## PROFESSIONAL EXPERIENCE

**SOFTWARE ENGINEER – HCL Technologies | Chennai, India**

**09/2021 – 01/2025 (3.5 Years)**

- Designed and delivered **data integration and data acquisition solutions** using **AWS EMR, S3, AWS Glue, and Lambda** to extract, transform, and distribute data across disparate banking and enterprise systems; optimized **PySpark** pipelines processing **500+ GB daily** of payment transaction data with **99.5% SLA uptime**.
- Built scalable **data warehousing** architectures on **Databricks** and **AWS RDS** using **Delta Tables, Parquet, and Avro** file formats; implemented **Apache Airflow** orchestration for enterprise ETL workflows across **15+ heterogeneous data sources**, reducing manual data reconciliation by **60%**.
- Engineered **Infrastructure as Code (IaC)** automation using **Terraform and CloudFormation** for reproducible cloud deployments; integrated **Jenkins CI/CD pipelines, Git, Artifactory, and Maven** for containerized **Docker** data processing jobs, achieving **40% faster** release cycles and **zero manual errors**.
- Developed complex business intelligence integrations using **Athena** and **DynamoDB** NoSQL stores to query and analyze **multi-terabyte** distributed datasets; provided **problem-solving expertise** and **complex data analysis** for enterprise finance and HR analytics dashboards, translating requirements across internal product teams and cross-functional stakeholders.
- Architected **Java open-source API standards** and **REST API integrations** to enable **data distribution across one or more data stores** serving downstream applications; collaborated with **Quality Engineering and System Admin Teams** to optimize query performance by **35%** through distributed **Spark** partitioning strategies and data Lake optimization.
- Delivered end-to-end **data modeling** and **data warehousing** designs for geographically distributed teams supporting multiple JPMorgan Chase internal product lines; implemented strong **troubleshooting and analytical skills** to diagnose and resolve **production data pipeline failures**, ensuring **100% data completeness** and **SLA compliance** across regulated financial systems.

## SKILLS

**Data Engineering & Big Data** – AWS EMR, S3, AWS Glue, Lambda, Apache Airflow, PySpark, Scala, Spark, Databricks, Delta Tables, Parquet, ORC, Avro, Sequence Files.

**Data Warehousing & Querying** – AWS RDS, Athena, Data Modeling, Data Lake Architecture, Distributed Query Optimization, Data Warehouse Design.

**Cloud & Infrastructure** – AWS (EC2, S3, Lambda, CloudWatch), Terraform, CloudFormation, Infrastructure as Code (IaC), Docker.

**CI/CD & DevOps** – Jenkins, Git, Artifactory, Maven, YAML, Cloud Deployments, Containerization.

**Databases & Storage** – Oracle, PostgreSQL, MySQL, DynamoDB, NoSQL, SQL, Database Integration.

**Programming & API Design** – Java, Python, REST APIs, Java Open-Source Standards, API Integration.

**Development Tools & Productivity** – GitHub Copilot, AI-Assisted Development, Jira, Confluence, Agile/Scrum.

## EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of  
Ireland, Dublin**

**02/2026**

## PROJECTS

### **Workforce Analytics Data Lake & Integration Platform (HCL Technologies)**

- Architected a **petabyte-scale data lake** on **AWS S3** and **Databricks** consolidating HR, payroll, and workforce systems data using **AWS Glue** ETL jobs and **Apache Airflow** orchestration; ingested **200+ daily data sources** in **Delta Tables, Parquet, and ORC** formats, enabling real-time workforce analytics for JPMorgan Chase leadership.
- Engineered **PySpark** and **Scala** distributed data pipelines processing **2 TB daily** of employee and organizational data with **sub-5-minute latency**; optimized query performance on **Athena** and **Databricks SQL** endpoints using intelligent partitioning and compression, reducing query costs by **45%**.
- Deployed **Infrastructure as Code (IaC)** using **Terraform** and **CloudFormation** for reproducible multi-region AWS data infrastructure; integrated **Jenkins CI/CD pipelines** with **Maven, Git, and Artifactory** to automate **PySpark job deployment** and **Docker containerization**, enabling **50+ deployments monthly** with zero downtime.
- Implemented **data warehousing and data modeling** best practices to design a normalized dimensional schema supporting **100+ concurrent analytics queries**; leveraged **DynamoDB** for low-latency employee lookup services and **RDS** for transactional HR data, integrating via **REST APIs** and **Lambda** serverless functions.
- Delivered **complex analysis and problem-solving** across geographically distributed engineering and business intelligence teams; documented **data lineage, transformation logic, and integration patterns** in **Confluence**, enabling self-service analytics for HR and workforce planning stakeholders with **99.8% uptime SLA**.

### **Enterprise Payments & SWIFT Integration Data Pipeline (HCL Technologies)**

- Built **data integration solutions** for a banking client's **SWIFT messaging and payments operations dashboard**, extracting and transforming **ISO 20022 message flows** and cross-border payment data using **Python ETL scripts** and **SQL** across **Oracle** and **PostgreSQL** systems; processed **50,000+ daily payment messages** with **100% audit-trail compliance**.
- Implemented **production monitoring and reliability engineering** using **Splunk** and **Dynatrace** dashboards to track **P1/P2 incident response** and SLA management for regulated financial transactions; reduced mean time to resolution (MTTR) by **35%** through automated alerting and root-cause analysis of payment flow anomalies.
- Collaborated with cross-functional banking domain BAs and operations teams to gather requirements for **data distribution** across payment processing systems; provided **technical troubleshooting and analytical expertise** during **UAT coordination and post-go-live support**, ensuring GDPR and financial regulatory compliance across integrated ERP and business systems.

## ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
