PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed end-to-end ETF lifecycle operations including order placement, settlement processing, and collateral monitoring across **100+ daily ETF transactions**, reducing settlement exceptions by **18%** through proactive reconciliation and cash receipt validation using **SQL** and **Python** automation scripts.
- Completed Portfolio Composition File (PCF) analysis and troubleshooting for **50+ fund compositions monthly**, resolving client inquiries regarding trade and settlement activities within **4-hour SLA** by cross-referencing asset baskets, custody records, and fund accounting systems via **REST APIs** and database integrations.
- Built and maintained operational dashboards in **Power BI** and **Splunk** to monitor ETF order flows, trade exceptions, and settlement status in real-time, enabling **30% faster incident detection** and supporting **15+ internal stakeholders** (Client Services, Custody, Fund Accounting, Global ETF Team) with daily efficiency reporting and management metrics.
- Drove process improvements and change-control management across interconnected ERP and business systems, coordinating **UAT activities** and post-implementation support for **8 new fund launches**, ensuring regulatory compliance, data integrity, and zero post-go-live defects through cross-functional collaboration with Product Development, Technology, and Authorized Participants.
- Supported new business initiatives and Authorized Participant onboarding by authoring comprehensive training materials, process documentation, and user guides in **Confluence**, reducing onboarding time by **25%** and enabling **12 external vendors** to self-serve common ETF operations queries.
- Researched and resolved **200+ client inquiries annually** regarding ETF trade settlement, collateral flows, and operational processes by analyzing transaction logs, reconciliation workflows, and system audit trails, achieving **95% first-contact resolution rate** and building trusted relationships with global clients and internal partners across distributed teams.

SKILLS

ETF Operations & Fund Services – ETF lifecycle management, order placement, settlement processing, collateral monitoring, cash receipts, Portfolio Composition File (PCF) analysis, trade settlement, burst transactions, Authorized Participant onboarding, fund launches.

Data & Analytics – Power BI, Splunk, SQL (PostgreSQL, MySQL, Oracle), Python, data modelling, ETL, reconciliation workflows, operational dashboards, management reporting, efficiency metrics.

Enterprise Systems & Integration – ERP integration, REST API integrations, cross-system data flows, change-control management, UAT coordination, post-go-live support, system interconnectivity.

Client & Stakeholder Management – client relationship building, cross-functional collaboration, global team coordination, vendor management, process documentation, training materials, SLA management.

Technical Stack – Java Spring Boot, AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Jira, Linux, shell scripting, CI/CD pipelines.

Domain Knowledge – fund accounting, global custody, transfer agency services, financial services operations, regulatory compliance, GDPR, payments processing fundamentals, SEPA, ISO 20022.

Professional Development – MSc Data Analytics (NCI, Dublin), IELTS Band 7, Full Stack Java Spring Boot & Angular, Python Programming, Web Development.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

ETF Trade & Settlement Operations Platform with Real-Time Exception Tracking (HCL Technologies)

- Architected an integrated ETF order-to-settlement monitoring platform using **Python** ETL pipelines and **PostgreSQL** data warehouse to ingest order placement, trade confirmation, settlement instruction, and collateral flow data from **5 custody systems** and fund accounting backends, centralizing **10,000+ daily transactions** into a single source of truth.
- Built **Power BI** operational dashboards with **DAX measures** and drill-down analytics to visualize ETF lifecycle stages, cash receipts, collateral positions, and settlement exceptions in real-time, enabling **Client Services and Custody teams** to identify and resolve issues **35% faster** and reducing manual reconciliation overhead by **20 hours weekly**.
- Implemented automated PCF analysis and validation engine in **Python** with **pandas** and **NumPy** to compare submitted portfolio compositions against fund accounting records, flagging asset mismatches, pricing discrepancies, and collateral gaps, reducing client inquiry resolution time from **8 hours to 90 minutes** for composition-related issues.
- Deployed anomaly detection and SLA monitoring via **Splunk** alerting rules to flag delayed settlements, incomplete cash receipts, and exceptions outside standard workflows, reducing **P1 incidents by 22%** and enabling **4-hour SLA adherence** for **95% of client inquiries** across **50+ authorized participants**.
- Coordinated UAT and post-implementation rollout across **Custody, Fund Accounting, and Client Services teams** through detailed process documentation and training materials, supporting **6 new ETF fund launches** with zero settlement defects and achieving **100% go-live success rate**.

SWIFT Payments Operations Dashboard & Regulatory Compliance Monitoring (HCL Technologies)

- Designed and maintained production-grade **SWIFT messaging** operations dashboard for banking client, monitoring **MT/MX message flows** and transaction settlement across **2,000+ daily payment transactions**, implementing **ISO 20022 message structure validation** and **SEPA compliance tracking** to ensure regulatory audit readiness.
- Developed **Python** scripts to parse and analyze **SWIFT MT/MX formats**, reconcile cross-border payment flows, and validate **ISO 20022 message structures** against banking schema standards, reducing data validation errors by **12%** and enabling operations teams to resolve payment discrepancies within **2-hour SLA**.
- Built **Splunk** and **Dynatrace** operational alerts for production incident management, monitoring application health, throughput anomalies, and SLA breaches across **3 interconnected payment systems**, achieving **99.7% uptime** and enabling **P1/P2 incident response within 15 minutes** for critical payment operations.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
