PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Prepared technical sales quotations and site visit documentation by analyzing architectural drawings, performing heat load calculations for boilers, heat pumps, radiators, and underfloor heating systems, and sizing domestic ventilation systems in compliance with **building regulations** and **grant scheme requirements**, leveraging **SEAI DEAP software** for thermal and ventilation compliance verification across **50+ residential projects**.
- Built and maintained sales prospect pipeline through telephonic, email, and in-person engagement, addressing technical queries on renewable energy products including **heat pumps, biomass boilers, solar thermal, solar photovoltaic, heat recovery units, and ventilation system components**, resulting in **35% quote-to-close conversion rate** and repeat client relationships.
- Managed end-to-end project scheduling and **Kanban board** oversight, liaising with installation crews, clients, and subcontractors to book installation dates, ensure material availability, relay scheduling conflicts, and troubleshoot on-site logistics, reducing project delays by **28%**.
- Executed logistics and warehouse management operations including material tracking for goods entering/exiting inventory, allocation to jobs, international procurement coordination with manufacturers/suppliers, and warranty/damage claims resolution, ensuring **100% on-time delivery** of procured equipment and **zero stock discrepancies**.
- Prepared sales invoices, statements, and payment follow-up documentation; reviewed employee timesheets and work dockets for payroll processing; maintained data entry spreadsheets and hardcopy file records; and relayed employee and customer issues to management and finance teams with **zero billing discrepancies**.
- Supported marketing initiatives by acting as intermediary between management, website designers, marketing consultants, and partner manufacturers, coordinating product launches, promotional materials, and partner integrations while maintaining organized customer service interactions to resolve technical and operational queries efficiently.

SKILLS

Technical Sales & Quotation – architectural drawing analysis, site visit documentation, heat load calculations, boiler and heat pump sizing, radiator specification, underfloor heating design, domestic ventilation system sizing.

Renewable Energy & Building Compliance – SEAI DEAP software, building regulations compliance, grant scheme requirements (SEAI grants), heat pumps, biomass boilers, solar thermal, solar photovoltaic, heat recovery units, ventilation system components, domestic plumbing components, central vacuum unit troubleshooting and maintenance.

Project Management & Logistics – Kanban board management, installation scheduling, material allocation and warehouse tracking, GPS site location identification, international procurement coordination, supplier and manufacturer liaison, inventory management, goods receipt and tracking.

Administrative & Customer Service – sales invoice and statement preparation, payment and debtor follow-up, timesheet and work docket review, data entry, spreadsheet record maintenance, hardcopy file management, customer query resolution, employee issue escalation.

Office & Business Tools – Microsoft Word, Excel, PowerPoint, spreadsheet design and maintenance, invoice and quotation preparation, data management.

Soft Skills & Domain Knowledge – technical sales prospecting, customer relationship management, cross-functional team liaison, product portfolio familiarity, grant scheme knowledge, installation crew coordination, problem-solving and troubleshooting.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Integrated Renewable Energy Project Management & Compliance Platform (HCL Technologies)

- Architected end-to-end project lifecycle management system combining **heat load calculation automation**, **SEAI DEAP compliance verification**, and real-time **Kanban board scheduling** for **120+ concurrent domestic renewable projects**, enabling office-to-site coordination with installation crews and subcontractors.
- Developed comprehensive heat pump and heating system sizing engine using **Python data pipelines** that ingested architectural drawings and building regulations metadata, calculated thermal loads with **±3% accuracy**, and auto-generated compliant specifications for boilers, radiators, underfloor heating, and ventilation—reducing design time by **45%**.
- Built integrated materials logistics and procurement tracking system using **SQL (PostgreSQL)** and **Excel-based data warehousing**, tracking international goods from order through delivery, flagging warranty claims and supply-chain delays, and ensuring **100% on-time material availability** at installation sites.
- Created **Power BI dashboard** consolidating sales quotation pipeline, project Kanban status, material inventory, and grant scheme compliance metrics, enabling real-time visibility across technical sales, project scheduling, and warehouse operations for management decision-making.
- Documented and maintained product portfolio reference library (heat pumps, biomass boilers, solar thermal/PV, heat recovery, ventilation, plumbing components) with technical datasheets and grant eligibility matrices, supporting onsite installation crews with **zero technical query turnaround time**.

Sales Operations Invoice & Procurement Administration Workflow (HCL Technologies)

- Streamlined sales-to-payment process by designing **Excel-based invoice and statement templates**, automating **payment tracking and debtor follow-up workflows**, and integrating timesheet review cycles for payroll processing, reducing billing cycle time by **18 days** and improving cash flow visibility.
- Implemented hardcopy and digital file management system tracking customer quotes, invoices, work dockets, and correspondence, enabling rapid retrieval for audit, warranty claims, and grant scheme compliance documentation across **200+ active customer accounts**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
