PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Analysed account discrepancies and consumption data across interconnected enterprise systems using **SQL** (PostgreSQL, MySQL, Oracle) and **Python** scripting to validate charging accuracy, reconcile tariff configurations, and identify root causes of billing exceptions—reducing investigation time by **30%** through automated anomaly detection pipelines.
- Managed production support and SLA-driven incident response for mission-critical payment and billing systems using **Splunk**, **CloudWatch**, and **Dynatrace**, coordinating cross-functional resolution with technical teams, network operators, and business stakeholders to restore service within **99.5% uptime targets**.
- Validated system charging logic against meter-of-record data by building **Power BI** dashboards and **DAX** measures to audit consumption patterns, tariff application, and top-up transactions across customer accounts—enabling **12+ monthly revenue-protection reports** to senior management with **95%+ accuracy**.
- Engaged directly with customers via email and phone to resolve escalated account disputes, negotiate repayment plans, and facilitate technician site-visit coordination; monitored repayment performance and escalated non-performing aged debt cases to collection agencies in accordance with company procedures and regulatory compliance policies.
- Conducted detailed audit and root-cause analysis of technician site-visit reports and system configuration changes using **change-control** frameworks and **Jira**-tracked workflows; escalated complex technical and customer issues to appropriate teams and liaised with network operators (ESB Networks, GNI Meters) to determine underlying causes and implement lasting resolutions.
- Administered revenue-protection customer communications including mail merges and bulk correspondence; maintained all BAU revenue activities and customer query administration within SLA targets using CRM systems, **Excel**, and operational dashboards—ensuring **100% on-time delivery** of compliance documentation and regulatory audit trails.

SKILLS

Financial & Revenue Analysis – revenue protection, billing accuracy, consumption validation, tariff validation, discrepancy analysis, account reconciliation, repayment plan management, debt escalation, financial compliance.

Data & Analytics – SQL (PostgreSQL, MySQL, Oracle), Python, Power BI, DAX, data modelling, dashboard development, anomaly detection, statistical analysis, Excel.

Monitoring & Incident Management – Splunk, CloudWatch, Dynatrace, SLA management, P1/P2 incident response, production support, root-cause analysis.

Business Systems & Integration – CRM systems, ERP platform support, REST APIs, change-control management, cross-system data flows, enterprise integrations.

Customer Engagement & Operations – direct customer communication (email, phone), stakeholder liaison, technician coordination, escalation management, Jira, Confluence.

Infrastructure & Tools – AWS (EC2, S3, CloudWatch), Docker, Linux, Git, Jenkins, CI/CD pipelines, MS Office, compliance & regulatory procedures.

Domain Expertise – banking & financial services, payments processing, GDPR, regulatory compliance, audit trail management, SLA-driven operations.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Revenue Protection Account Analysis & Meter Reconciliation Platform (HCL Technologies)

- Designed and deployed an automated **SQL** and **Python**-based consumption-validation engine to compare **PrepayPower meter charges against ESB Networks and GNI meter-of-record data**, identifying billing discrepancies and tariff misapplications across **8,000+ customer accounts** monthly.
- Built a **Power BI** dashboard with **DAX** measures to visualise account performance, discrepancy trends, repayment plan adherence, and aged-debt KPIs for senior management—enabling data-driven escalation decisions and reducing investigation overhead by **40%**.
- Implemented root-cause analysis workflows using **change-control** procedures and **Jira**-tracked audit trails to link technician site-visit reports, system configuration changes, and customer disputes to underlying billing issues; coordinated remediation with network operators and technical teams.
- Automated customer communication workflows using **Excel** mail-merge and Python scripting to generate repayment-plan notifications, aged-debt escalation letters, and compliance audit reports—reducing manual administration time by **35%** and ensuring **100% SLA compliance**.
- Developed operational dashboards tracking **P1/P2 SLA performance**, customer query resolution times, and repayment-plan performance; integrated real-time alerts via **CloudWatch** to flag high-risk accounts approaching disconnection for immediate investigation and escalation.

SWIFT Payments Operations & Transaction Audit Dashboard (HCL Technologies)

- Built a real-time operational dashboard using **Power BI** and **SQL** to monitor SWIFT message flows, transaction reconciliation, and payment status across banking client infrastructure—providing transaction-flow visibility and regulatory audit trails for **500+ daily payment messages**.
- Implemented **Splunk** log-analysis automation and **Dynatrace** alerting to flag payment-processing anomalies, SWIFT message rejections, and reconciliation discrepancies within **5 minutes** of occurrence—enabling **99.8% SLA compliance** for production support.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
