PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **Azure infrastructure across compute, networking, identity, and storage** services using **Terraform** and **Bicep** Infrastructure as Code, automating environment provisioning for 15+ enterprise applications and reducing manual configuration time by **60%**.
- Built **PowerShell** and **Azure CLI** automation scripts for identity services including **Entra ID**, **MFA**, and **Conditional Access** policies, enabling self-service user provisioning across **Microsoft 365** and reducing identity-related incidents by **45%**.
- Monitored Azure infrastructure performance, availability, and security using **CloudWatch** and **Dynatrace** observability platforms; resolved complex P1/P2 incidents across production environments following **ITIL incident management** workflows with **99.5% SLA** adherence.
- Implemented **CI/CD pipelines** using **Jenkins** and Git version control integrated with **Azure DevOps** for automated infrastructure deployment and configuration management, reducing release cycles by **50%** and improving change control compliance.
- Established cloud security controls, compliance frameworks, and cost optimisation initiatives across Azure environments; conducted security audits, implemented identity governance policies, and drove continuous improvement in infrastructure cost efficiency by **35%**.
- Led **ITIL change management** processes for infrastructure updates, system migrations, and production deployments; coordinated cross-functional UAT and post-implementation support, ensuring zero critical incidents and **100% regulatory compliance** in enterprise cloud environments.

SKILLS

Cloud & Infrastructure – Azure (compute, networking, identity, storage), Infrastructure as Code, Terraform, Bicep, cloud security, cost optimisation.

Automation & Scripting – PowerShell, Azure CLI, Python scripting, shell scripting, CI/CD automation.

Identity & Security – Entra ID, MFA, Conditional Access, Microsoft 365, identity management, compliance controls, ITIL processes.

DevOps & CI/CD – Azure DevOps, Jenkins, GitHub Actions, Git, code review, change management, deployment automation.

Monitoring & Observability – CloudWatch, Dynatrace, incident management, performance monitoring, availability management, alerting.

Enterprise & Cloud Certifications – Full Stack Java Spring Boot & Angular, Web Development (Coursera), Python Programming (Coursera), IELTS Academic Band 7.

Enterprise Platforms – ERP integration support, business systems, REST APIs, Docker containerisation, Linux administration.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Multi-Region Azure Infrastructure & Identity Automation Platform (HCL Technologies)

- Architected and implemented a **Terraform-based Infrastructure as Code framework** for multi-region Azure deployments spanning compute (VMs, **App Services**), networking (**VNets, NSGs, Load Balancers**), and storage (**Blob, SQL Database**), enabling repeatable environment provisioning across dev, test, and production with **100% consistency**.
- Developed comprehensive **PowerShell automation** and **Azure CLI** scripts for **Entra ID user provisioning, MFA enforcement, Conditional Access policy management**, and **Microsoft 365** license automation, reducing identity-management overhead by **70%** and eliminating manual errors.
- Integrated **Azure DevOps CI/CD pipelines** with **Terraform** and **Bicep** templates for infrastructure deployment automation, implementing **ITIL change control** gates and approval workflows; achieved **40+ deployments per month** with zero production incidents.
- Deployed enterprise-grade **monitoring and alerting** using **Azure Monitor, CloudWatch, and Dynatrace** to track infrastructure performance, security compliance, and cost metrics; built automated incident response runbooks achieving **15-minute mean-time-to-resolution (MTTR)** for critical alerts.
- Implemented **cloud security controls** and **compliance frameworks** including role-based access control (**RBAC**), data encryption, network segmentation, and regulatory audit trails; reduced security vulnerabilities by **55%** and maintained **100% compliance** with enterprise policy standards.

Enterprise Banking Operations Dashboard & SWIFT Payments Automation (HCL Technologies)

- Engineered a real-time **SWIFT messaging monitoring dashboard** for payments operations using **Python data pipelines, SQL** data warehousing, and **Power BI** visualisation; tracked **ISO 20022 message flows, SEPA/cross-border payment transactions**, and transaction-flow visibility across **15,000+ daily payment messages** with **99.8% accuracy**.
- Built **CI/CD-driven deployment automation** for banking applications using **Jenkins pipelines** and **Git branching strategies**, coordinating **ITIL change management** workflows and UAT cycles; delivered **26 production releases** with zero post-deployment incidents and full regulatory audit compliance for **GDPR** and financial services standards.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
