.

Healthcare & Regulatory Compliance – GDPR, Healthcare Data Protection, Audit Trail Management, Regulatory Compliance, User Documentation, Training Material Development, Stakeholder Communication.

Statistical Analysis & Modelling – R, RStudio, Hypothesis Testing, Regression Analysis, Supervised/Unsupervised Learning, scikit-learn, Time-Series Analysis, A/B Testing.

Certifications & Education – MSc Data Analytics (National College of Ireland, Dublin), Bachelor of Engineering Computer Science, IELTS Band 7, Full Stack Java Spring Boot & Angular, Web Development

(Coursera), Python Programming (Coursera).

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Healthcare Operational Intelligence & Incident Response Dashboard (HCL Technologies)

- Engineered an integrated **Power BI operational reporting platform** consolidating **real-time system health, incident metrics, and resource utilization** from **Splunk, Dynatrace, and CloudWatch** data sources across **8 mission-critical enterprise applications** serving **12 clinical departments**.
- Constructed **DAX data models and Power Query ETL processes** to transform raw monitoring logs into **15+ executive KPIs** (uptime %, incident volume, MTTR, SLA compliance) with **automated daily refresh** and role-based access controls compliant with **GDPR data protection regulations**.
- Deployed **automated alerting workflows** using **Python and Apache Airflow** to trigger **incident escalation notifications** within **2 minutes** of system anomaly detection, reducing **mean-time-to-response by 45%** and enabling **proactive root-cause analysis** before patient-care impact.
- Developed comprehensive **user guides, training materials, and runbooks** in **Confluence** documenting dashboard navigation, metric definitions, and on-call procedures; facilitated **3 training sessions** achieving **100% clinical and IT staff certification** and **98% dashboard adoption** within operational workflows.
- Integrated **Java Spring Boot REST APIs** to ingest system telemetry from **3 legacy healthcare databases** (Oracle, PostgreSQL, MySQL) via **Docker containerized microservices** deployed on **AWS Lambda**, ensuring **zero data loss** and **99.5% availability** for continuous operational reporting.

Enterprise Healthcare System Integration & Change Management Framework (HCL Technologies)

- Architected and deployed **REST API integration layer** connecting **3 interconnected enterprise systems** (clinical records, billing platform, operational ERP) using **Java Spring Boot microservices** and **SQL data synchronization pipelines**, eliminating **manual data reconciliation** and achieving **100% data consistency** across systems.
- Established **change-control procedures and CI/CD automation** using **Jenkins pipelines, Git branching strategies, and automated code reviews** to enforce **audit-compliant, regulated deployments**; implemented **blue-green deployment patterns** reducing deployment risk by **60%** and enabling **rollback within 5 minutes**.
- Coordinated **UAT execution and post-implementation support** with clinical stakeholders, business analysts, and operations teams; documented **15+ system integration workflows** and **run-book procedures** ensuring **zero production incidents** in first **90 days post-go-live**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
