PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and built **native Android applications** using **Kotlin/Java** and modern **Android Architecture Components (MVVM, LiveData, ViewModel)**, delivering production-ready features that supported 2M+ daily active users across eBay's ecommerce platform with **99.5% crash-free rate**.
- Owned end-to-end feature development on **Android applications**, architecting client-side solutions using **Compose, coroutines, concurrency patterns**, and **client-side persistence (Room, SharedPreferences)** while collaborating with Core Product teams on cross-functional alignment and achieving **40% reduction in ANR incidents**.
- Implemented **dependency injection** using **Dagger** and modern **DI frameworks** across large-scale Android codebases, refactored legacy architecture into testable, maintainable modules, and mentored junior developers through **code reviews** and **pairing sessions** to enforce quality standards.
- Debugged and resolved **Android OS-level issues** and new OS feature incompatibilities in production applications, leveraging **Android APIs and architectural patterns** to stabilize critical user flows and reduce regression defects by 35%.
- Led **Agile/Kanban ceremonies** and iterative sprint planning to organize workload distribution across native mobile architecture team, advocating for code quality improvements and supporting colleague growth through **continuous improvement methodologies** aligned with eBay engineering standards.
- Designed and released **animated transitions, gesture handling, and modern UI patterns** using **Android Compose and Material Design**, integrated **AI-assisted development tooling** into team workflows, and established testing and performance benchmarking practices that accelerated feature time-to-market by 3 sprints.

SKILLS

Mobile Development – Android, Kotlin, Java, native applications, Android APIs.

Android Architecture & Patterns – MVVM, Android Architecture Components, ViewModel, LiveData, Dagger, modern dependency injection frameworks.

Android Technical Stack – Compose, coroutines, concurrency, transitions, animations, Material Design, gesture handling, client-side persistence, Room, SharedPreferences.

Software Engineering Practices – code reviews, pairing, Agile methodologies, Kanban, Git, continuous improvement, testing, performance benchmarking.

Backend & Systems Integration – REST APIs, Java Spring Boot, Python, SQL, PostgreSQL, AWS, Docker.

Development Tools & Collaboration – Jira, Confluence, Jenkins CI/CD, AI-assisted development tooling, cross-functional team collaboration.

Auxiliary Skills – Linux, shell scripting, production monitoring, incident management, requirements gathering.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Next-Generation Mobile Architecture Refactor – Native Android Application (HCL Technologies / eBay Enterprise SWE)

- Architected and executed a **12-month native Android application modernization** using **Kotlin, MVVM with Android Architecture Components, and Dagger dependency injection**, refactoring a legacy monolithic codebase into **modular, testable feature modules** that improved code maintainability and reduced onboarding time for new developers by **6 weeks**.
- Designed and implemented advanced **Android UI/UX patterns** leveraging **Compose, coroutines, concurrency models, animations, and gesture handling** to deliver fluid, responsive user interactions across 50+ feature screens, achieving **45% improvement in animation smoothness metrics** and reducing frame drops by **62%**.
- Integrated **client-side persistence** using **Room database and SharedPreferences** with encryption and offline-first synchronization, enabling seamless user experience during network interruptions and reducing API request volume by **38%**.
- Established rigorous **code review processes, pair programming sessions, and automated testing frameworks** across the native mobile architecture team, enforcing **architectural patterns and quality standards** that achieved **99.5% crash-free rate** and reduced regression defects by **40%**.
- Debugged and resolved **OS-level Android compatibility issues** across new Android versions, implemented **modern Android APIs** for backward compatibility, and collaborated with Core Product teams to support feature delivery across 8 major product domains, accelerating time-to-market by **3 development sprints**.

SWIFT Payments Operations Dashboard – Real-Time Transaction Monitoring Platform (HCL Technologies)

- Built and maintained a **production-grade SWIFT messaging and payments-operations dashboard** supporting **ISO 20022 message flows, SEPA, and cross-border payment reconciliation** for a Tier-1 banking client, enabling real-time transaction-flow visibility and operational alerting with **SLA compliance of 99.9%**.
- Designed **REST APIs** using **Java Spring Boot** to surface **SWIFT MT/MX message formats, payment processing flows, and audit trails**, integrated with **PostgreSQL and Oracle databases** for data validation and schema management, and ensured **GDPR and regulatory compliance** across all payment data pipelines.
- Implemented **production monitoring and incident response workflows** using **Splunk and CloudWatch**, achieving **P1 incident resolution in under 15 minutes** and maintaining **24/7 SLA targets** for payments processing operations across **190+ markets**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
