PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Engineered and maintained **Java Spring Boot** microservices and **REST APIs** supporting high-throughput enterprise applications; implemented **feature development, bug fixes, and API enhancements** across distributed systems, reducing production defects by **18%** through rigorous **code reviews** and **Git** branching workflows.
- Designed and optimized **Python data pipelines, ETL workflows, and scheduled reporting jobs** for financial operations; built automation scripts for data validation and schema migrations across **PostgreSQL, MySQL, and Oracle** databases, improving data processing velocity by **32%** and eliminating manual reconciliation overhead.
- Delivered production support and real-time incident management for mission-critical banking applications using **Splunk, CloudWatch, and Dynatrace** monitoring; resolved **P1/P2 incidents** within **SLA commitments**, achieving **99.8% application uptime** through proactive alerting and root-cause analysis.
- Architected and deployed cloud-native applications on **AWS (EC2, S3, Lambda, CloudWatch)** with **Docker containerization** and **Jenkins CI/CD pipelines**; orchestrated infrastructure-as-code deployments reducing deployment time by **45%** and enabling **automated testing and continuous integration** across development, staging, and production environments.
- Collaborated with cross-functional banking operations teams and business analysts to gather requirements, coordinate **UAT**, and drive post-implementation triage for **SWIFT messaging systems, ISO 20022 message flows, SEPA payments, and cross-border payment operations**; ensured compliance with **regulatory standards and audit trails** across interconnected enterprise systems.
- Supported **ERP integrations and enterprise business systems** through **change-control management, system configuration updates, and REST API-based cross-system data flows**; partnered with business stakeholders to manage **UAT coordination and post-go-live support**, reducing system integration defects by **28%** and accelerating time-to-value for operational platforms.

SKILLS

Backend & API Development – Java Spring Boot, REST APIs, microservices architecture, API design and optimization.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, containerization, CI/CD pipelines, Jenkins, Git.

Data Engineering & Databases – Python, SQL (PostgreSQL, MySQL, Oracle), ETL workflows, data pipelines, schema design, data validation.

Monitoring & Reliability – Splunk, Dynatrace, CloudWatch, SLA management, incident response, production support, alerting.

Enterprise & Fintech Domain – SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA payments, cross-border payments, PSD2, Open Banking, regulatory compliance, GDPR, ERP systems, change-control management.

Agile & Collaboration – Jira, Confluence, Scrum ceremonies, UAT coordination, cross-functional requirements gathering, code review.

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, data modelling, statistical analysis, R, pandas, NumPy, scikit-learn.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Real-Time Payment Operations Dashboard & Event Processing Platform (HCL Technologies)

- Designed and built a **high-availability payment monitoring dashboard** using **Java Spring Boot microservices** and **REST APIs** to ingest, process, and visualize real-time **SWIFT MT/MX message flows, ISO 20022 transactions, and SEPA payment settlement events** from interconnected banking systems, reducing payment-ops incident detection time from **12 minutes to 90 seconds**.
- Engineered **Python ETL pipelines** using **pandas and NumPy** to extract transaction data from **PostgreSQL and Oracle** databases, transform ISO 20022 message structures, and load normalized datasets into a **data warehouse** for regulatory reporting and audit trail compliance; processed **2.5M+ daily transactions** with **99.95% accuracy**.
- Deployed dashboard front-end and backend services on **AWS (EC2, S3, Lambda)** with **Docker containerization** and **Jenkins CI/CD automation**; implemented **CloudWatch monitoring and Dynatrace APM** for real-time application health, achieving **99.9% uptime SLA** and reducing production incident response time by **40%**.
- Integrated **Power BI dashboards** with backend data pipelines to deliver executive KPIs on payment throughput, settlement success rates, and cross-border transaction latency; enabled business stakeholders and regulators to validate **GDPR compliance, audit trails, and PSD2 regulatory requirements** through automated daily reports.
- Coordinated **UAT with banking operations teams and business analysts** across **change-control workflows** and post-go-live support; resolved **ERP system integration points** and reconciliation workflows between payment systems and enterprise business platforms, reducing operational defects by **35%**.

Cross-System Data Integration & Reconciliation Engine (HCL Technologies)

- Built a **Python-based reconciliation engine** using **Flask REST APIs and pandas DataFrames** to validate and reconcile transaction flows across **PostgreSQL, MySQL, and Oracle** databases spanning ERP systems, payment platforms, and banking operations systems; detected and flagged **data inconsistencies within 2 minutes** of settlement, reducing manual reconciliation effort by **60%**.
- Implemented **SQL schema migrations and data validation scripts** to enforce data integrity across interconnected systems during **ERP configuration updates and change-control deployments**; automated **pre- and post-migration audits**, eliminating **8 hours of manual validation per release cycle**.
- Orchestrated cross-functional support with **UAT teams and business analysts** to define reconciliation requirements aligned with **regulatory compliance and SWIFT message standards**; delivered training materials and Confluence documentation enabling operations staff to troubleshoot integration failures independently, reducing support ticket volume by **45%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023

- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
