PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Monitored and processed daily hardware requests and inventory transactions with **99.2% accuracy** using **Oracle applications**, maintaining real-time system data entry and generating operational reports for management visibility across manufacturing and distribution facilities.
- Performed hardware receiving, inspection, put-away, and cycle counting operations to maintain inventory accuracy; coordinated with suppliers to ensure highest quality hardware deliveries within established lead times and managed material planning and scheduling.
- Configured and deployed desktop hardware including laptops, network equipment, and tokens; performed hardware setup, installation, and delivery to internal network sites; troubleshoot **basic hardware and configuration issues** independently and escalated complex problems to management following company procedures.
- Reviewed and updated operational procedures to ensure accuracy and compliance with business requirements; identified **process improvements and cost-saving opportunities** across hardware distribution workflows, collaborating with associates to improve efficiency and productivity by **18%**.
- Shipped hardware to end users and destinations in compliance with **Oracle Policies and Procedures**; managed parcel carrier procedures, systems, and transportation networks; maintained safe lab and work areas adhering to all safety guidelines and protocols.
- Communicated operational status and performance trends to management team; analyzed hardware distribution data using **Excel** and **Oracle reporting tools** to provide daily status updates, identify bottlenecks, and recommend strategic improvements to accelerate productivity and growth.

SKILLS

Hardware & Logistics Operations – hardware receiving, inspection, put-away, cycle counting, inventory management, hardware configuration (laptops, network equipment, tokens), desktop support, hardware setup and installation, material planning and scheduling.

Oracle & Business Systems – Oracle applications, system data transactions, operational reporting, database records management, ERP integration support, change-control management.

Logistics & Distribution Methodologies – parcel carrier procedures and systems, transportation networks, supply chain coordination, supplier management, shipping and receiving protocols, warehouse operations.

Operational Analysis & Reporting – data analysis, Excel, operational reporting, performance trend analysis, process documentation, procedure review and updates, KPI tracking.

Technical & IT Skills – Microsoft Office, computer troubleshooting, quick learning of new tools, Linux, Git, Jira, basic networking concepts.

Professional Competencies – strong organizational skills, attention to detail, multitasking in dynamic environments, customer service, professionalism under pressure, communication and interpersonal skills, problem-solving with guidance, ability to lift and carry up to 50 lbs, capability to drive company vehicles.

EDUCATION AND TRAINING

PROJECTS

Hardware Inventory & Distribution Operations Platform (HCL Technologies)

- Designed and implemented a **comprehensive hardware inventory management system** integrating receiving, cycle counting, and put-away workflows using **Oracle applications** with automated system data transactions, reducing manual data entry errors by **87%** and improving inventory accuracy from **94% to 99.2%**.
- Built **operational dashboards and daily status reports** using **Excel and Oracle reporting tools** to track hardware requests, supplier deliveries, and distribution metrics; enabled management to monitor performance trends in real-time and make data-driven decisions on process optimization.
- Developed standardized procedures and documentation for hardware configuration (laptops, network equipment, tokens), hardware setup, installation, and shipping protocols compliant with **Oracle Policies and Procedures** and parcel carrier systems, reducing fulfillment cycle time by **22%** and enhancing compliance adherence to **100%**.
- Collaborated with suppliers and parcel carriers to establish lead-time agreements and quality standards; implemented a supplier performance tracking system that reduced delivery delays by **31%** and improved hardware quality metrics across all manufacturing and distribution sites.

Production Support & Incident Management Dashboard (HCL Technologies)

- Built real-time operational monitoring and alerting system using **Splunk and CloudWatch** to track daily hardware operations, inventory levels, and system transactions; generated automated daily status reports and performance dashboards that reduced manual reporting time by **16 hours per week**.
- Implemented **process improvement initiatives** across hardware distribution workflows, identifying cost-saving opportunities and efficiency bottlenecks; collaborated with operations associates to streamline receiving, inspection, and put-away procedures, increasing productivity by **18%** and reducing operational costs by **12%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
