PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and developed **distributed system components** using **Java Spring Boot** and **REST APIs** to support enterprise payment messaging workflows; implemented **microservices architecture** patterns for SWIFT MT/MX message processing, reducing transaction latency by **18%** and improving system throughput to **50K+ messages/day**.
- Built **production monitoring and observability infrastructure** leveraging **Splunk, Dynatrace, and CloudWatch** to track system health, SLA compliance, and incident escalation across distributed services; implemented **automated alerting and runbook automation** that reduced mean time to resolution (MTTR) by **35%** for P1/P2 incidents.
- Engineered **data pipeline and ETL automation** using **Python, Apache Airflow, and SQL** for real-time transaction reconciliation, ISO 20022 message validation, and cross-system data synchronization across **PostgreSQL, Oracle, and AWS RDS**; processed **2M+ daily records** with **99.5% accuracy**.
- Deployed and managed cloud infrastructure on **AWS** (EC2, S3, Lambda, RDS) and containerized applications using **Docker**; orchestrated **CI/CD pipelines with Jenkins and Git** to automate builds, testing, and deployments; reduced deployment cycle time by **40%** through pipeline optimization.
- Drove system reliability and change management across interconnected enterprise systems including ERP platforms and payment operations dashboards; coordinated **UAT, schema migrations, and post-go-live support** with cross-functional teams (BAs, operations, compliance); ensured **100% regulatory compliance** with GDPR, SEPA, and ISO 20022 message flow standards.
- Analyzed system performance and operational metrics using **Power BI and Tableau** to create executive dashboards and SLA reporting; developed **DAX measures and Power Query ETL workflows** for real-time KPI visualization across payment processing, incident management, and resource utilization; delivered **15+ interactive reports** to stakeholder teams.

SKILLS

Languages & Runtimes – Java, Python, SQL, Bash/Shell, R.

Backend & Distributed Systems – Spring Boot, REST APIs, microservices architecture, API design patterns, asynchronous messaging.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, RDS, CloudWatch), Docker, containerization, infrastructure automation.

CI/CD & DevOps – Jenkins, Git, GitFlow branching, automated testing, deployment pipelines, change management.

Data Engineering & Analytics – ETL/data pipelines, Apache Airflow, pandas, NumPy, scikit-learn, Power BI, Tableau, DAX, Power Query, data modelling, data warehousing.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch, SLA management, incident response, alerting.

Databases – PostgreSQL, MySQL, Oracle, SQL query optimization, schema design, data validation.

Domain Expertise – SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA payments, cross-border payments, PSD2, payment processing workflows, ERP systems integration, GDPR compliance, financial services operations.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Distributed Payment Messaging Platform with Real-Time Monitoring & ISO 20022 Compliance (HCL Technologies)

- Architected a **cloud-native distributed system** to process, validate, and route **SWIFT MT/MX and ISO 20022 messages** in real-time; deployed microservices on **AWS using Docker containers orchestrated across EC2 instances** with **auto-scaling policies** to handle traffic spikes; system processed **100K+ daily transactions** with **99.95% uptime SLA**.
- Implemented end-to-end **observability stack** combining **Splunk for log aggregation, Dynatrace for distributed tracing, and CloudWatch for infrastructure metrics**; created automated incident response workflows that triggered **Jenkins deployment rollbacks and Lambda-based remediation functions** within **2 minutes of failure detection**, reducing MTTR by **42%**.
- Built **ETL data pipelines using Apache Airflow and Python** to ingest, normalize, and validate **ISO 20022 message structures, SEPA reconciliation data, and cross-border payment metadata** across **PostgreSQL and Oracle databases**; implemented **automated data quality checks** that flagged **regulatory compliance violations** with **98% precision**.
- Developed **real-time KPI dashboards in Power BI and Tableau** tracking payment throughput, message validation success rates, SLA compliance, and incident metrics; built **DAX measures for transaction latency percentiles and cross-border settlement timing**; delivered **12 interactive reports** to treasury and compliance teams, reducing manual reporting overhead by **25 hours/week**.
- Orchestrated **CI/CD automation with Jenkins pipelines and Git GitFlow branching** to deploy microservices updates with **zero-downtime rolling deployments**; integrated **automated integration and API contract testing** to validate SWIFT/ISO 20022 message compatibility across system boundaries; reduced deployment cycle time from **4 hours to 35 minutes**.

Enterprise ERP Integration & Change-Management Platform (HCL Technologies)

- Led integration of **enterprise ERP systems with payment operations dashboards and banking core platforms** using **Spring Boot REST APIs and SQL-based data synchronization** across interconnected PostgreSQL, Oracle, and MySQL databases; coordinated **UAT testing, schema migrations, and post-go-live support** ensuring **zero transaction data loss and 100% GDPR compliance**.
- Automated **change-management workflows and deployment control gates** using **Jenkins, Git, and custom Python automation scripts**; implemented approval workflows tied to compliance and audit requirements, reducing manual change approval turnaround from **2 days to 4 hours** while maintaining regulatory audit trails.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
