PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **AWS cloud infrastructure** using **Terraform Infrastructure as Code** across **EC2, S3, Lambda, RDS, and IAM** for enterprise Java/.NET applications, achieving **40% reduction in manual provisioning time** and enabling repeatable, version-controlled infrastructure deployments for cross-functional software engineering teams.
- Built and optimized **CI/CD pipelines** using **Jenkins** and **Git** with **Python and Bash scripting** for automated testing, deployment, and monitoring workflows; integrated **CloudWatch and Dynatrace** for real-time system performance visibility, reducing P1/P2 incident response time by **35%** and improving deployment frequency to daily releases.
- Managed containerized applications at scale using **Docker** and **Kubernetes orchestration**, implementing cluster autoscaling, resource management, and rolling deployments for high-availability production systems; collaborated with software engineering and QA teams on reliable, secure, and scalable solution architecture.
- Automated operational processes and data pipeline workflows using **Python scripting, Bash, and SQL** (PostgreSQL, MySQL, Oracle) for infrastructure provisioning, log analysis, system troubleshooting, and scheduled reporting; reduced manual operational overhead by **50%** through cron-based automation and monitoring integrations.
- Participated in incident response and on-call rotations for enterprise production environments, troubleshooting infrastructure, deployment, and performance issues across interconnected AWS services; contributed to post-incident reviews and architectural improvements that enhanced system reliability and disaster recovery capabilities.
- Implemented cloud security best practices including **IAM role-based access control, VPC security groups, and encrypted data flows** across AWS infrastructure; enforced compliance with regulatory requirements in production banking environments, ensuring audit trails and data protection standards were maintained throughout infrastructure lifecycle.

SKILLS

Cloud & Infrastructure – AWS (EKS, EC2, S3, RDS, Lambda, CloudWatch, IAM), Kubernetes, Terraform, Docker, Infrastructure as Code.

DevOps & CI/CD – Jenkins, GitHub Actions, Git, CI/CD pipelines, automated testing, deployment automation, blue-green deployments.

Scripting & Automation – Python, Bash, shell scripting, cron jobs, operational automation, data pipeline orchestration.

Database & Data – PostgreSQL, MySQL, Oracle, SQL, data warehousing, ETL, Airflow concepts.

Monitoring & Observability – CloudWatch, Dynatrace, Splunk, system performance monitoring, logging, troubleshooting, alerting.

Development & Integration – Java Spring Boot, REST APIs, Linux, Git version control, change-control management.

Enterprise & Compliance – Production support, incident management, cloud security best practices, regulatory compliance, GDPR, SLA management, on-call rotations.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Multi-Region Kubernetes GitOps Platform with Blue-Green Deployment Automation (HCL Technologies)

- Architected and deployed a **Kubernetes-native infrastructure platform** across multiple AWS regions using **Terraform Infrastructure as Code**, managing **EKS clusters, RDS databases, S3 storage, and IAM policies** with full version control and state management; automated cluster provisioning reduced infrastructure setup time from **2 weeks to 3 days**.
- Designed and implemented **blue-green deployment automation** using **GitHub Actions CI/CD pipelines** integrated with **Kubernetes rolling updates**, enabling zero-downtime releases for 15+ microservices; deployment frequency increased to **daily releases** with **99.95% availability** during production transitions.
- Automated operational workflows using **Python and Bash scripting** for infrastructure provisioning, cluster health checks, and performance monitoring; integrated **CloudWatch and Dynatrace observability** across all Kubernetes nodes, reducing incident detection time by **60%** and enabling predictive alerting.
- Implemented comprehensive **cloud security best practices** including **IAM role-based access control, network policies, and encrypted data flows** across Kubernetes clusters; enforced compliance with regulatory requirements for production banking workloads, ensuring audit-ready infrastructure.
- Collaborated with software engineering and QA teams to optimize application deployment patterns, container resource allocation, and cluster autoscaling policies; reduced infrastructure costs by **30%** through right-sizing and on-demand resource management across multi-region deployments.

SWIFT Payments Operations Dashboard & ETL Pipeline Infrastructure (HCL Technologies)

- Engineered **Python-based ETL pipelines** and **Bash automation scripts** to process SWIFT messaging data (MT/MX formats) and ISO 20022 payment flows from production banking systems; ingested **500K+ daily payment messages** into PostgreSQL data warehouse with **99.98% accuracy**.
- Designed and deployed **AWS Lambda functions and EC2 instances** for real-time payment transaction monitoring and alerting; integrated **CloudWatch logs and Dynatrace APM** to track SEPA and cross-border payment processing, reducing transaction-flow visibility latency by **45%**.
- Built operational dashboards using SQL queries against PostgreSQL and Oracle databases to surface payment reconciliation metrics, SLA compliance, and regulatory audit trails; enabled post-go-live support and UAT coordination across banking-domain business analysts and operations teams.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
