PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Triaged, diagnosed, and resolved **enterprise production incidents** across Java/Spring Boot and .NET applications in **SLA-critical environments**, achieving **96%+ first-response resolution** rate by analyzing **server logs, error traces, and system configurations** using **Splunk, CloudWatch, and Dynatrace** dashboards; managed **P1/P2 incident escalation** and **customer communication** throughout troubleshooting cycles.
- Debugged complex infrastructure and application issues on **Linux servers** via **SSH terminal access**, reading **application logs, system configs, and stack traces** to isolate root causes; resolved **Nginx configuration errors, DNS misconfigurations, and service dependency failures** affecting uptime; documented findings in **runbooks and knowledge base** to prevent repeat tickets and enable team self-service.
- Managed **technical support ticket workflow** in issue-tracking systems with **SLA compliance**, prioritizing severity, complexity, and customer impact; maintained **100% SLA adherence** across **support queue** while resolving **80%+ of tickets within first response** through clear diagnosis, detailed explanation, and actionable remediation steps.
- Identified recurring technical patterns and **product gaps** from support interactions; documented **bugs with reproduction steps** and feature requests with business context for engineering teams; contributed **saved replies, configuration guides, and troubleshooting templates** to knowledge base, reducing average resolution time by **35%** and improving team efficiency.
- Supported developers integrating with **cloud infrastructure services** including **AWS EC2, S3, Lambda, and CloudWatch**; assisted with **Docker containerization, CI/CD pipeline configuration via Jenkins and Git**, and **deployment troubleshooting**; provided architectural guidance on **REST API integrations and system interconnections** across heterogeneous technology stacks.
- Partnered with business stakeholders, product teams, and cross-functional operations staff to **triage complex technical requests, coordinate UAT activities, and validate post-implementation behavior**; communicated technical solutions in developer-friendly and business-context language; adapted support approach across **multiple communication channels and evolving customer engagement methods**.

SKILLS

Technical Support & Debugging – Linux server troubleshooting, SSH terminal access, application log analysis, error trace diagnosis, configuration debugging, Nginx & DNS configuration, production incident triage, SLA management, ticket prioritization, first-response resolution.

Monitoring & Observability – Splunk, CloudWatch, Dynatrace, application performance dashboards, real-time alerting, log aggregation, system health monitoring, operational metrics tracking.

Cloud Infrastructure & DevOps – AWS EC2, S3, Lambda, CloudWatch, Docker containerization, Jenkins CI/CD pipelines, Git version control, deployment troubleshooting, infrastructure-as-code concepts.

Backend Development & APIs – Java Spring Boot, REST API development, debugging, Python scripting, service integrations, system interconnections, microservice communication.

Database & Data Management – SQL query optimization, PostgreSQL, MySQL, Oracle, schema analysis, data validation, ad-hoc query execution.

Knowledge Management & Documentation – Runbook creation, knowledge base curation, saved reply development, troubleshooting guides, technical documentation, user onboarding materials.

Professional & Soft Skills – Developer empathy, technical problem-solving mindset, clear communication under pressure, pattern recognition, stakeholder collaboration, Agile/Scrum methodologies.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Laravel Application Support & Troubleshooting Platform (HCL Technologies)

- Designed and deployed a **centralized technical support workflow** for managing Laravel ecosystem product issues across **Forge, Vapor, Spark, Envoyer, Nova, Laravel Cloud, and Nightwatch** platforms; implemented **ticket triage automation, SLA tracking, and severity-based routing** using **Plain ticketing system integration** with Jenkins and CloudWatch dashboards, achieving **96% customer satisfaction rating** and **100% SLA compliance**.
- Built **interactive debugging dashboard** using **Splunk and CloudWatch** to surface real-time **server health, PHP error stacks, Nginx configuration anomalies, and DNS resolution issues** across distributed Laravel deployments; enabled support engineers to **identify root causes in <5 minutes average** and resolve **80%+ of tickets in first response** versus prior **45% first-response rate**.
- Created comprehensive **knowledge base and saved-reply library** documenting **common Laravel configuration patterns, deployment troubleshooting workflows, and API integration diagnostics**; organized runbooks by product area (Vapor containerization, Forge server setup, Nova admin panels, Cloud infrastructure); reduced **average ticket resolution time by 40%** and enabled junior support staff to resolve complex issues independently.
- Established **bug reporting and feature request workflow** with engineering team; documented **reproduction steps, customer impact, and technical root causes** in **issue tracker**; tracked **15+ high-priority bugs** from support queue to resolution; contributed insights that shaped **3 product releases** and prevented **repeat support tickets by 60%**.
- Developed **developer-friendly support communication templates** and **escalation playbooks** for handling complex technical issues requiring **SSH server access, deep log analysis, and architectural consulting**; trained team on **Linux terminal diagnostics, infrastructure debugging, and empathetic customer interaction** under SLA pressure; improved **team satisfaction scores by 28%**.

SWIFT Payments Operations Support Dashboard & SLA Monitoring (HCL Technologies)

- Delivered production support and real-time monitoring for **SWIFT messaging and payments-operations dashboard** supporting banking client; tracked **ISO 20022 message flows, SEPA cross-border transactions, and PSD2-compliant payment processing** with **transaction-flow visibility, operational alerting, and regulatory audit trails** via **Splunk and CloudWatch**; maintained **99.95% uptime SLA** and **sub-5-minute incident response time**.
- Triaged and resolved **critical payment messaging failures, transaction reconciliation errors, and tokenization processing issues** affecting financial operations; analyzed **SWIFT MT/MX message formats, payment instruction flows, and database-level data inconsistencies** in **PostgreSQL and Oracle**; coordinated with banking-domain **business analysts and operations teams** to validate root causes and implement preventive controls.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
