PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and developed **secure, scalable Java Spring Boot microservices** for enterprise applications, architecting **REST APIs** and **system integrations** with **AWS (EC2, S3, Lambda, CloudWatch)** that processed **500K+ daily transactions** while maintaining **99.9% uptime SLA** in production.
- Built and maintained **high-quality application code** across large corporate codebases using **Spring Framework, PostgreSQL, MySQL, and Oracle**, conducting **code reviews** and **debugging** complex enterprise systems; automated **recurring stability issues** via **Python scripting** and **Lambda-based monitoring**, reducing manual incident response by **60%**.
- Architected and analyzed **enterprise application codebases** to enhance functionality, building **new services and APIs** using **Spring Boot** and **Docker containerization**; implemented **CI/CD pipelines** via **Jenkins** with **Git branching strategies** and **application resiliency patterns** achieving **40% faster deployment cycles**.
- Transformed data into **actionable insights** through **Power BI dashboards** and **DAX measures**, creating **data visualization** for executive stakeholders and operational teams; designed **data warehousing and ETL pipelines** using **Python (pandas, NumPy)** and **SQL**, delivering **real-time business intelligence** for **SLA monitoring and incident analytics**.
- Executed **system design, application development, testing, and stability** improvements across **Software Development Life Cycle (SDLC)** phases using **agile methodologies**; fostered **cross-team collaboration** with business analysts, operations, and regulatory teams on **security, compliance, and architecture standards**, ensuring alignment with **enterprise design processes and business requirements**.
- Engaged with **modern programming languages and databases** including **Java, Python, SQL** and cloud-native technologies; demonstrated **strong communication skills** in cross-functional environments, led **UAT coordination** and post-implementation support, and maintained expertise in **DevOps principles, application security, and code stability** practices.

SKILLS

Languages & Core – Java, Spring Boot, Spring Framework, Python, SQL.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, CI/CD (Jenkins), Git.

Databases – PostgreSQL, MySQL, Oracle, data warehousing, ETL.

Data & Intelligence – Power BI, DAX, Tableau, pandas, NumPy, data visualization, data modelling.

Architecture & Methodologies – Microservices design, REST APIs, system architecture, Agile/Scrum, SDLC, application resiliency, security patterns.

Enterprise Tools – Splunk, Dynatrace, Jira, Confluence, Linux, shell scripting.

Domain Expertise – Enterprise application development, large corporate environments, cross-team collaboration, business process analysis.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

PROJECTS

Executive Collaboration Platform – Secure Board Meeting Application (HCL Technologies)

- Designed and developed a **secure, scalable Java Spring Boot application** integrating **Microsoft 365 APIs** for senior bank leadership to prepare and execute board meetings efficiently; architected **microservices-based REST APIs** and **AWS Lambda functions** handling **10K+ concurrent users** with **sub-200ms API latency**.
- Built advanced **data transformation and visualization layers** using **Power BI dashboards with DAX measures** and **Python-based ETL pipelines (pandas, NumPy)** to consolidate meeting agendas, KPIs, and board-level insights from heterogeneous enterprise data sources; reduced data refresh time by **75%**.
- Implemented **enterprise security and compliance standards** across the application, ensuring **GDPR compliance, audit trails, and regulatory alignment**; deployed **Docker containerized services** on **AWS EC2** with **CloudWatch monitoring and automated alerting** achieving **99.95% availability**.
- Established **CI/CD pipelines using Jenkins** with **Git branching strategies** and automated testing frameworks, enabling **daily releases** and improving **code quality metrics by 35%**; conducted **code reviews** and maintained **high-quality codebase standards** across a distributed engineering team.
- Collaborated cross-functionally with **business analysts, security teams, and product managers** to translate complex board-governance requirements into scalable technical designs; documented **system architecture, API specifications, and deployment runbooks** in Confluence for operational excellence.

Real-Time Application Performance Dashboard & Incident Automation (HCL Technologies)

- Engineered a **Power BI-based operational dashboard** with **DAX measures and Power Query ETL** aggregating **Splunk and Dynatrace metrics** across enterprise Java and .NET applications; delivered **real-time SLA monitoring, P1/P2 incident visibility, and performance analytics** to operations teams.
- Developed **Python automation scripts and Lambda-based workflows** to detect and remediate **recurring production stability issues**, reducing manual incident response time by **60%** and enabling **proactive system healing**; integrated **AWS CloudWatch alarms** with **incident ticketing systems** via REST APIs.
- Optimized **SQL queries and database schema design** across **PostgreSQL, MySQL, and Oracle** to accelerate dashboard data refresh cycles from **30 minutes to 5 minutes**; implemented **data warehousing principles and incremental ETL patterns** for improved scalability and cost efficiency.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
