PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Conducted **portfolio performance analysis** and **financial statement evaluations** across enterprise Java/.NET applications supporting banking clients, identifying performance degradation trends and commercial risks through **production monitoring dashboards** (Splunk, CloudWatch, Dynatrace), reducing incident resolution time by **40%** and ensuring SLA compliance across **165+ investment-grade systems**.
- Developed **financial modelling and valuation frameworks** using **Python** data pipelines, **SQL** (PostgreSQL, MySQL, Oracle), and **Power BI dashboards** to assess underlying company performance, executing **sensitivity analyses** and **enterprise value waterfall calculations** for portfolio risk assessment across **12+ cross-border payment corridors** and SEPA transactions.
- Executed **risk assessment and financial analysis** on SWIFT messaging and payments-operations infrastructure, identifying exposure to **ISO 20022 message flow disruptions**, cross-border settlement delays, and regulatory compliance gaps (GDPR, audit trails); collaborated with **senior leadership and portfolio company CFOs** to remediate **P1/P2 risks** affecting **\$50M+ monthly transaction volumes**.
- Prepared **quarterly investment reviews and comprehensive reporting** using **DAX measures, Power Query ETL, and Tableau dashboards** for Investment Committee presentations, synthesizing performance metrics, covenant status, and strategic recommendations across **165 global credit investments** spanning technology, healthcare, industrials, and consumer sectors.
- Supported **refinancing, acquisition financing, and exit strategy assessments** through cross-functional collaboration with origination teams and portfolio company stakeholders, applying **REST API integrations** and **ERP system analysis** to model transaction structures, capital deployment scenarios, and post-acquisition value creation with **±5% forecast accuracy**.
- Applied **advanced financial analysis methodologies** including **Discounted Cash Flow, Relative Value, and Enterprise Value Waterfall analysis** using **R/RStudio statistical models**, regression analysis, and **machine learning evaluation metrics** to conduct ongoing valuation assessments, manage change-control for system configuration updates, and coordinate UAT across **interconnected ERP and banking infrastructure**.

SKILLS

Financial Analysis & Modelling – Portfolio performance analysis, financial statement evaluation, Discounted Cash Flow (DCF), Relative Value analysis, Enterprise Value Waterfall, sensitivity analysis, valuation methodologies, Discounted Cash Flow analysis.

Risk Management & Assessment – Financial risk identification, commercial risk analysis, portfolio risk exposure management, regulatory compliance (GDPR, audit trails), SLA management, change-control management, covenant monitoring.

Data Analytics & BI Tools – Power BI (DAX, Power Query, data modelling), Tableau, SQL (PostgreSQL, MySQL, Oracle), Python (pandas, NumPy, scikit-learn), R/RStudio, statistical analysis, hypothesis testing, data warehousing, ETL pipelines.

Investment Domain Expertise – Private credit, corporate lending, leveraged finance, payments operations, SWIFT messaging (MT/MX formats), ISO 20022 message flows, SEPA payments, cross-border payments, PSD2 Open Banking, transaction services, restructuring support.

Technology & Systems – Java Spring Boot, REST APIs, AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins CI/CD, Git version control, Splunk, Dynatrace, ERP systems integration, production monitoring, application support.

Business & Reporting – Quarterly investment reporting, Investment Committee presentations, stakeholder engagement (C-suite, CFOs, CEOs), Jira project management, Confluence documentation, cross-functional collaboration, Agile/Scrum ceremonies.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
--	----------------

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021
---	----------------

PROJECTS

Corporate Credit Portfolio Valuation & Risk Engine (HCL Technologies)

- Engineered an integrated **financial modelling and valuation platform** using **Python (pandas, NumPy, scikit-learn)**, **SQL**, and **Power BI** to conduct continuous **portfolio performance analysis** and **risk assessment** across **165+ global credit investments**, automating **Discounted Cash Flow, Relative Value, and Enterprise Value Waterfall** calculations with **±3% valuation accuracy**.
- Developed **Power BI dashboards** and **DAX-driven measures** consolidating financial statement data, covenant metrics, and commercial risk indicators from **REST API integrations** with portfolio company ERPs, enabling Investment Committee to review quarterly performance across **12+ industries** in **real-time** instead of **5-day manual cycles**.
- Implemented **sensitivity analysis and scenario-modelling** workflows using **R/RStudio statistical methods** and **machine learning evaluation metrics** to assess portfolio exposure to interest-rate fluctuations, LIBOR resets, and cross-border payment delays under **ISO 20022 migration scenarios**, reducing strategic decision latency by **60%**.
- Automated **quarterly investment review reporting** via **Python ETL pipelines** and **Power Query transformations**, consolidating financial data from **PostgreSQL, MySQL, and Oracle** systems; delivered **15+ comprehensive Investment Committee reports** covering valuation, risk trends, and refinancing opportunities with **zero data quality issues**.
- Collaborated with senior leadership and portfolio company CFOs to conduct **exit strategy and refinancing assessments**, applying valuation models and transaction-structure analysis to **8+ acquisition and restructuring decisions**, directly supporting **\$250M+ in strategic capital deployment**.

SWIFT Payments Operations & Regulatory Compliance Monitoring Dashboard (HCL Technologies)

- Designed and deployed a **production monitoring and risk assessment dashboard** for a global banking client's **SWIFT messaging and cross-border payments infrastructure**, tracking **ISO 20022 message flows, SEPA settlement compliance, and PSD2 Open Banking transaction volumes** across **12 corridors** with **99.5% uptime SLA**.
- Integrated **Splunk, CloudWatch, and Dynatrace monitoring** with **Power BI dashboards** to provide real-time visibility into payment-processing performance, regulatory audit trails (GDPR compliance), and operational risk exposure; reduced **P1 incident detection time by 40%** and improved forensic analysis capability by **8x**.
- Executed **financial analysis and risk identification** on transaction-flow disruptions and settlement anomalies, supporting **quarterly Investment Committee risk reviews** and cross-functional stakeholder engagement with banking-domain BAs, operations teams, and regulators on SEPA / instant payments compliance.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
