PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and developed **Java Spring Boot** REST APIs and microservices for enterprise applications running on **AWS** (EC2, S3, Lambda, CloudWatch), ensuring **secure, high-quality code** that met corporate architecture and design standards; maintained application stability through **CI/CD pipelines** (Jenkins, Git) and rigorous code reviews, reducing production defects by **18%**.
- Architected and analyzed complex enterprise application codebases to enhance functionality and build new services, collaborating cross-functionally with senior stakeholders and business teams; **modernized legacy systems** through **Spring Boot migration** and **REST API standardization**, improving system throughput by **22%** and reducing deployment time by **35%**.
- Built and maintained **secure, stable, and scalable applications** in large corporate environments using **Java, Spring Boot, PostgreSQL, MySQL, Oracle**, and **Docker** containerization; developed **application resiliency** patterns and implemented **security best practices** (GDPR compliance, audit trails, regulatory controls) to support production SLAs of **99.8%** uptime.
- Transformed data into actionable insights through **Power BI dashboards** and **Tableau visualizations** using **DAX** measures and **Power Query ETL**, automating **recurring operational reporting** to eliminate manual processes; built executive-facing monitoring dashboards that reduced incident response time by **40%** and improved cross-team visibility.
- Automated recurring issues and stability bottlenecks using **Python scripting, SQL data analysis**, and **Linux shell automation** (cron jobs, log analysis); designed **data pipelines and ETL workflows** that improved software stability by automating **P1/P2 incident detection** and reducing manual triage overhead by **50%**.
- Practiced **agile methodologies** and **Software Development Life Cycle (SDLC)** disciplines through daily **Scrum ceremonies, Jira ticketing**, and change-control management; fostered cross-team collaboration with architects, BAs, and operations to deliver **enterprise applications** that balanced security, stability, and business requirements across interconnected systems.

SKILLS

Languages & Frameworks – Java, Spring Boot, Python, SQL (PostgreSQL, MySQL, Oracle), REST APIs, Flask, FastAPI.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git, Jenkins CI/CD, agile methodologies.

Application Development & Architecture – System design, application development, testing, code debugging, enterprise application maintenance, application resiliency, security best practices, GDPR compliance.

Data & Business Intelligence – Power BI (dashboards, DAX measures, data modelling), Tableau, Power Query ETL, SQL data warehousing, pandas, NumPy, scikit-learn.

Enterprise & Domain Knowledge – Large corporate environments, Software Development Life Cycle (SDLC), change-control management, Jira, Confluence, Agile/Scrum, cross-team collaboration.

Frontend & Modern Development – ReactJS, Angular, web application development, responsive design.

Emerging Technologies – AI model integration, prompt engineering, DevOps principles, data analysis and visualization.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Executive Board Meeting Automation Platform – AI-Powered Collaboration Suite (HCL Technologies)

- Architected and developed an end-to-end **Java Spring Boot microservices platform** integrated with **Microsoft 365 apps** (Outlook, Teams, SharePoint) to enable senior bank leaders to prepare and run board meetings efficiently; deployed on **AWS** using **EC2, Lambda, CloudWatch, and S3** with **Docker containerization** and **CI/CD automation** (Jenkins, Git).
- Integrated **AI models** into application code using **prompt engineering** to generate automated board papers, agenda summaries, and decision-support recommendations; implemented **secure, compliant data flows** (GDPR-aligned encryption, audit logging) that reduced board preparation time by **65%** while maintaining regulatory controls.
- Designed **REST APIs** and database services using **PostgreSQL** to orchestrate data synchronization between Microsoft 365 and internal **enterprise applications**; implemented **application resiliency patterns** (circuit breakers, retries, failover logic) achieving **99.9% uptime** during peak board-meeting cycles.
- Built **Power BI dashboards** and **Tableau visualizations** using **DAX measures** to surface meeting participation metrics, action-item tracking, and executive KPIs; automated recurring reporting via **Power Query ETL pipelines**, reducing manual reporting overhead by **55%**.
- Led cross-functional collaboration with senior stakeholders, architects, and operations teams; practiced **agile methodologies** (two-week sprints, daily standups, code reviews) and **change-control management** to coordinate go-live and iterative enhancements across interconnected enterprise systems.

SWIFT Payments Dashboard & ISO 20022 Transaction Monitoring System (HCL Technologies)

- Developed and maintained a **Java Spring Boot application** serving as the core **payments-operations dashboard** for a Tier-1 banking client; implemented real-time **SWIFT messaging** (MT/MX format) ingestion and ISO 20022 message flow parsing, providing transaction-flow visibility and operational alerting for **500K+ daily payment messages**.
- Architected **secure, scalable data pipelines** using **Python ETL scripts, PostgreSQL, and AWS Lambda** to normalize and enrich SWIFT transactions; built **Power BI operational dashboards** with **DAX measures** for SLA monitoring, reconciliation tracking, and SEPA/cross-border payment compliance reporting, reducing incident detection time by **45%**.
- Ensured **application stability and security** through **CloudWatch monitoring, Dynatrace APM, and Jenkins CI/CD pipelines**; maintained **GDPR compliance** and audit-trail controls for regulatory requirements, supporting **99.8% production SLA** in a mission-critical payments environment.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
