## PROFESSIONAL EXPERIENCE

**SOFTWARE ENGINEER – HCL Technologies | Chennai, India**

**09/2021 – 01/2025 (3.5 Years)**

- Delivered **Level Two technical support** to 15+ enterprise clients across banking and ERP domains, diagnosing and resolving hardware, software, and network issues with **95% first-contact resolution rate**; escalated complex problems to senior staff while maintaining ownership of client communication and incident tracking in **Jira** helpdesk systems.
- Owned technical health of assigned client networks through **proactive system monitoring** using **Splunk, CloudWatch, and Dynatrace**; conducted regular system checks, security updates, and disaster recovery testing to ensure **99.5% uptime SLA** across production environments; responded to automated alerts with **sub-30-minute resolution** for P1/P2 incidents.
- Configured and deployed end-user devices including laptops, desktops, and printers; performed **software installation, patching, and updates** across client networks; liaised with managed print vendors to configure print devices with IP management and troubleshoot connectivity issues, reducing print-related downtime by **40%**.
- Documented IT environments, client configurations, and technical solutions in **Confluence knowledge base**; created and maintained client-specific IT environment documentation; developed internal workflows and training guides for onboarding new team members, improving team efficiency by **25%**.
- Assisted with **onboarding projects, system deployments, and data migrations** for client environments; coordinated change-control management for configuration updates, UAT coordination, and post-go-live support across interconnected systems; worked collaboratively with peers, BAs, and senior staff to deliver project milestones on schedule.
- Built and maintained strong client relationships through regular account reviews, meetings to gather requirements and feedback, and periodic IT performance reporting; identified opportunities to improve client systems and processes; ensured adherence to IT policies, procedures, and standards while guiding clients on security best practices and regulatory compliance.

## SKILLS

**Technical Support & Helpdesk** – Level Two support, incident management, troubleshooting, helpdesk ticketing systems, Jira, change-control management, SLA management, escalation protocols.

**Hardware & Software Administration** – device configuration and deployment, software installation and patching, print device setup and IP management, system updates, disaster recovery testing.

**System Monitoring & Reliability** – Splunk, CloudWatch, Dynatrace, proactive alerting, uptime management, performance optimization, automated response workflows.

**Documentation & Knowledge Management** – Confluence, IT environment documentation, knowledge base development, process documentation, training material creation, client configuration records.

**Cloud & Infrastructure** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, networking, system stability and performance management.

**Client Engagement & Project Delivery** – account reviews, requirements gathering, stakeholder communication, UAT support, onboarding projects, system deployments, data migrations, cross-functional collaboration.

**Domain Knowledge** – banking and financial services, ERP systems, enterprise business systems integration, GDPR and regulatory compliance, payments operations, ISO 20022, SEPA, PSD2, Open Banking.

## EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of  
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College  
of Technology, Coimbatore, India

01/2021

## PROJECTS

### Multi-Client IT Infrastructure Monitoring & Support Platform (HCL Technologies)

- Architected and deployed a **unified client monitoring dashboard** aggregating system alerts from **15+ managed client networks** across banking, ERP, and enterprise domains using **Splunk and CloudWatch**; automated escalation workflows reduced mean-time-to-resolution (MTTR) by **35%** and eliminated **90% of duplicate support tickets**.
- Established standardized **IT environment documentation framework** in **Confluence** covering hardware configurations, software inventory, network topology, and disaster recovery procedures for each client; created reusable templates for onboarding new accounts, reducing documentation setup time by **60%**.
- Developed and executed **quarterly disaster recovery testing protocol** across all managed client environments; coordinated UAT, change-control approvals, and post-implementation validation; achieved **100% recovery readiness certification** and identified critical gaps in 3 client backup strategies before failure.
- Implemented **automated software patching and update cycles** across client workstations and servers using **Jenkins CI/CD pipelines and Git**; coordinated client notifications, maintenance windows, and rollback procedures; maintained **99.5% uptime SLA** with zero production incidents from patch deployment.
- Trained 8 junior support engineers on **incident response protocols, ticketing best practices, and client communication standards**; created step-by-step troubleshooting guides and contributed to internal process documentation; reduced average resolution time for new team members from 3 days to **1.5 days per ticket**.

### SWIFT Payments Operations Dashboard & Incident Response System (HCL Technologies)

- Provided **Level Two production support** for a banking client's **SWIFT messaging dashboard** processing 10,000+ daily payment transactions; monitored transaction flows, SLA compliance, and operational alerts; responded to P1/P2 incidents with **sub-15-minute resolution** for payment disruptions.
- Troubleshooted and resolved complex issues across **SWIFT MT/MX message formats, ISO 20022 message structures, SEPA/instant payments, and cross-border payment flows**; coordinated with banking BAs and operations teams for root-cause analysis and regulatory compliance validation.
- Documented IT environment configurations, system integrations, and reconciliation workflows; maintained audit trails and change-control records to ensure **GDPR compliance and regulatory standards**; prepared incident reports and performance metrics for banking client stakeholders and internal leadership.

## ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
