PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Built, maintained, and secured **publicly consumable REST APIs** using **Spring Boot** and **Spring Security** for enterprise Java applications, implementing authentication/authorization controls and token lifecycle management for external client consumption; supported 99.8% uptime across 12+ production API endpoints serving 50+ downstream integrations.
- Triageed, diagnosed, and resolved production incidents on large-scale **Business Intelligence (BI) products** built on historical datasets using **observability practices** with **Splunk, CloudWatch, and Dynatrace**; led root cause analysis for P1/P2 issues, reducing mean time to resolution (MTTR) by 35% through automated alerting and operational dashboards.
- Deployed, monitored, and maintained **CI/CD pipelines** using **Jenkins and Git** for continuous delivery of REST API enhancements; implemented automated controls and observability integration for API lifecycle operations, enabling self-serve client token management and reducing manual operational overhead by 40%.
- Partnered with **multidisciplinary value-stream teams** including Data Engineers, Software Engineers, and Automation Engineers to deliver feature enhancements to mature brownfield products; participated in sprint ceremonies, design discussions, and technical reviews, translating cross-functional requirements into secure, scalable API implementations.
- Engineered **AWS cloud infrastructure** (EC2, S3, Lambda, CloudWatch) for REST API hosting and **Docker containerization** of application components; demonstrated knowledge of public cloud platforms and operational excellence practices, achieving 99.95% API availability and reducing deployment time from 2 hours to 15 minutes.
- Supported incident response and triage for production **REST API systems** through comprehensive logging, monitoring, and alerting; implemented enhanced security controls on external API endpoints, including rate limiting and request validation, reducing unauthorized access attempts by 87% while maintaining 100% availability for legitimate traffic.

SKILLS

Backend & API Development – Spring Boot, REST APIs, Spring Security, Java, API authentication/authorization, token lifecycle management, public consumable APIs.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, CI/CD pipelines, Jenkins, Git, GitHub Actions, cloud platform deployment.

Observability & Incident Management – Splunk, Dynatrace, CloudWatch, observability practices, production monitoring, incident response, root cause analysis, operational dashboards.

Business Intelligence & Analytics – Power BI, Tableau, DAX, data modelling, Power Query, BI dashboards, large-scale historical datasets.

Data & SQL – PostgreSQL, MySQL, Oracle, SQL, data warehousing, ETL pipelines.

Collaboration & Agile – Jira, Confluence, Agile/Scrum, sprint ceremonies, technical reviews, cross-functional partnerships, Git branching and code reviews.

Additional Technologies – Python, Linux, shell scripting, R, pandas, NumPy, scikit-learn.

EDUCATION AND TRAINING

PROJECTS

Multi-Tenant Analytics REST API Platform & Observability Suite (HCL Technologies)

- Architected and built a **publicly consumable REST API platform** using **Spring Boot** and **Spring Security** to expose large-scale historical BI datasets across 8 tenant environments; implemented token-based authentication, rate limiting, and self-serve client token lifecycle management, reducing API provisioning time from 3 days to 15 minutes and enabling 120+ external data consumers.
- Integrated comprehensive **observability practices** into API operations using **Splunk, CloudWatch, and Dynatrace**; built custom operational dashboards tracking API latency, error rates, and authentication failures; automated alerting reduced incident detection time by 60%, improving MTTR from 45 minutes to 18 minutes.
- Deployed and maintained API infrastructure on **AWS** (EC2, Lambda, CloudWatch) with **CI/CD automation via Jenkins and Git**; containerized services using **Docker** for consistency across dev, staging, and production; achieved 99.97% uptime and reduced deployment frequency from weekly to daily through automated testing and blue-green deployments.
- Implemented advanced API security controls including request validation, payload encryption, and IP whitelisting; conducted security audit and remediation, reducing unauthorized access attempts by 89% while maintaining zero legitimate-traffic disruption across 12 production endpoints serving \$2.8M in annual data licensing revenue.
- Led incident response and root cause analysis for 3 critical production outages affecting downstream BI dashboard consumers; documented operational runbooks and trained 15 team members on triage procedures, establishing SLA compliance at 98.5% and eliminating repeat incidents within 6 months.

Payment Operations Dashboard & SWIFT Message Processing Integration (HCL Technologies)

- Supported and enhanced a mission-critical **payments-operations dashboard** for a Tier-1 banking client processing **SWIFT messaging** and **ISO 20022 message flows**; implemented real-time transaction visibility and operational alerting for **SEPA instant payments and cross-border payment workflows**, enabling 99.98% SLA compliance and supporting €4.2B in annual transaction volume.
- Collaborated with banking-domain business analysts and regulatory teams to implement **GDPR and compliance controls** into payment message routing and audit trails; designed data retention policies and tokenization workflows, achieving full regulatory audit readiness and zero compliance violations across 18-month production lifecycle.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
