PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Led **business analysis and reporting** for enterprise payment operations, developing **daily, weekly, monthly, and annual performance dashboards** using **Power BI and Tableau** to track key performance indicators, forecast operational trends, and measure results against internal budget and forecasted targets, delivering **40+ stakeholder reports monthly** across finance, operations, and partner services teams.
- Conducted **forecasting and results measurement** processes for production support and managed services operations, analyzing **PostgreSQL, MySQL, and Oracle** databases to identify key drivers, validate financial data, and provide actionable recommendations to operations leadership, improving forecast accuracy by **18%** quarter-over-quarter.
- Partnered with cross-functional teams including **operations, finance, and partner services** to gather requirements, develop ad-hoc client and operational reports, and represent business operations owners in explaining results and performance metrics to internal and external stakeholders.
- Managed **incident response, SLA tracking, and change-control processes** for mission-critical payment integrity systems using **Splunk and Dynatrace** monitoring, reducing **P1 incident resolution time by 35%** through trend analysis, root-cause investigation, and proactive alerting framework redesign.
- Designed and maintained **operational reporting pipelines and data models** using **Python scripting, SQL ETL workflows, and Jenkins CI/CD automation** to extract, transform, and load transaction data across interconnected enterprise systems, enabling real-time visibility into payment operations with **99.2% data accuracy**.
- Led continuous improvement initiatives by developing **statistical analysis models and performance measurement frameworks** in **R and Python (pandas, NumPy)** to measure business results, identify operational bottlenecks, and quantify savings validation across payment integrity value streams, contributing **\$2.8M in identified process improvements** annually.

SKILLS

Business Analysis & Reporting – business operations analysis, forecasting and results measurement, performance metrics development, KPI tracking, ad-hoc reporting, trend analysis, operational dashboards, savings validation.

Business Intelligence & Data Visualization – Power BI, Tableau, DAX measures, data modelling, Power Query ETL, executive dashboards, stakeholder reporting, data warehousing.

Data Analysis & Statistical Methods – SQL (PostgreSQL, MySQL, Oracle), Python (pandas, NumPy, scikit-learn), R / RStudio, hypothesis testing, regression analysis, time-series forecasting, A/B testing, exploratory data analysis.

Operations & Process Management – change-control management, SLA management, incident response, root-cause analysis, UAT coordination, operations support, cross-functional partnership, continuous improvement.

Technology & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git, Jenkins, Jira, Confluence, Splunk, Dynatrace, REST APIs, system integrations.

Programming & Backend Development – Python, Java Spring Boot, SQL scripting, shell scripting, data pipelines, ETL automation, API development.

Domain Expertise – payment integrity operations, payments processing, enterprise business systems, ERP integration support, regulatory compliance (GDPR), financial services operations, cross-border payments.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Co-ordination of Benefits Performance & Forecasting Analytics Platform (HCL Technologies)

- Architected and deployed an integrated **business analysis and reporting platform** for non-clinical payment integrity operations, consolidating daily, weekly, monthly, and annual business results across **15+ operational data sources** using **SQL data warehousing, Python ETL pipelines, and Power BI dashboards**, enabling real-time KPI tracking against forecasted targets.
- Designed and maintained **forecasting and results measurement models** using **Python (pandas, NumPy, scikit-learn)** and **R statistical analysis** to predict payment integrity volumes, identify key performance drivers, and quantify operational variance from budget, improving forecast accuracy by **22%** and reducing manual reporting effort by **1,200 hours annually**.
- Built **executive and operational reporting suite** in **Power BI with DAX measures and Power Query transformations** delivering **18 recurring reports** to finance, operations, and partner services stakeholders; implemented **automated scheduling and email distribution** via **Python and Jenkins CI/CD pipelines**, reducing delivery time from **8 hours to 15 minutes**.
- Partnered with operations and finance leaders to define **KPI frameworks and performance measurement methodologies**, conducting root-cause analysis on operational trends and presenting data-driven recommendations that identified **\$3.2M in savings opportunities** across payment integrity value streams.
- Established **continuous improvement tracking and validation processes** using **SQL-based reconciliation workflows and Python automation scripts** to monitor savings realization and validate operational improvements, achieving **98% validation accuracy** and enabling finance to close month-end reporting **3 days earlier**.

Payment Operations Monitoring & Incident Management Dashboard (HCL Technologies)

- Engineered **production monitoring and incident response infrastructure** for enterprise payment systems using **Splunk and Dynatrace**, implementing real-time alerting, SLA tracking, and change-control workflows to reduce **P1/P2 incident resolution time by 35%** and improve operational reliability to **99.8% uptime**.
- Developed **ad-hoc operational analysis and root-cause investigation processes** leveraging **SQL queries, Python scripting, and log analysis** to identify payment processing bottlenecks, quantify business impact, and support cross-functional recommendations to operations and partner services teams.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
