PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **end-to-end AI-powered automation workflows** using **Python, Flask, and REST APIs** to optimize lead generation and client acquisition processes, reducing manual data entry by **78%** and accelerating lead-to-CRM ingestion from 48 hours to **4 hours**.
- Built **scalable data pipelines** using **Python (pandas, NumPy)** and **SQL (PostgreSQL, MySQL, Oracle)** to extract, process, structure, and enrich data from multiple online and internal sources, implementing **data cleaning, deduplication, normalization, and fuzzy matching** logic across **50,000+ leads monthly**.
- Developed **web scraping solutions** with **rate-limit handling, session management, and dynamic platform behavior** control to ingest structured data from external sources; integrated **OCR tools** and **document parsing** for scanned and digital PDF extraction, processing **2,000+ documents weekly** with **94% accuracy**.
- Integrated **automation systems with CRM platforms** via **REST API** data synchronization and **database-level** workflows, ensuring seamless pipeline visibility and lead prioritization; managed **change control** and **UAT coordination** for system configuration updates across interconnected enterprise systems.
- Implemented **automated outreach and follow-up workflows** including **sequencing logic** and **engagement automation** triggered by lead-scoring rules, reducing response-time variance by **66%** and enabling **real-time CRM-driven sales pipeline** visibility across client acquisition lifecycle.
- Monitored **system performance, scalability, accuracy, and reliability** of deployed automation solutions using **CloudWatch** and **custom dashboards**; translated business requirements into technical automation solutions through direct collaboration with leadership, identifying and prioritizing **high-impact automation opportunities** with **ROI tracking**.

SKILLS

AI Automation & Workflow Design – end-to-end AI automation workflows, automation frameworks, AI agent tools, intelligent workflow orchestration, lead generation automation.

Data Engineering & Pipelines – data pipelines, data transformation, data extraction, data cleaning, deduplication, enrichment, normalization, fuzzy matching, entity resolution, structured data processing.

Web Scraping & Document Processing – web scraping, rate-limit handling, session management, dynamic platform behavior, OCR tools, document parsing, PDF extraction, scanned document processing.

CRM Integration & Data Synchronization – CRM platform integration, REST API integration, data synchronization, pipeline visibility, lead prioritization, sequencing tools, CRM-driven sales pipelines.

Programming & Automation Tools – Python, Flask, FastAPI, pandas, NumPy, scikit-learn, SQL, PostgreSQL, MySQL, Oracle, Java, Spring Boot, Git, Jenkins.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, CI/CD pipelines, system monitoring, scalability optimization.

Data Analysis & Business Intelligence – Power BI, Tableau, data modelling, data warehousing, DAX, Power Query, statistical analysis, business metrics tracking.

EDUCATION AND TRAINING

PROJECTS

Legal Lead Intelligence & Automation Platform (HCL Technologies)

- Architected and deployed a comprehensive **end-to-end AI automation system** that ingests lead data from **12+ online and internal sources** using **Python web scraping** with **rate limiting**, **session management**, and **OCR-powered document extraction** from legal databases, processing **8,000+ leads weekly** with **96% data accuracy**.
- Built a **multi-stage data pipeline** using **Python (pandas, NumPy)**, **PostgreSQL**, and **ETL workflows** to clean, deduplicate, normalize, enrich, and structure raw lead data; implemented **fuzzy matching** and **entity resolution** logic reducing duplicate leads by **82%** and enabling **lead scoring and prioritization** at scale.
- Integrated all automation systems with a **CRM platform via REST APIs** and **database synchronization**, ensuring **real-time pipeline visibility**, **lead-status tracking**, and **automated outreach sequencing**; configured **workflow automation** for engagement logic and follow-up triggers, reducing manual CRM entry time by **71%**.
- Developed **system monitoring dashboards** using **CloudWatch** and custom analytics to track pipeline **accuracy**, **throughput**, **latency**, and **reliability** across all automation stages; implemented auto-scaling logic and incident alerting, achieving **99.2% uptime** and reducing system investigation time by **58%**.
- Collaborated directly with leadership to identify automation opportunities, translating high-level business goals into technical requirements; delivered **4 major automation iterations** over 9 months, each reducing operational overhead and accelerating lead-lifecycle progression by **40–60%** per iteration.

SWIFT Payments Dashboard & Data Enrichment System (HCL Technologies)

- Designed and maintained a **production-grade payments operations dashboard** for monitoring **SWIFT messaging flows** (MT/MX formats) and **ISO 20022 compliance**; implemented **data extraction and enrichment pipelines** using **Python** and **SQL** to normalize payment metadata, detect anomalies, and provide real-time transaction-flow visibility across **SEPA**, **instant payments**, and **cross-border payment channels**.
- Built **automated data deduplication and reconciliation workflows** using **fuzzy matching algorithms** to identify duplicate payment records and alignment discrepancies across **PostgreSQL** and **Oracle** databases; reduced reconciliation errors by **89%** and accelerated month-end close processes by **3 days**, enabling regulatory audit-trail compliance.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
