+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and delivered **full-stack Java Spring Boot microservices** with **React/TypeScript** UI components for employee platform features, implementing **REST API development, authentication/authorization patterns**, and **secure coding practices** across 15+ production services supporting 50K+ concurrent users.
- Executed **system design** and **application development** for distributed microservices architecture, leveraging **AWS (EC2, S3, Lambda, CloudWatch)** for deployment, operational stability, and cloud-native patterns; built resilient backend integrations with **SQL (PostgreSQL, Oracle, MySQL)** database querying and schema optimization reducing query latency by **35%**.
- Established **CI/CD pipelines using Jenkins** and Git branching workflows with code review discipline; implemented **DevOps** practices including **Docker containerization**, application resiliency patterns, and observability tooling (**Splunk, CloudWatch, Dynatrace**) for production monitoring, incident response, and SLA management achieving **99.8% uptime**.
- Conducted **testing**, debugging, and maintenance of large-scale enterprise Java applications in corporate environments; proactively identified performance bottlenecks and architectural anti-patterns through data analysis and logging, driving **25% improvement** in system response times and **40% reduction** in production incidents.
- Demonstrated mastery of **Software Development Life Cycle (SDLC)**, **Agile/Scrum ceremonies**, and change-control management across interconnected business systems; collaborated cross-functionally with architects, QA, and product teams to gather requirements, execute UAT, and deliver enterprise solutions on time within agreed security and compliance frameworks.
- Gathered, analyzed, and synthesized **large, diverse data sets** from application logs and operational metrics; produced **reporting visualizations** and dashboards using **Power BI** to drive continuous improvement insights, identify hidden system patterns, and communicate findings to senior leadership for infrastructure and coding hygiene decisions.

SKILLS

Languages & Frameworks – Java, Spring Boot, React, JavaScript, TypeScript, Python, SQL.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, CI/CD pipelines, Git, containerization, orchestration.

Backend & Architecture – REST API development, microservices architecture, distributed systems, system design, application resiliency, secure coding practices, authentication/authorization patterns.

Databases & Data Engineering – PostgreSQL, MySQL, Oracle, SQL query optimization, schema design, data modelling, ETL pipelines, data warehousing.

Observability & Monitoring – Splunk, Dynatrace, CloudWatch, logging, metrics, tracing, production debugging, incident management.

Frontend & UI – React component design, TypeScript, responsive user experiences, state management, accessibility, performance optimization.

Data & Analytics – Power BI, Tableau, DAX, data visualization, reporting, statistical analysis, machine learning fundamentals.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Employee Platform HR Technology Full-Stack Delivery (HCL Technologies)

- Architected and built end-to-end **microservices-based HR technology platform** using **Java Spring Boot** backend services, **React with TypeScript** frontend components, and **AWS cloud-native deployment** (EC2, S3, Lambda, CloudWatch) serving 100K+ internal users with **99.8% uptime SLA**.
- Implemented **distributed system design** with **REST API development**, **asynchronous message processing**, and **microservices orchestration**; designed **authentication/authorization patterns** using OAuth 2.0 and role-based access control; secured all integrations through **input validation** and **secure coding practices** (OWASP Top 10 compliance).
- Deployed **CI/CD pipelines using Jenkins** with **Docker containerization** and multi-stage deployment across dev/staging/prod environments; integrated **Kubernetes** for orchestration and auto-scaling; reduced deployment time from 45 minutes to **8 minutes** and improved release frequency to **10+ deployments per day**.
- Established comprehensive **observability and monitoring** using **Splunk, CloudWatch, and Dynatrace** for distributed tracing, application performance monitoring, and incident alerting; built **Power BI dashboards** for real-time visualization of system health, error rates, and business metrics enabling **30% faster MTTR** (mean time to recovery).
- Optimized **database querying** across **PostgreSQL and Oracle** through index tuning, query plan analysis, and schema normalization; reduced peak query latency by **35%** and improved throughput to **50K requests per second** during load testing; mentored junior engineers on **SDLC best practices**, code review standards, and **Agile/Scrum** ceremonies.

Payments Operations Monitoring & ISO 20022 Migration Dashboard (HCL Technologies)

- Delivered **full-stack application** for SWIFT messaging and payments operations using **Java backend services**, **React frontend**, and **AWS infrastructure**; implemented real-time **REST API integrations** with payment processing systems, **SQL-based transaction reconciliation**, and secure **data warehousing** for audit and compliance reporting across **SEPA, cross-border, and instant payment flows**.
- Engineered **system design** supporting **ISO 20022 message flows** (MT/MX format migration), **PSD2 Open Banking** compliance, and **GDPR data protection** requirements; built **microservices** to parse, validate, and route payment messages with **authentication/authorization** patterns ensuring regulatory adherence; reduced message processing latency by **40%**.
- Deployed **CI/CD pipelines (Jenkins)**, **Docker containerization**, and **AWS CloudWatch monitoring**; created **Power BI and Tableau dashboards** for transaction-flow visibility, operational alerting, and regulatory KPI reporting; achieved **99.9% transaction delivery SLA** and enabled stakeholders to resolve payment exceptions in **<2 hours** (down from 6+ hours).

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
