PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and enhanced **React Native** mobile applications with **JavaScript (ES6+)** and **Redux** state management, delivering high-performance financial dashboards that processed real-time data streams from WebSocket integrations, reducing initial load time by **35%** and improving user engagement by **28%**.
- Optimized application responsiveness and scalable app architecture using **React Native ecosystem best practices** and **Expo**, implementing performance profiling and native module optimization across **iOS (Xcode)** and **Android (Android Studio)** platforms, achieving **60 FPS** rendering consistency at scale.
- Integrated **RESTful APIs** and **WebSocket-based services** for real-time financial data visualization, building dynamic charting and transaction-flow components that synchronized with live market feeds and operational alerts, serving **50,000+** concurrent mobile users without latency degradation.
- Collaborated with cross-functional engineering, design, and product teams in **agile** development sprints to define, design, and deliver mobile features, contributing to code quality through peer reviews, automated testing, and continuous improvement of mobile architecture across iOS and Android platforms.
- Built and shipped **data visualization components** handling large and complex datasets using **React Native** charting libraries and custom rendering optimization, implementing efficient data-binding patterns that reduced memory footprint by **40%** while maintaining responsive gestures and animations.
- Established mobile development workflows and CI/CD practices using **Git** branching and automated testing pipelines, enabling the distributed team to deploy features weekly with zero-downtime rollouts and maintaining **99.2%** application stability across production environments.

SKILLS

Mobile Development – React Native, JavaScript (ES6+), Redux, Expo, iOS (Swift, Xcode), Android (Kotlin, Android Studio).

Real-Time & API Integration – RESTful APIs, WebSockets, real-time data streams, WebSocket services, API integration patterns.

Performance & Architecture – Mobile performance optimization, scalable app architecture, data visualization optimization, responsive UI design, gesture handling, animation frameworks.

Development Practices – Agile methodologies, Git version control, CI/CD pipelines, code review, automated testing, continuous improvement.

Backend & Data Integration – Python, Java Spring Boot, SQL (PostgreSQL, MySQL, Oracle), AWS (EC2, S3, Lambda, CloudWatch), Docker.

Data & Analytics – Power BI, Tableau, DAX, data modelling, ETL pipelines, pandas, NumPy, scikit-learn.

Domain & Compliance – Financial services, fintech ecosystems, real-time trading platforms, GDPR, regulatory compliance, agile collaboration.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Real-Time Financial Trading Mobile Dashboard (HCL Technologies)

- Led end-to-end design and delivery of a **React Native** mobile trading dashboard using **Redux** and **Expo**, integrating **WebSocket services** for live market data feeds and **RESTful API** connections to backend payment and settlement systems, supporting real-time order execution and portfolio visualization for **75,000+** active traders.
- Optimized **data visualization components** for rendering high-frequency data streams (tick-level quote updates, transaction logs, order-book snapshots) using virtualized lists and memoization techniques, achieving **60 FPS** consistency and reducing memory consumption by **45%** across iOS (Swift, Xcode) and Android (Kotlin, Android Studio) platforms.
- Implemented **mobile performance optimization** strategies including lazy-loading of chart modules, progressive image rendering, and native module bridging for compute-intensive calculations, resulting in **2.8-second** average time-to-interactive and reducing app crash rates from **2.1%** to **0.3%** in production.
- Collaborated with cross-functional teams (product, design, backend engineers) in **agile** sprints to define feature requirements, design responsive layouts for multiple device form factors, and deliver weekly releases via **CI/CD** pipelines, maintaining **99.5%** uptime and zero-downtime deployments.
- Built scalable **WebSocket architecture** integration layer with automatic reconnection, heartbeat monitoring, and offline-queueing to ensure seamless real-time synchronization during network transitions, reducing data desync incidents by **92%** and improving user confidence in live pricing feeds.

Payments Operations Mobile Companion App (HCL Technologies)

- Architected a companion **React Native** mobile application for banking operations teams to monitor SWIFT payment flows and transaction status in real-time, integrating **REST APIs** from legacy payment-operations platforms and implementing push notifications for P1 alerts and SLA breaches.
- Implemented **data visualization dashboards** using custom **React Native** charting components to display payment volumes, settlement latencies, and currency-conversion metrics, enabling operations staff to triage issues in under **90 seconds** versus **10+ minutes** with web-only tools.
- Optimized mobile app **performance and scalability** for intermittent network conditions typical in banking operations centers, using offline-first synchronization, delta-sync APIs, and efficient caching strategies to support **500+** concurrent mobile users across **12 global payment hubs**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
