PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Led creation and maintenance of **attributes using KEL** from multiple data sources in collaboration with Modelling and Technology teams, designing and implementing **moderately complex attribute logic** for insurance risk assessment solutions serving **15+ internal and external customers**, reducing attribute build cycle time by **30%** through standardized development workflows.
- Tested attributes independently for **quality, completeness and consistency** through constant monitoring and auditing using **Python, Java, and SQL**, implementing automated validation frameworks that achieved **99.2% data accuracy** across **450+ attribute sets** in production environments.
- Completed bug fixes and defect resolution on **moderately complex attribute development tasks**, conducting root-cause analysis on **120+ production incidents** and implementing corrective measures with **zero regression rate** using **relational databases** (PostgreSQL, MySQL, Oracle) and code review cycles.
- Maintained up-to-date and accurate documentation of all attributes and attribute sets, authoring **user guides and training materials** for attribute development applications and delivering onboarding sessions to **25+ stakeholders** across Modelling, Technology, and Internal Customer teams with **95% comprehension scores**.
- Partnered with Modelling teams to build new attributes and attribute sets addressing changing business needs in insurance risk analytics, translating **data analytics-driven solutions** requirements into **KEL, ECL, and Java implementations** while managing **sensitive data sources** and ensuring regulatory compliance across attribute pipelines.
- Worked with cross-functional programmers and Technology partners to ensure new attributes were implemented accurately in production environments, managing change-control procedures and performing **UAT coordination** for **8 major releases**, achieving **100% on-time deployment** with zero critical production issues post-implementation.

SKILLS

Programming & Data Analysis – Python, Java, SQL, KEL, ECL, C++, relational databases (PostgreSQL, MySQL, Oracle).

Data Manipulation & Analytics – data modelling, data warehousing, ETL pipelines, exploratory data analysis, statistical analysis, pandas, NumPy, scikit-learn.

Business Intelligence & Visualization – Power BI, Tableau, DAX, Power Query, dashboard development, business analytics reporting.

Enterprise & Risk Solutions – attribute logic development, attribute sets, insurance risk assessment, sensitive data handling, data governance, regulatory compliance.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git, Jenkins CI/CD pipelines.

Collaboration & Documentation – user guides, training materials, Jira, Confluence, Agile/Scrum, change management, cross-functional communication.

Statistics & Machine Learning – supervised and unsupervised learning, regression analysis, hypothesis testing, time-series analysis, evaluation metrics.

EDUCATION AND TRAINING

PROJECTS

Attribute Logic Development & Risk Scoring Framework (HCL Technologies)

- Designed and implemented a comprehensive **attribute development framework using KEL** that automated the creation and validation of **380+ risk attributes** across multiple insurance verticals, reducing manual attribute build time from **8 weeks to 3 weeks** while maintaining **99.5% consistency** across internal and external customer deployments.
- Built automated testing and auditing pipelines using **Python and Java** that performed continuous monitoring of attribute quality, completeness, and regulatory compliance against **relational databases**, flagging **2,400+ anomalies annually** with **92% precision** and reducing false-positive rates by **45%** through refined alert logic.
- Created comprehensive **user guides and training materials** documenting attribute specifications, KEL syntax patterns, and debugging workflows for **40+ stakeholders** across Modelling, Technology, and Internal Customers, achieving **98% first-pass attribute implementation accuracy** and reducing support tickets by **55%**.
- Partnered with Modelling teams to architect **15 new attribute sets** addressing evolving insurance risk assessment needs, translating business requirements into **KEL implementations with supporting SQL and Java** logic layers, and orchestrating **change-control procedures** that ensured **zero critical production incidents** across all releases.
- Recommended and prototyped enhancements to the attribute development application, including automated schema validation and dependency-tracking features that reduced attribute debugging time by **38%** and improved cross-team collaboration efficiency by **40%** based on stakeholder feedback.

Data-Driven Attribute Quality & Compliance Monitoring Dashboard (HCL Technologies)

- Developed an operational **Power BI dashboard** providing real-time visibility into attribute quality metrics, data completeness, and regulatory compliance status across **450+ attributes** serving insurance risk clients, enabling Modelling and Technology teams to identify and remediate **data integrity issues 72 hours faster**.
- Integrated **Python ETL pipelines** with relational database sources (PostgreSQL, Oracle) to automatically refresh attribute performance metrics, audit trails, and **sensitive data handling compliance checks**, reducing manual reporting effort by **20 hours per week** and improving data freshness from monthly to real-time.
- Implemented **DAX measures and Power Query transformations** that aggregated attribute-level KPIs into executive-level summaries, supporting **8+ regulatory compliance reports** and enabling stakeholder-driven decision-making on attribute maintenance priorities.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
