PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **enterprise-level security solutions** across **AWS cloud environments** (EC2, S3, Lambda, CloudWatch) using **Infrastructure as Code (Terraform, CloudFormation)** to enforce tamper-proof, audit-defensible controls; reduced security configuration drift by **40%** through automated compliance validation.
- Developed secure, production-grade code in **Python and Java Spring Boot** with comprehensive **code review** and **vulnerability scanning** practices; architected **cloud-native applications** integrating **AWS Redshift and Lake Formation** for secure data analytics pipelines, achieving **99.9% audit trail integrity** across financial transaction processing.
- Conducted **discovery, vulnerability assessment, penetration testing, and threat modelling** on **organizational assets and external applications** interacting with enterprise networks; identified and remediated **35+ critical security vulnerabilities** through systematic threat scenario analysis and **cybersecurity controls** implementation.
- Minimized security vulnerabilities by implementing **IAM, Authentication, OIDC, SAML** protocols and evolving **security protocols** aligned with industry insights and governmental regulations; designed **Data Security Posture Management (DSPM)** validation frameworks to assess control effectiveness in real-time, reducing unauthorized access incidents by **60%**.
- Collaborated with stakeholders and business leaders to understand **security needs** and recommend business modifications during vulnerability windows; architected **SaaS data platform integrations (Snowflake, Databricks)** with encrypted data flows and role-based access controls, supporting compliance across **GDPR, ISO 20022, and regulatory frameworks**.
- Executed creative security troubleshooting and technical problem-solving using **Python scripting, SQL (PostgreSQL, Oracle), Git CI/CD pipelines (Jenkins), and Linux system hardening**; built automated security validation dashboards via **Power BI** to monitor threat posture across infrastructure, enabling **real-time incident response** and reducing mean-time-to-remediation by **45%**.

SKILLS

Cloud Security & Architecture – AWS (EC2, S3, Lambda, CloudWatch, Redshift, Lake Formation), Infrastructure as Code (Terraform, CloudFormation), cloud-native application design, enterprise security solutions.

Cybersecurity & Controls – IAM, Authentication, OIDC, SAML, threat modelling, vulnerability assessment, penetration testing, data security posture management (DSPM), tamper-proof audit controls, regulatory compliance (GDPR, ISO 20022).

Software Development & Code Security – Python, Java Spring Boot, REST APIs, code review, vulnerability scanning, secure coding practices, production code development.

Data Analytics & Platforms – AWS Redshift, Lake Formation, Snowflake, Databricks, Power BI, DAX, data modelling, data warehousing, ETL pipelines.

DevOps & Infrastructure – Jenkins CI/CD pipelines, Git, Linux system administration and hardening, Docker containerisation, change-control management.

Databases & Data Management – PostgreSQL, MySQL, Oracle, SQL query optimization, schema design, data validation.

Enterprise & Domain Knowledge – ERP systems integration, financial services operations (SEPA, cross-border payments, PSD2), business systems architecture, stakeholder communication.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Cloud-Native Security Analytics Platform with DSPM & Threat Modelling (HCL Technologies)

- Architected and deployed a **cloud-native security analytics platform** on **AWS** leveraging **Terraform** and **CloudFormation** for infrastructure automation, integrating **Redshift** for large-scale security telemetry ingestion and **Snowflake** for cross-tenant threat analytics; platform processed **500M+ security events daily** with **sub-second query latency**.
- Implemented **Data Security Posture Management (DSPM)** framework using **Python** data pipelines and **Lake Formation** governance to continuously discover, classify, and assess data vulnerabilities across enterprise assets; designed automated **threat modelling workflows** that identified **48 critical misconfigurations** in external-facing applications within first 90 days.
- Built real-time security dashboards in **Power BI** with **DAX measures** for threat intelligence visualization, KPI tracking, and compliance posture reporting; enabled security leadership to make **vulnerability remediation decisions 3x faster** through on-demand threat scenario analytics.
- Integrated **IAM, OIDC, SAML authentication frameworks** across **multi-account AWS environments** with **Infrastructure as Code** templating; enforced tamper-proof audit logging via **CloudWatch** and automated compliance validation, achieving **100% audit defensibility** for regulatory requirements including **GDPR and ISO 20022 frameworks**.
- Designed penetration testing automation suite in **Python** to conduct continuous vulnerability discovery on organizational assets and external applications; executed systematic **threat scenarios** reducing mean-time-to-detection of security flaws by **55%** and enabling faster creative remediation solutions.

Enterprise Payments Security & Compliance Integration (HCL Technologies – Banking Domain)

- Supported production deployment of a **SWIFT messaging dashboard** integrating **ISO 20022 message formats (MT/MX)** with enterprise security controls; implemented **GDPR-compliant audit trails** and data protection protocols across cross-border payment flows, ensuring **100% regulatory compliance** in **SEPA and PSD2 environments**.
- Collaborated with banking-domain stakeholders, business analysts, and operations teams to conduct **threat modelling on payment processing systems** and recommend security modifications during vulnerability windows; architected secure **REST API integrations** between ERP systems and payments infrastructure using **Python and Java Spring Boot**, reducing integration-related security incidents by **70%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)

- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
