PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Collaborated with engineers, construction managers, and cross-functional consultants to develop comprehensive project plans, scope-of-works (SoW), task information deliverables lists (TIDP), and responsibility matrices (RACI) using **change-control management** and **Jira/Confluence** workflows, ensuring **100% on-time delivery** of design packages and construction schedules across interconnected systems.
- Oversaw design compliance and constructability review processes by assessing technical risk, evaluating design proposals for suitability, and coordinating **CSA technical compliance** across disciplines (Electrical, Mechanical, structural) using **REST API integrations** and cross-system data validation to identify **15+ design risks** before construction phase.
- Managed design delivery schedules and information control flows (RFIs, ACC standards) by developing **Power BI dashboards** and **data modelling** workflows to track design approval status, resource allocation, and procurement timelines across **8+ concurrent projects**, reducing schedule slippage by **22%**.
- Conducted site visits, quality inspections, and progress reporting using **Linux**-based logging and **SQL** data validation to verify adherence to design specifications, material compliance with QEHS standards, and budget alignment; prepared comprehensive handover packs with **technical documentation** for construction teams.
- Assisted with new tender deliverables and pre-construction services agreements (PCSA) by coordinating design requirements gathering with clients, consultants, and quantity surveyors; applied **value engineering (VE)** analysis and **off-site manufacturing (OSM)** proposals to deliver **8–12% cost optimization** per project package.
- Liaised with clients, insurance companies, vendors, and 3rd-party stakeholders by maintaining accurate records of design changes, issues, and escalations using **Git-based version control** and **Confluence documentation**; proactively contributed to design optimization meetings and raised construction-related risks to planning and management teams in real-time.

SKILLS

Project Management & Planning – comprehensive project planning, scope-of-works (SoW), TIDP, RACI matrices, design delivery schedules, information control flows (RFI, ACC standards), design approval management, procurement oversight.

Technical Engineering & Compliance – CSA technical compliance, constructability review, design risk assessment, material compliance, QEHS standards, value engineering (VE), off-site manufacturing (OSM), cross-discipline coordination (Electrical, Mechanical).

Engineering Tools & Systems – Jira, Confluence, Git, change-control management, REST API integrations, cross-system data flows, SQL (PostgreSQL, MySQL, Oracle), technical documentation.

Data & Analytics – Power BI dashboards, data modelling, SQL queries, progress reporting, schedule tracking, resource allocation analysis, site data validation.

Software Engineering & Automation – Python scripting, Java Spring Boot, AWS (EC2, S3, Lambda), Docker, Linux, CI/CD (Jenkins), production support, system integrations.

Stakeholder Management & Communication – client liaison, vendor coordination, cross-functional team collaboration, UAT support, escalation procedures, business requirements gathering, design optimization input.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Data Centre CSA Design Coordination & Constructability Platform (HCL Technologies)

- Led comprehensive design coordination across **6 concurrent hyperscale data-centre projects** by developing integrated **Power BI dashboards** for design package approvals, consultant resource tracking, and procurement timelines; reduced design-to-procurement cycle time by **31%** through real-time visibility and automated escalation workflows.
- Designed and implemented **RACI matrices and responsibility workflows** across CSA, Electrical, Mechanical, and structural disciplines using **Jira automation** and **Confluence documentation** standards; coordinated **140+ design reviews** and eliminated cross-discipline interface conflicts, improving first-pass approval rate to **94%**.
- Conducted constructability and technical-risk assessments on **180+ design proposals** using structured review frameworks; identified material compliance gaps, QEHS standard violations, and OSM opportunities, delivering **€2.8M in value engineering** savings through off-site manufacturing recommendations and design optimization.
- Managed site-visit reporting and quality verification workflows by integrating **SQL-based data validation** against design specifications and budget baselines; prepared comprehensive handover packs with construction drawings, material schedules, and compliance checklists for **8 project packages**, enabling seamless transition to construction teams.
- Assisted with **4 major PCSA (pre-construction services agreement) tenders** by consolidating design requirements, cost estimates, and resource plans from consultants, quantity surveyors, and clients; delivered design delivery schedules that aligned consultant capacity to construction/procurement needs, increasing bid win rate by **18%**.

SWIFT Payments Operations & Regulatory Compliance Dashboard (HCL Technologies)

- Developed and maintained a **production SWIFT messaging dashboard** supporting **8M+ monthly payment transactions** across **ISO 20022 and SWIFT MT/MX message flows** for a Tier-1 banking client; implemented **real-time transaction-flow visibility** and operational alerting using **Splunk and CloudWatch**, achieving **99.8% SLA uptime**.
- Ensured **GDPR, Data Protection, and regulatory compliance** across payment message processing by designing audit trails, access controls, and reconciliation workflows in **PostgreSQL and Oracle**; coordinated UAT and post-implementation triage with banking-domain business analysts and compliance teams.
- Applied domain expertise in **SEPA/instant payments, cross-border payments, PSD2 Open Banking, and tokenization** to troubleshoot **P1/P2 incidents** and optimize payment reconciliation processes; reduced incident resolution time by **27%** through proactive monitoring and Python-based automation scripts for transaction validation.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
