PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and developed **REST APIs and full-stack web applications using .NET (C#) and React**, delivering responsive, user-friendly interfaces with a strong focus on usability and maintainability across enterprise-scale systems supporting 50+ concurrent users in production.
- Built and maintained **microservices architecture using .NET Core and Spring Boot**, collaborating with cross-functional teams including product managers and designers to contribute to architecture decisions and technical improvements that reduced API latency by 35%.
- Wrote clean, maintainable, and well-tested code across **C# backend services and React frontend components**, participating in code reviews and agile ceremonies (daily standups, sprint planning, retrospectives) in Scrum teams of 6–8 engineers.
- Deployed and managed applications on **Microsoft Azure cloud services** using DevOps and CI/CD pipelines, implementing infrastructure-as-code patterns and blue-green deployments to achieve **99.8% uptime** and **15-minute deployment cycles**.
- Engineered **REST API integrations and microservices communication patterns** across interconnected systems using **SQL (PostgreSQL, MySQL, Oracle)** for data consistency, applied solid SOLID principles, and resolved **P1/P2 production incidents** with < **30-minute** mean-time-to-resolution.
- Demonstrated strong problem-solving skills and attention to detail by leveraging **Git version control, code review workflows, and modern web development practices** to reduce technical debt by **40%** and improve test coverage to **82%** across the platform.

SKILLS

Backend & Cloud – .NET, C#, ASP.NET Core, REST APIs, Microsoft Azure (compute, storage, deployment), CI/CD pipelines, DevOps.

Frontend – React, responsive design, UI/UX design principles, component-driven development, state management.

Data & Integration – SQL (PostgreSQL, MySQL, Oracle), data modelling, microservices architecture, API integrations.

DevOps & Infrastructure – Git, version control systems, CI/CD (Jenkins, Azure Pipelines), cloud-native development, infrastructure-as-code.

Agile & Collaboration – Agile, Scrum, code reviews, cross-functional collaboration, Jira, Confluence.

Additional Technologies – Python, Java, Spring Boot, Docker, Linux, AWS (EC2, S3, Lambda), monitoring (Splunk, Dynatrace, CloudWatch).

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Digital Banking Portal – .NET + React Full-Stack Rebuild (HCL Technologies)

- Led the design and development of a **scalable, responsive digital banking portal using .NET (C#) backend services and React frontend**, serving 10,000+ monthly active users with a focus on UI/UX design principles and accessibility compliance.
- Architected **microservices using .NET Core and ASP.NET Web API** deployed on **Microsoft Azure App Service and Azure SQL Database**, implementing CI/CD pipelines via **Azure DevOps** to enable automated testing and blue-green deployments, reducing deployment risk by **60%**.
- Designed and built **RESTful APIs for account management, transaction history, and payment operations**, integrating with legacy enterprise banking systems via **SQL-backed data models** and achieving **< 200ms p95** latency across all endpoints.
- Developed **React component library and responsive UI components** with strong focus on usability, implementing form validation, error handling, and state management to reduce customer support tickets by **25%**.
- Implemented comprehensive testing and code review workflows using **Git version control**, achieving **85% code coverage** and reducing production bugs by **45%** through collaborative peer review and automated CI/CD gates.

SWIFT Payments Operations Dashboard – Real-Time Monitoring & Analytics (HCL Technologies)

- Delivered a **real-time payments operations dashboard** built on **REST APIs, SQL (PostgreSQL, Oracle), and interactive visualizations** to monitor **ISO 20022 and SWIFT MT/MX message flows**, enabling operational teams to track cross-border and SEPA payment transactions with **99.5% uptime SLA**.
- Engineered **data pipeline automation using Python ETL scripts** to ingest and reconcile payment message streams, built **Splunk and Dynatrace monitoring dashboards** for real-time alerting, and implemented GDPR-compliant audit logging and data retention policies.
- Collaborated with banking-domain business analysts and regulatory teams to gather requirements, design UAT test cases, and support post-go-live production operations, ensuring compliance with financial-services change-control procedures and incident-response SLAs.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
