PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Analyzed enterprise business system workflows and stakeholder requirements across **ERP modules, payments processing platforms**, and interconnected operational systems; documented functional specifications and change-control procedures resulting in **95% UAT pass rate** and zero post-implementation critical defects across 12 monthly deployments.
- Designed and delivered **Power BI dashboards** and **operational KPI reports** for senior business stakeholders using **DAX measures, data modelling**, and **Power Query ETL** to consolidate transaction data from **PostgreSQL, Oracle, and MySQL** databases; enabled real-time visibility into **SLA compliance, incident metrics**, and business performance, reducing report-generation time by **68%**.
- Coordinated cross-functional requirements-gathering sessions with business stakeholders, domain analysts, and technical teams to define system functionality, regulatory requirements (**GDPR, ISO 20022**), and integration points; translated business needs into detailed system specifications and user acceptance criteria for **SWIFT messaging** and **payments operations** platforms.
- Managed system integration testing and UAT coordination for **REST API-driven data flows** and **database synchronization** across enterprise business systems; documented integration dependencies, data lineage, and change-impact assessments; **100% defect resolution** prior to production cutover for 8 major releases.
- Conducted root-cause analysis on **production incidents** and system behavior issues using **Splunk, Dynatrace, and CloudWatch** monitoring data; partnered with development and operations teams to identify gaps in system design, data validation, and process workflows; recommended process improvements that reduced P1 incident frequency by **40%**.
- Authored comprehensive **user guides, training materials**, and **runbooks** documenting business system functionality, data flows, regulatory compliance checkpoints, and operational procedures; delivered training sessions to business-system users and support teams, achieving **92% knowledge-retention** scores and enabling self-service incident resolution.

SKILLS

Business Systems & Process Analysis – requirements gathering, stakeholder analysis, functional specification, business process mapping, change-control management, UAT coordination, impact assessment.

Business Intelligence & Data Reporting – Power BI, DAX, Power Query, Tableau, data modelling, data warehousing, executive dashboards, KPI reporting.

Enterprise Systems & Integrations – ERP support, REST API integrations, system interoperability, data synchronization, cross-system workflows, configuration management.

Payments & Financial Services Domain – SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA payments, cross-border payments, PSD2, Open Banking, payments operations, transaction reconciliation.

Production Support & Monitoring – incident management, SLA monitoring, root-cause analysis, Splunk, Dynatrace, CloudWatch, operational alerting, system reliability.

Technical Stack – Python, Java Spring Boot, SQL (PostgreSQL, Oracle, MySQL), AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git, Jenkins, Jira, Confluence.

Compliance & Risk – GDPR, regulatory requirements, audit trail management, financial-services compliance, data protection, regulatory reporting.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

Enterprise Payments Operations Intelligence Platform – Business Systems Redesign (HCL Technologies)

- Led end-to-end business systems analysis and requirements definition for a **SWIFT messaging and payments operations dashboard** supporting a tier-1 banking client; gathered functional requirements across 18 stakeholder groups (trading, operations, compliance, finance) and translated them into detailed system specifications covering **ISO 20022 message flows**, **SEPA instant-payment routing**, and **cross-border payment reconciliation**.
- Designed **Power BI data model** and **DAX-driven operational dashboards** consolidating transaction data from **Oracle ERP**, **PostgreSQL transaction ledgers**, and **REST API integrations** with downstream clearing systems; built 12 executive and operational KPI reports covering **payment SLA compliance**, **transaction latency by corridor**, **exception handling rates**, and **regulatory audit readiness**, enabling real-time visibility for 45+ daily active users.
- Coordinated comprehensive **change-control and UAT governance** for system integration across 3 **interconnected ERP modules** and 2 **payment-processing platforms**; documented **data lineage**, **system dependencies**, and **regulatory compliance checkpoints (GDPR data minimization, PSD2 audit logging)**; achieved **98% test-case pass rate** and zero post-go-live critical incidents across 6-month deployment cycle.
- Authored and delivered **user training materials**, **operational runbooks**, and **system documentation** for business users and support teams; conducted 8 instructor-led training sessions reaching 120+ operations staff; enabled **87% reduction in Level-1 support escalations** through improved process clarity and self-service troubleshooting guides.
- Conducted **root-cause analysis** on 15+ production issues using **Splunk log aggregation** and **Dynatrace transaction tracing**; identified system design gaps in data validation and reconciliation workflows; recommended architectural improvements that reduced **payment-exception processing time by 52%** and improved **SLA compliance from 94% to 99.2%**.

SWIFT Messaging Standards Migration & Regulatory Compliance Automation (HCL Technologies)

- Analyzed business requirements and regulatory mandates for **SWIFT MT-to-MX message migration** and **ISO 20022 adoption**; collaborated with compliance, operations, and technical teams to define system changes, data transformation rules, and **regulatory reporting procedures** aligned with **PSD2 and GDPR** requirements.
- Orchestrated **change-management and testing coordination** for payment-message schema updates and ERP configuration changes across production and UAT environments; documented **system impact assessments**, **user process changes**, and **regulatory sign-off procedures**; delivered **zero-defect go-live with 100% regulatory compliance certification**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
