PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and delivered **technical infrastructure diagrams and system architecture documentation** for enterprise applications using **methodical problem-solving** and attention to detail, enabling **15+ cross-functional stakeholders** (clients, engineers, operations teams) to understand interconnected system designs and dependencies with **100% accuracy** in technical specifications.
- Led **change-control management** and **UAT coordination** across production systems supporting **24/7 operational environments**, executing **40+ system configuration updates** with zero unplanned downtime through independent task execution, detailed pre-implementation reviews, and post-go-live verification protocols aligned with enterprise governance standards.
- Executed **methodical incident response and application support** using **Splunk, CloudWatch, and Dynatrace** monitoring tools to maintain **99.8% SLA compliance** across business-critical systems, investigating **200+ P1/P2 incidents annually** with clear verbal and written communication to clients and internal teams to resolve service disruptions within **2-hour** response windows.
- Developed **SQL-based reporting and data validation workflows** using **PostgreSQL, MySQL, and Oracle** to deliver **12+ monthly operational dashboards** for stakeholder review, demonstrating excellent written communication through accurate technical documentation and enabling **data-driven decision-making** for system optimization across interconnected enterprise platforms.
- Architected and maintained **Java Spring Boot REST APIs and microservices** supporting **500+ daily API calls** with **99.5% uptime**, applying **methodical code review practices** and **CI/CD pipelines via Jenkins** to ensure high-quality, maintainable technical implementations that enabled seamless system integrations across distributed enterprise environments.
- Demonstrated **independent initiative and problem-solving methodology** by designing **Python automation scripts and ETL data pipelines** that reduced manual operational tasks by **35%**, improving team efficiency and enabling stakeholders to focus on strategic objectives while maintaining rigorous **attention to detail** in data accuracy and process documentation.

SKILLS

Engineering & Technical Design – technical architecture diagrams, system design documentation, infrastructure planning, methodical problem-solving.

Operations & Change Management – change-control management, UAT coordination, production support, incident response, SLA management, post-go-live support.

Monitoring & Observability – Splunk, CloudWatch, Dynatrace, operational alerting, system reliability, performance dashboarding.

Database & Data Engineering – PostgreSQL, MySQL, Oracle, SQL, data validation, ETL pipelines, data warehousing.

Backend & Cloud Technologies – Java Spring Boot, REST APIs, AWS (EC2, S3, Lambda), Docker, Linux, Git, Jenkins CI/CD.

Automation & Scripting – Python scripting, shell scripting, cron job scheduling, workflow automation, data processing.

Communication & Stakeholder Management – verbal communication, written technical documentation, client liaison, cross-functional collaboration, Jira, Confluence.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
--	----------------

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021
---	----------------

PROJECTS

Energy Infrastructure Asset Monitoring & Operational Documentation Platform (HCL Technologies)

- Architected end-to-end **system design documentation and technical diagrams** for a distributed energy-operations platform serving **8 regional stakeholders**, applying **methodical engineering principles** to map asset dependencies, connectivity, and operational workflows with **100% technical accuracy** verified through peer review and stakeholder sign-off.
- Implemented **operational monitoring and alerting dashboards** using **Splunk and CloudWatch** to track **50+ critical infrastructure assets** across distributed energy systems, reducing **unplanned downtime by 28%** through **real-time incident alerting** and enabling rapid problem-solving via clear operational runbooks and escalation procedures.
- Designed and executed **change-control protocols and UAT workflows** for **12 configuration updates** across interconnected energy-management systems, coordinating **15+ team members** (engineers, operations, client stakeholders) with meticulous written communication, detailed test plans, and post-implementation verification to achieve **zero service disruptions**.
- Developed **Python-based ETL automation and SQL data-validation workflows** using **PostgreSQL** to consolidate operational data from **6 heterogeneous systems**, delivering **weekly executive dashboards** with **99.9% data accuracy** and reducing manual reporting effort by **40 hours monthly**, enabling data-driven reliability improvements.
- Built **Java Spring Boot REST APIs** to integrate legacy asset-management systems with modern operational platforms, handling **2,000+ API requests daily** with **99.7% uptime** through **rigorous CI/CD deployment practices via Jenkins** and **Git-based change tracking**, ensuring seamless cross-system communication and independent task execution.

Enterprise Change Management & Technical Documentation Framework (HCL Technologies)

- Established comprehensive **change-control documentation standards and UAT coordination procedures** for enterprise system updates, supporting **30+ production changes annually** with **zero compliance violations** and enabling **100% stakeholder alignment** through detailed written specifications, test-case matrices, and post-implementation reports.
- Demonstrated **methodical problem-solving and independent initiative** by designing **SQL-based data-validation workflows** that identified and resolved **15+ data-integrity issues** during UAT cycles, preventing **\$240K+ in potential production incidents** through rigorous **attention to detail** and technical accuracy in requirements verification.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)

- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
