PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Acted as liaison between business, IT, and QA teams for a **SWIFT messaging / payments-operations dashboard** serving a Tier-1 banking client, translating business requirement documents into technical specifications and analysing **payment-related requirements** (Low and High Value Payments, Cross Border Payments) across **ISO 20022 message flows, SEPA, Instant Payments, and PSD2 / Open Banking** regulatory frameworks, achieving **99.8% SLA compliance** and zero post-go-live critical defects.
- Provided content leadership and domain inputs to delivery and implementation teams on **payments system technologies** including **ISO 20022, SWIFT MT/MX message formats**, tokenization, and reconciliation workflows; read and understood regulatory changes from SWIFT rulebooks and SEPA regulations to inform solution design and ensure regulatory compliance (**GDPR / Data Protection**) across interconnected banking systems.
- Interacted with functional BAs, product SMEs, QAs, engineering teams, and solution architects to walk through requirements, understand technical dependencies, and resolve technical issues during development, UAT, and post-implementation triage; coordinated cross-functional collaboration across 8+ banking-domain teams and operations stakeholders to ensure alignment on requirements and timely delivery of **15+ payment-flow enhancements**.
- Oversaw and participated in **UAT** cycles for payments systems integrations, documenting defects and resolving technical blockers through **SQL / Oracle database** analysis, log investigation (**Splunk, Dynatrace**), and schema-change coordination; validated data integrity across payment transactions, reconciliation workflows, and system-to-system data flows with **100% accuracy** across pre-production and production environments.
- Executed **change-control management** for system configuration updates and post-go-live support across interconnected **ERP modules** and operational platforms; gathered requirements from business stakeholders, analysed as-is payment processes, and documented technical specifications for **12+ cross-system integrations** via **REST APIs** and **database-level data flows** across **PostgreSQL, MySQL, and Oracle**.
- Produced operational reporting and domain-focused BI dashboards using **Power BI** and data models to track payments volume, SLA metrics, transaction reconciliation, and incident trends; created **DAX measures** and **Power Query ETL** pipelines to consolidate payment data from multiple sources, enabling business stakeholders and operations teams to achieve **40% faster root-cause analysis** on payment failures.

SKILLS

Payments Domain Expertise – ISO 20022 message flows, SWIFT MT/MX message formats, Low and High Value Payments, Cross Border Payments, SEPA, Instant Payments, PSD2, Open Banking, tokenization, reconciliation workflows, payment system technologies.

Banking & Financial Services – payments operations, transaction-flow visibility, SLA management, regulatory compliance, GDPR / Data Protection, SEPA regulations, SWIFT rulebooks, banking-domain requirements analysis.

Business Analysis & Requirements – business requirement documentation, technical specification translation, functional BA collaboration, UAT coordination, requirements gathering and analysis, solution solutioning, change-control management.

Database & SQL – Oracle, PostgreSQL, MySQL, ad-hoc queries, data validation, schema changes, database-level data flows, transaction-flow analysis.

Technical Skills – REST API integrations, ERP module support, microservice architecture familiarity, scripting, as-is process analysis, technical dependency mapping.

Operational Analytics & BI – Power BI dashboards, DAX measures, Power Query ETL, data modelling, operational reporting, Tableau, performance metric tracking.

Production Support & Monitoring – Splunk, Dynatrace, CloudWatch, incident response, P1/P2 severity management, log analysis, root-cause analysis.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Cross-Border Payments Reconciliation & ISO 20022 Migration Platform (HCL Technologies)

- Designed and implemented a comprehensive **payments reconciliation and ISO 20022 migration platform** for a Tier-1 banking client, consolidating **Low and High Value Payment** flows and **Cross Border Payment** processing across legacy **SWIFT MT message** standards and next-generation **ISO 20022 MX message** formats, ensuring zero transaction loss during cutover and achieving **99.95% reconciliation accuracy** across 18+ payment corridors.
- Built a **Power BI operational dashboard** with **DAX measures** and **Power Query ETL pipelines** to track payment volumes, reconciliation exceptions, regulatory compliance metrics (**SEPA, PSD2**, tokenization compliance), and SLA performance across payment types; automated daily reconciliation reports consumed by 40+ banking operations and compliance stakeholders, reducing manual reconciliation effort by **65%** and enabling real-time visibility into payment status.
- Coordinated requirements gathering and technical specification translation across business, IT, QA, and solution architecture teams; worked with **Oracle databases** and **REST API integrations** to map payment message transformations, reconciliation algorithms, and regulatory audit-trail requirements; documented **SEPA rulebook** and **SWIFT regulatory change impacts** into implementable technical designs that reduced regulatory violation risk by **100%**.
- Executed **UAT coordination** and post-implementation support, resolving **18+ critical technical defects** through **Splunk and Dynatrace** log analysis, database query troubleshooting, and payment flow tracing; improved issue resolution time by **52%** through systematic documentation of payment exception patterns and cross-system dependency analysis across ERP and payments systems.

Banking Payments Operations Dashboard & SWIFT Message Intelligence System (HCL Technologies)

- Served as domain expert and liaison between business operations, IT engineering, and QA teams for a **SWIFT messaging and payments-operations dashboard** providing real-time transaction-flow visibility and operational alerting for **payment messages** in a high-volume Tier-1 banking environment; translated business requirements into technical specifications covering **ISO 20022, SWIFT MT/MX message format** parsing, and **Instant Payments / PSD2 / Open Banking** regulatory requirements, maintaining **99.8% SLA compliance**.
- Analysed as-is payment processing workflows and gathered requirements from banking-domain BAs and operations teams; documented the technical impact of regulatory changes from **SEPA rulebooks** and **SWIFT regulations** on payment routing, settlement, and compliance logic; provided content leadership in solutioning

tokenization and **reconciliation workflow** enhancements aligned with regulatory mandate, reducing go-live risk by 35%.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
