PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **identity and access management (IAM)** systems using **Java Spring Boot** and **REST APIs** across enterprise environments at HCL, implementing **OAuth 2.0 / OpenID Connect** authentication flows and **token management** protocols that secured access for 500+ concurrent users with **99.9% uptime SLA**.
- Built **identity governance dashboards** and **audit logging pipelines** using **Python, SQL (PostgreSQL, Oracle, MySQL)**, and **Apache Kafka** event streams to track user provisioning, access rights changes, and compliance violations in real-time, reducing identity audit cycle time by **40%**.
- Engineered **API-driven identity federation** and **directory synchronization** integrations between **Azure Active Directory** and legacy ERP / enterprise systems using **Spring Boot microservices** and **Docker containerization**, enabling **seamless single sign-on (SSO)** for **2,000+ enterprise users** across banking and financial-services clients.
- Implemented **role-based access control (RBAC)** and **attribute-based access control (ABAC)** policy engines using **Java** and **PostgreSQL** to enforce identity-driven authorization, supporting **ISO 20022 / SEPA / PSD2 compliance** requirements in payments-operations systems and reducing unauthorized access incidents by **95%**.
- Developed **identity threat detection** and **anomalous login alerting** using **Python, Splunk**, and **CloudWatch** monitoring to flag suspicious authentication patterns, supporting **GDPR / Data Protection compliance** and post-incident response with **P1 SLA enforcement** across production identity services.
- Managed end-to-end **identity platform CI/CD** pipelines using **Jenkins, Git**, and **AWS (EC2, Lambda, S3)** to automate identity provisioning workflows, schema migrations, and credential rotation; coordinated **UAT** and **change-control** processes with cross-functional teams, reducing deployment lead time by **50%**.

SKILLS

Identity & Access Management – OAuth 2.0, OpenID Connect, SAML, token management, single sign-on (SSO), role-based access control (RBAC), attribute-based access control (ABAC), identity federation, directory synchronization, Azure Active Directory.

Backend Development – Java Spring Boot, REST APIs, microservices architecture, Python, FastAPI, Flask, API-driven integrations.

Data & Databases – SQL (PostgreSQL, MySQL, Oracle), data modelling, schema design, ad-hoc queries, data validation.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, containerization, Linux, shell scripting.

Monitoring & Compliance – Splunk, Dynatrace, CloudWatch, audit logging, identity threat detection, GDPR, Data Protection, ISO 20022, SEPA, PSD2 compliance.

DevOps & CI/CD – Jenkins pipelines, Git, code review, Jira, change-control management, UAT coordination, Agile/Scrum.

Streaming & Event Processing – Apache Kafka, event pipelines, real-time data processing, log aggregation.

EDUCATION AND TRAINING

PROJECTS

Enterprise Identity Governance & Compliance Platform (HCL Technologies)

- Architected a **zero-trust identity platform** using **Java Spring Boot** microservices, **OAuth 2.0 / OpenID Connect**, and **Apache Kafka** event streaming to centralize user provisioning, authentication, and authorization across **3 multinational banking clients** with **15,000+ enterprise users**.
- Implemented **real-time identity audit logging** and **compliance reporting** using **Python ETL pipelines**, **PostgreSQL data warehousing**, and **Power BI dashboards** to track access changes, role assignments, and policy violations; delivered **automated monthly compliance reports** reducing manual audit effort by **65%**.
- Engineered **API-driven RBAC / ABAC policy engines** in **Java Spring Boot** to enforce **GDPR, ISO 20022, SEPA, and PSD2 compliance** rules across payments and ERP systems; enabled business stakeholders to define identity policies without code, reducing policy deployment cycle from **4 weeks to 3 days**.
- Built **identity threat detection** and **anomalous login alerting** using **Python scikit-learn** machine learning models integrated with **Splunk** and **CloudWatch**, flagging **98% of suspicious authentication attempts** within **2 seconds** of occurrence; reduced security incidents by **78%**.
- Containerized and deployed identity services using **Docker** and **AWS EC2 / Lambda** with **Jenkins CI/CD pipelines**, enabling **zero-downtime deployments** and credential rotation every **30 days**; coordinated **UAT, change-control, and stakeholder sign-off**, achieving **99.95% uptime SLA** across all identity workflows.

SWIFT/ISO 20022 Payments Identity & Authorization Monitoring Dashboard (HCL Technologies)

- Designed and deployed a **real-time identity access audit dashboard** for a tier-1 banking client's **SWIFT MT/MX messaging** platform, tracking **user provisioning, token expiration, and authorization policy enforcement** across **50+ payment operations staff** using **Spring Boot REST APIs** and **PostgreSQL**.
- Integrated **Splunk log aggregation** and **Dynatrace APM** to monitor identity service performance and detect unauthorized API calls; implemented **GDPR-compliant audit trails** capturing **100% of identity events** with immutable records for regulatory inspection; reduced **P1 identity incidents** by **82%**.
- Delivered **Power BI dashboards** for compliance and operations teams visualizing **SEPA / ISO 20022 access patterns**, user role distributions, and failed authentication trends; enabled proactive identity governance, reducing audit remediation time by **55%** and supporting **PSD2 and Data Protection regulatory reviews**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
