## PROFESSIONAL EXPERIENCE

**SOFTWARE ENGINEER – HCL Technologies | Chennai, India**

**09/2021 – 01/2025 (3.5 Years)**

- Managed **shipment schedules and time-sensitive logistics decisions** across production timelines by coordinating with internal departments and external manufacturing partners; maintained **GMP compliance** and shipping industry requirements, reducing on-time delivery delays by **18%** through proactive schedule adherence tracking and cross-functional stakeholder alignment.
- Created and maintained **critical logistics databases** using **SQL** and **Excel** for material, component, and sample tracking across Contract Manufacturing Organizations (CMOs) and 3PL storage locations; built **operational dashboards** and **KPI reports** using **Power BI** and **Power Query** to forecast requirements, identify data integrity issues, and drive continuous improvement—achieving **99.2% data accuracy** across IOPS, EM, and CMO systems.
- Led **cross-functional meetings** and resolved shipment documentation errors with CMOs and external logistics partners by consulting with Trade Compliance and WHL on international shipping requirements; authored, reviewed, and verified **Standard Operating Procedures (SOPs) and Work Instructions** as **Shipment Requestor, Author, and Field Verifier**, ensuring compliance with pharmaceutical manufacturing standards and eliminating **12+ complaints** per quarter.
- Collaborated with internal departments and external manufacturing partners on ad-hoc ship requests and evolving production schedules; developed **Python automation scripts** and **scheduled reporting workflows** to forecast demand, communicate shipment timelines, and accommodate urgent operational needs—reducing manual scheduling overhead by **35%** and improving response time to **4 hours**.
- Supported **change-control management** processes for manufacturing and logistics system updates across interconnected enterprise platforms; coordinated **UAT and post-go-live operations** with internal stakeholders and external CMOs to ensure production schedule alignment, regulatory compliance, and zero-downtime transitions.
- Analyzed shipment data and operational metrics using **statistical analysis, SQL queries, and advanced Excel** to identify bottlenecks and proactively resolve issues impacting production timelines; prepared data-driven recommendations that supported logistics strategy decisions and demonstrated resourcefulness in ambiguous, evolving supply-chain environments.

## SKILLS

**Supply Chain & Logistics** – Shipment scheduling and execution, GMP compliance, Contract Manufacturing Organization (CMO) coordination, 3PL management, Trade Compliance consultation, International shipping requirements, On-time delivery optimization, Production schedule alignment.

**Data & Analytics** – SQL (PostgreSQL, MySQL, Oracle), Excel (advanced), Power BI, Power Query, Data modelling, KPI reporting, Statistical analysis, Database maintenance and integrity.

**Documentation & Compliance** – SOP authoring and verification, Work Instructions creation, GMP quality systems, Change-control management, Regulatory compliance, Pharmaceutical manufacturing standards.

**Business Systems & Integration** – ERP platform support, Enterprise system integrations, REST APIs, Cross-system data flows, Interconnected system operations, UAT coordination.

**Automation & Programming** – Python scripting, Data pipelines, ETL workflows, Scheduled reporting, Process automation, Ad-hoc data queries.

**Communication & Collaboration** – Cross-functional meeting leadership, Stakeholder management, Written and oral communication, Active listening, Independent work with minimal supervision, Flexibility in challenging environments.

**Tools & Platforms** – SharePoint, Box, eRoom, Jira, Confluence, Git, Jenkins, Linux, Docker, AWS (EC2, S3, Lambda, CloudWatch).

## EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin**

**02/2026**

**BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India**

**01/2021**

## PROJECTS

### **External Manufacturing Logistics & Shipment Optimization Platform (HCL Technologies)**

- Designed and deployed a **centralized shipment scheduling and compliance database** using **PostgreSQL, Python ETL pipelines, and Power BI dashboards** to consolidate CMO, 3PL, and internal IOPS production requirements; enabled real-time forecasting, ad-hoc request accommodation, and automated SOP version control across 8+ external manufacturing partners.
- Built **advanced Power BI dashboards** with **DAX measures** and **Power Query transformations** to track on-time delivery KPIs, material readiness, GMP compliance status, and shipment-error trends; integrated **SQL data-warehouse queries** for root-cause analysis, reducing shipment delays by **22%** and providing stakeholders with decision-ready operational intelligence.
- Developed **Python automation scripts** for shipment status notifications, schedule change alerts, and documentation error flagging; implemented **scheduled reporting** that auto-distributed KPI summaries to internal departments and external CMOs, reducing manual coordination time by **40%** and improving response time to urgent schedule conflicts to **2 hours**.
- Established **Change Control & SOP governance workflows** using **SharePoint and Confluence** to track authored and verified Work Instructions; coordinated **UAT with CMOs and Trade Compliance teams** on international shipment protocols, ensuring 100% regulatory alignment and eliminating compliance-related shipping delays.
- Architected **data integrity validation checks** across material, component, and sample tracking records using **SQL constraints and Python data-quality scripts**; achieved **99.5% accuracy** across all CMO and 3PL logistics databases, enabling reliable forecasting and eliminating data-driven shipment discrepancies.

### **Production Timeline Risk Assessment & Predictive Analytics Initiative (HCL Technologies)**

- Conducted **statistical analysis and time-series forecasting** on historical shipment and manufacturing-schedule data using **Python (pandas, NumPy, scikit-learn)** and **R** to predict production delays and identify high-risk shipment windows across CMO and internal operations.
- Built **proactive alerting logic** in **Power BI** that flagged potential schedule misalignments between IOPS, EM, and CMOs; delivered ad-hoc recommendations to cross-functional teams based on data-driven insights, enabling early intervention and reducing emergency shipment requests by **28%**.
- Documented all analytical assumptions, data models, and recommendations in **standardized SOP and Work Instruction formats**, ensuring transparency and enabling operational teams to act independently on predictive insights without continuous data-team involvement.

## ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
