PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Built, maintained and secured **public consumable REST APIs** using **Spring Boot** and **Spring Security** for enterprise BI products, implementing token lifecycle management controls and reducing unauthorized access incidents by **92%** across 15+ externally-facing endpoints.
- Triaged and contributed to operational evaluations on **production systems** by instrumenting **observability practices** with **Splunk, CloudWatch and Dynatrace**, achieving **98.5% SLA compliance** and reducing incident mean-time-to-resolution (MTTR) by **40%** through proactive monitoring and alerting.
- Deployed, monitored and maintained systems in production using **CI/CD pipelines** with **GitHub Actions** and **Jenkins**, managing **40+ monthly releases** across AWS and cloud infrastructure with zero production deployment failures over **3.5 years**.
- Implemented features to facilitate **self-serve client token lifecycle management** via **REST API authentication** and **Spring Security** controls, reducing manual token provisioning requests by **85%** and enabling 200+ clients to manage credentials autonomously.
- Partnered with Data Engineers, Software Engineers and Automation Engineers within multidisciplinary value stream teams to deliver enhancements to existing BI products, participating in sprint ceremonies, design discussions and technical reviews while communicating requirements and status across stakeholders.
- Supported incident response, triage and root cause analysis for production issues using **AWS (EC2, S3, Lambda, CloudWatch)**, **SQL (PostgreSQL, Oracle, MySQL)** and **Python scripting**, resolving **120+ P1/P2 incidents** with an average resolution time of **3.2 hours**.

SKILLS

Backend & API Development – Spring Boot, REST APIs, Spring Security, public API design, token lifecycle management, REST endpoint security.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), GitHub Actions, CI/CD pipelines, Docker, Linux, Git, production deployment and monitoring.

Observability & Reliability – Splunk, Dynatrace, CloudWatch, observability practices, incident response, root cause analysis, SLA management, operational monitoring.

Data & Databases – SQL (PostgreSQL, Oracle, MySQL), data modelling, ETL, Python (pandas, NumPy), schema design and optimization.

Business Intelligence – Power BI, DAX, Tableau, data warehousing, dashboard development, business analytics, large-scale historical datasets.

Software Engineering & Collaboration – Agile/Scrum, Jira, Confluence, code reviews, technical design, cross-functional partnerships, stakeholder communication.

Additional Technologies – Java, Python, Flask, FastAPI, R/RStudio, machine learning fundamentals, statistical analysis.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Health Analytics REST API Platform with Automated Token Lifecycle Management (HCL Technologies)

- Designed and built a **publicly consumable REST API platform** using **Spring Boot** and **Spring Security** serving healthcare analytics data to 250+ external clients, implementing **OAuth 2.0 token-based authentication** with automated credential rotation, reducing manual provisioning overhead by **85%**.
- Implemented **observability integration** across all API endpoints using **CloudWatch metrics, custom Splunk dashboards and Dynatrace tracing**, achieving real-time visibility into API latency, error rates and client usage patterns; resolved **95%** of production incidents within **2 hours** via rapid root cause analysis.
- Deployed the platform using **GitHub Actions CI/CD pipelines** targeting **AWS cloud infrastructure (EC2, Lambda, CloudWatch)**, implementing automated testing, security scanning and blue-green deployments; achieved **zero downtime releases** across **50+ production deployments** over **18 months**.
- Engineered **self-serve token lifecycle management APIs** allowing clients to independently provision, rotate and revoke credentials without backend team intervention, eliminating **1,200+ annual support tickets** and reducing time-to-API-access from **5 days to 10 minutes**.
- Partnered with Data Engineers to optimize backend data queries using **PostgreSQL and Oracle** indexing strategies, reducing API response latency by **65%** (from 800ms to 280ms p99) across queries touching **5+ billion healthcare records**.

SWIFT Payments Operations Dashboard & Real-Time Monitoring System (HCL Technologies)

- Built and maintained a **Business Intelligence dashboard** for a banking client using **Power BI, DAX and data warehousing** techniques, ingesting **SWIFT MT/MX message formats** and **ISO 20022** payment flows to provide real-time transaction visibility and operational alerting; supported **500+ daily cross-border and SEPA instant payments** with **99.9% uptime SLA**.
- Integrated **production observability** into the payments platform via **Splunk and CloudWatch**, instrumenting SLA metrics, regulatory audit trails and GDPR compliance checkpoints; reduced incident detection time by **70%** and maintained **zero regulatory breaches** over **3+ years** of operation.
- Collaborated with banking-domain business analysts and operations teams to gather requirements, conduct UAT and deliver post-implementation triage, translating complex **ISO 20022, SEPA and PSD2 Open Banking** requirements into BI visualizations and automated compliance reports.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
