PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and delivered **Java Spring Boot** microservices handling **real-time transaction processing** across production banking systems, executing secure, high-quality code that reduced API latency by **18%** and maintained **99.8% uptime** across interconnected financial services platforms.
- Engineered **CI/CD pipelines using Jenkins** and **Git** branching strategies for **continuous integration and deployment** in large corporate environments, automating code reviews and release cycles to accelerate feature delivery by **35%** while maintaining enterprise-grade security and compliance controls.
- Architected and optimized **AWS cloud-native infrastructure** leveraging **EC2, S3, Lambda, and CloudWatch** for application resiliency and auto-scaling, enabling horizontal scaling to support **40% increased transaction volume** without performance degradation or increased operational overhead.
- Executed comprehensive **software troubleshooting and technical debugging** across production environments using **Splunk, Dynatrace, and CloudWatch**, diagnosing and resolving **P1/P2 incidents** with **95% first-contact resolution** rate and reducing mean-time-to-recovery (MTTR) by **28%** through systematic root-cause analysis.
- Developed **data pipelines and SQL-driven analytics** using **Python** and **PostgreSQL, MySQL, Oracle** to gather, synthesize, and visualize operational insights from large, diverse datasets across **10+ interconnected business systems**, generating automated reporting that improved decision-making velocity by **40%** and reduced manual data aggregation overhead by **25 hours/week**.
- Collaborated with cross-functional teams including software engineers, architects, and business stakeholders in **agile methodologies**, contributing to software engineering communities of practice, producing architecture and design artifacts that ensured design constraints were met across **4 major releases**, and fostering team culture of diversity, inclusion, and continuous technical excellence.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, application design patterns, microservices architecture.

Frontend Development – React, Angular, HTML5, CSS3, responsive UI design.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, application resiliency, cloud-native design.

Databases & Data – PostgreSQL, MySQL, Oracle, SQL query optimization, data modelling, schema design.

DevOps & CI/CD – Jenkins, Git, CI/CD pipelines, code reviews, automated testing, application monitoring.

Observability & Security – Splunk, Dynatrace, CloudWatch, production incident management, security best practices, SDLC.

Data Analytics & Reporting – Python (pandas, NumPy, scikit-learn), Power BI, Tableau, DAX, data warehousing, business intelligence.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Employee Financial Platform – Multi-Tenant Trading & Settlement Microservices (HCL Technologies)

- Designed and deployed **3 interconnected Java Spring Boot microservices** handling employee equity trading, settlement workflows, and regulatory compliance reporting, implemented using **AWS Lambda, EC2, S3** for auto-scaling across **50,000+ daily transactions** with **99.95% availability** and sub-100ms API response latency.
- Architected **production-grade CI/CD pipeline** using **Jenkins, Git, automated testing suites** enabling **50+ deployments per week** to staging and production environments without service interruption, reducing release-to-production cycle time from **5 days to 8 hours**.
- Implemented comprehensive **application resiliency patterns** including circuit breakers, retry logic, and graceful degradation using **Spring Cloud**, reducing cascading failures by **92%** and enabling the platform to withstand database failovers and downstream service outages.
- Built **real-time operational dashboards using Splunk and CloudWatch** tracking settlement success rates, transaction latency, and regulatory audit trail completeness across **8 interconnected systems**, enabling ops teams to detect anomalies within **2 minutes** and reducing mean-time-to-resolution (MTTR) by **35%**.
- Engineered **Python-based data pipelines** using **PostgreSQL, Oracle, and Python (pandas/NumPy)** for nightly reconciliation workflows, validation of **2M+ trades** against regulatory requirements, and generation of compliance reports reducing manual audit effort by **18 hours/week**.

Enterprise Banking Payments Dashboard – SWIFT MT/MX Message Processing & SLA Monitoring (HCL Technologies)

- Delivered production-grade **Java Spring Boot API layer** processing and exposing **ISO 20022 message flows, SEPA payment routing, cross-border settlement** data for a tier-1 banking client, supporting **25,000+ daily payment messages** with **99.9% SLA compliance** and audit trail integrity for regulatory and GDPR requirements.
- Developed **Power BI dashboards and DAX measures** consolidating real-time payment-ops metrics, SWIFT message acknowledgment rates, and exception handling across **5 banking channels**, enabling business stakeholders to monitor compliance, reduce operational risk, and improve customer settlement visibility by **40%**.
- Optimized **SQL queries (PostgreSQL, Oracle) and database schema** for high-throughput transaction lookups, reducing dashboard refresh time from **8 minutes to 90 seconds** and enabling ops teams to respond to payment delays and regulatory exceptions within SLA windows of **2 hours**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
