PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and delivered **full-stack Java Spring Boot microservices** with **React (JavaScript/TypeScript)** frontends across distributed systems, building responsive user experiences and reliable backend REST API integrations while maintaining **application resiliency** and **secure coding practices** (authentication/authorization patterns, input validation) in a large corporate environment; supported **5+ production-grade applications** across banking and ERP domains.
- Executed **system design, development, testing, and operational stability** initiatives using **AWS** (EC2, S3, Lambda, CloudWatch), **Docker containerization**, and **Kubernetes orchestration** to deploy, operate, and troubleshoot cloud-native applications at enterprise scale; achieved **99.5% SLA compliance** through proactive monitoring with **Splunk, Dynatrace**, and observability tooling for logging, metrics, and tracing.
- Developed and maintained **RESTful APIs** and **SQL database queries** (PostgreSQL, MySQL, Oracle) for complex enterprise applications; implemented **microservices-oriented design patterns** and **distributed systems architecture** to support interconnected business systems and ERP integrations; managed **schema changes** and data validation across multiple database platforms in change-controlled environments.
- Automated production workflows and data pipelines using **Python** scripting, **ETL processes**, and scheduled batch reporting; built dashboards and data visualizations using **Power BI** (DAX measures, Power Query, data modelling) to synthesize insights from large, diverse datasets and drive continuous improvement to system architecture and coding hygiene across **5+ enterprise applications**.
- Executed **CI/CD pipeline automation** via **Jenkins** and Git, implemented **Agile/Scrum** ceremonies, and performed rigorous **code reviews** following **Software Development Life Cycle (SDLC)** best practices; led change-control management for configuration updates, UAT coordination, and post-go-live support; demonstrated **DevOps** proficiency across infrastructure and application deployment.
- Identified hidden problems and performance patterns in production systems through proactive analysis; contributed to software engineering communities of practice by mentoring cross-functional teams (BAs, operations, compliance) on secure application development, microservices best practices, and emerging technologies; upheld team culture of diversity, opportunity, inclusion, and respect across banking, payments, and enterprise business domains.

SKILLS

Languages & Frameworks – Java, Spring Boot, Python, JavaScript, TypeScript, React, REST APIs, SQL.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, CI/CD, Git.

Databases & Data Engineering – PostgreSQL, MySQL, Oracle, SQL, data modelling, ETL, data warehousing.

Observability & Monitoring – Splunk, Dynatrace, application logging, metrics, distributed tracing.

Data Analytics & BI – Power BI, DAX, Power Query, Tableau, data visualization, statistical analysis.

Enterprise & Security – Microservices architecture, distributed systems, authentication/authorization, secure coding, SDLC, Agile/Scrum, change management.

EDUCATION AND TRAINING

PROJECTS

Full-Stack HR Technology Platform with Microservices Architecture (HCL Technologies)

- Architected and implemented a distributed **Java Spring Boot microservices platform** with **React (TypeScript)** frontend serving **10,000+ employee users** across multiple business functions; designed system for **99.9% uptime SLA** using **AWS** (EC2 auto-scaling, RDS, Lambda for async jobs) and **Kubernetes orchestration** for stateless service deployment.
- Built **responsive user experiences** with React component design patterns, state management, and accessibility standards; developed **RESTful API backends** with Spring Boot implementing authentication/authorization flows, input validation, and secure coding practices; connected frontend and backend across 12+ microservices via **REST API integrations**.
- Implemented comprehensive **observability** using **Docker** containerization, **Splunk** for centralized logging, **Dynatrace** for distributed tracing, and custom metrics dashboards; reduced mean-time-to-resolution (MTTR) by **45%** through proactive anomaly detection and pattern analysis across application logs.
- Automated **CI/CD pipelines** with **Jenkins** and Git to deploy code changes to production every business day with zero-downtime deployments; implemented **DevOps practices** including Infrastructure-as-Code principles and automated testing within SDLC; reduced deployment lead time from **3 days to 4 hours**.
- Optimized **database performance** by redesigning **SQL queries** and indexing strategies across **PostgreSQL and Oracle** backends; created operational **Power BI dashboards** with DAX measures to track application KPIs, user adoption, and system health; synthesized data insights that drove **25% improvement** in feature usage.

Enterprise Payment Operations Dashboard with ISO 20022 Message Processing (HCL Technologies)

- Led design and deployment of a **Java Spring Boot microservices backend** powering a **SWIFT messaging and payments-operations dashboard** supporting **50+ daily transactions valued at €250M+**; implemented **distributed systems architecture** with **AWS** infrastructure (Lambda functions, CloudWatch) to process and validate **ISO 20022 message flows** in real-time.
- Built **REST API integrations** connecting the dashboard to banking core systems and ERP platforms via **PostgreSQL and Oracle SQL** queries; ensured transaction-flow visibility and operational alerting for payment messages including **SEPA instant payments**, cross-border payments, and tokenization workflows with **99.95% data accuracy**.
- Delivered **operational stability** and **application resiliency** using **Splunk** and **Dynatrace monitoring**; implemented **secure coding practices** including authentication, authorization, and encrypted data handling to maintain GDPR compliance and regulatory audit trails; achieved **zero critical incidents** during **12-month production period**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
