PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **technical support and resolution analysis** for enterprise Java/.NET applications across **Mac OS X, Windows, and Linux** environments using **Splunk, CloudWatch, and Dynatrace** for monitoring and troubleshooting; managed **P1/P2 incident response** and customer escalation workflows, reducing mean-time-to-resolution by **30%** through systematic problem identification and documentation.
- Configured and troubleshoot **Active Directory, Single Sign-On (SSO) environments, LDAP, DNS Servers, and authentication protocols** to support enterprise customer deployments; assisted **20+ customers** with identity access management integration across **on-premises, cloud, and hybrid environments**, ensuring compliance with enterprise security posture requirements.
- Administered and resolved **Firewall, DNS, and AD environment** issues across production systems; provided hands-on technical support for customer installations and deployments using **PowerShell scripting** and **Linux Shell** commands for automation and system troubleshooting, improving customer onboarding timelines by **40%**.
- Communicated complex technical issues and solutions to cross-functional teams including engineering, QA, sales, and support; created detailed support case documentation and escalation reports using **Jira and Confluence**, tracking **100+ monthly cases** to ensure timely resolution and product quality feedback incorporation.
- Demonstrated expertise in **Privileged Access Management (PAM)** and identity access management solutions through customer advisory and deployment support; represented customer interests to engineering teams for product enhancement roadmap prioritization and regulatory compliance alignment.
- Developed **Python automation scripts** for recurring customer support tasks including log analysis, system diagnostics, and ticket management; built operational dashboards and monitoring reports to track customer health metrics and support SLA adherence across **15+ concurrent accounts**.

SKILLS

Systems Administration & Infrastructure – Mac OS X administration, Windows administration, Linux administration and troubleshooting, Active Directory configuration, Single Sign-On (SSO), LDAP, DNS Servers, authentication protocols, Firewall administration, on-premises/cloud/hybrid environments.

Scripting & Automation – PowerShell, Linux Shell, Python scripting, bash, cron jobs, log analysis, system diagnostics automation.

Technical Support & Customer Service – Technical support delivery, resolution analysis, customer escalation management, incident response, problem identification and documentation, installation and deployment support, customer communication.

Identity & Access Management – Privileged Access Management (PAM), identity access management troubleshooting, authentication protocols, LDAP configuration, Active Directory environments, Single Sign-On (SSO) support.

Monitoring, Logging & Observability – Splunk, CloudWatch, Dynatrace, operational dashboards, customer health monitoring, SLA tracking, incident management.

Enterprise Systems & Tools – Jira, Confluence, Git, CI/CD pipelines, Jenkins, change-control management, cross-functional collaboration.

Education – MSc Data Analytics (National College of Ireland, Dublin), Bachelor of Engineering in Computer Science (SNS College of Technology, Coimbatore), IELTS Academic Band 7/9.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Enterprise Identity Access Management & PAM Deployment Platform (HCL Technologies)

- Architected and deployed an **identity access management and Privileged Access Management (PAM) integration platform** supporting customer deployments across **on-premises, cloud, and hybrid environments**; designed end-to-end customer onboarding workflows including **Active Directory configuration, Single Sign-On (SSO) setup, LDAP synchronization, and authentication protocol** validation.
- Built comprehensive **troubleshooting runbooks and customer support documentation** using **Confluence** covering **Firewall, DNS, AD environment, and authentication protocol** issues; reduced support ticket resolution time by **45%** through self-service resources and escalation decision trees.
- Developed **Python-based diagnostic and remediation scripts** for automated **Active Directory, LDAP, and DNS** troubleshooting; enabled support engineers to resolve **80% of routine customer configuration issues** without engineering escalation, improving customer satisfaction scores by **35 NPS points**.
- Implemented **Splunk and CloudWatch dashboards** for real-time customer environment health monitoring across identity services; tracked **PAM deployment health, authentication success rates, and system availability** metrics, enabling proactive issue identification and **99.7% uptime** SLA achievement.
- Coordinated customer technical advisory and **PAM solution deployment support** across **25+ enterprise accounts**; managed escalations to engineering and QA teams through structured **Jira-based case tracking** and provided post-deployment validation ensuring regulatory compliance and security posture requirements were met.

Multi-Environment Systems Support Automation & Customer Incident Response Framework (HCL Technologies)

- Engineered **PowerShell and Linux Shell automation scripts** for recurring customer support diagnostics across **Mac OS X, Windows, and Linux** platforms; automated **log analysis, system configuration validation, and firewall rule verification** tasks, reducing manual troubleshooting effort by **50%**.
- Established customer incident response and escalation workflows supporting **P1/P2 incident management** and **Single Sign-On (SSO) environment troubleshooting**; documented **20+ critical PAM and authentication protocol issues** for engineering team product roadmap prioritization, delivering **3 product improvements** in subsequent releases.
- Built operational **Jira and Confluence-based case management framework** tracking **100+ monthly customer support cases** with prioritization, assignment, and resolution tracking; implemented SLA monitoring dashboards reducing average case resolution time from **72 hours to 42 hours**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)

- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
