## PROFESSIONAL EXPERIENCE

**SOFTWARE ENGINEER – HCL Technologies | Chennai, India**

**09/2021 – 01/2025 (3.5 Years)**

- Executed software solutions and **Java Spring Boot** feature development, bug fixes, and **REST API** design on enterprise production systems supporting 500K+ daily transactions; implemented **CI/CD pipelines** via **Jenkins** and **Git** branching strategies, reducing deployment cycle time by **35%** and ensuring secure, high-quality production code across all releases.
- Designed and maintained **application resiliency** and reliability through **AWS cloud-native** architecture (**EC2, S3, Lambda, CloudWatch**); executed technical troubleshooting and **production support** using **Splunk** and **Dynatrace** for real-time monitoring, achieving **99.7% SLA** compliance and **P1/P2 incident response** within **15-minute** resolution targets.
- Developed secure, scalable backend systems using **Python** scripting, **SQL** database querying (**PostgreSQL, MySQL, Oracle**), and **Docker** containerization in a large corporate environment; optimized **ETL pipelines** and automated data workflows, improving data synchronization accuracy by **98%** and reducing manual intervention by **40 hours/month**.
- Gathered, analyzed, and synthesized data from large diverse datasets using **Power BI** dashboards, **DAX** measures, and **data modelling** to continuously improve software application performance; delivered **operational reporting** and **visualization** artifacts supporting business-critical decision-making for senior stakeholders across enterprise systems.
- Produced and contributed to **architecture and design artifacts** ensuring design constraints and **agile methodologies** were met through code development; managed change-control processes and **Software Development Life Cycle** governance in a regulated banking environment, coordinating **UAT** across interconnected enterprise systems and achieving **zero post-go-live defects** on **3 major releases**.
- Collaborated with talented colleagues across cross-functional teams including business analysts, operations, and regulators to design trusted, market-leading solutions in a secure, stable, and scalable manner; contributed to software engineering communities of practice and mentored junior engineers on **cloud platform integration**, **application design patterns**, and emerging technologies within an inclusive, diversity-focused team culture.

## SKILLS

**Back-End Development** – Java Spring Boot, REST APIs, Python, Flask, FastAPI, algorithm optimization, application resiliency, secure production code.

**Cloud & Infrastructure** – AWS (EC2, S3, Lambda, CloudWatch), Docker, containerization, cloud-native architecture, cloud platform integration.

**Databases & Data Engineering** – SQL, PostgreSQL, MySQL, Oracle, data modelling, data warehousing, ETL pipelines, schema design.

**DevOps & Software Engineering Practices** – CI/CD pipelines, Jenkins, Git, Agile methodologies, Software Development Life Cycle, change-control management, code reviews, UAT coordination.

**Monitoring, Observability & Analytics** – Splunk, Dynatrace, CloudWatch, Power BI, DAX, data visualization, operational reporting, large-scale data analysis.

**Front-End Development** – React, Angular, modern front-end technologies, responsive design.

**Enterprise & Domain Expertise** – ERP integration, enterprise business systems, production support, SLA management, incident response, large corporate environments, regulatory compliance.

## EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of  
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College  
of Technology, Coimbatore, India

01/2021

## PROJECTS

### Employee Platform Trading System Modernization – Fullstack Microservices Architecture (HCL Technologies)

- Led design and delivery of a **Java Spring Boot** microservices backend serving real-time trading data to **100K+ concurrent users**; architected **cloud-native** infrastructure on **AWS** using **EC2, Lambda, and CloudWatch** for auto-scaling and resilience, reducing system latency by **62%** and achieving **99.95% availability** during peak trading hours.
- Developed **React** front-end dashboard using modern component libraries to visualize trading operations and market data; implemented **REST API** integrations with **PostgreSQL** backends for real-time data synchronization, reducing data refresh latency from **5 seconds to 800ms** and enabling traders to make faster decisions.
- Established comprehensive **CI/CD pipelines** via **Jenkins** and **Git** branching strategy supporting **15+ deployments per week**; automated security scanning and code quality gates, eliminating **87% of production defects** before release and ensuring all code met enterprise security and reliability standards.
- Built operational analytics layer using **Power BI** dashboards with **DAX** measures to monitor application performance, user behavior, and trading metrics across **12 business units**; synthesized large, diverse datasets to provide stakeholders with real-time KPIs, reducing reporting turnaround time by **90%** and enabling data-driven platform optimization.
- Orchestrated **production support** and troubleshooting using **Splunk** and **Dynatrace** observability tools; implemented proactive monitoring for **P1/P2 incidents**, maintaining **SLA compliance at 99.7%** and reducing mean-time-to-resolution by **45%** through correlation of distributed system logs across **Docker** containers and **AWS** services.

### SWIFT Payments Operations & Compliance Dashboard (HCL Technologies)

- Designed and delivered a production **Python-powered ETL pipeline** ingesting **ISO 20022 message flows** and **SWIFT MT/MX** transaction data from banking clients' payment systems; architected **data warehousing** layer on **PostgreSQL** and **Oracle**, processing **50K+ daily payment messages** with **100% reconciliation accuracy** and enabling real-time visibility into cross-border payments and **SEPA** transactions.
- Developed **Power BI** operational dashboards with **DAX** calculations to surface payment status, exception tracking, and regulatory compliance metrics; delivered multi-layer **data visualization** and reporting artifacts for banking operations teams and compliance officers, reducing manual reconciliation effort by **35 hours/week** and supporting audit readiness.

## ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
