PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Facilitated **cross-functional discovery workshops** and stakeholder engagement sessions with banking operations teams, business owners and technical architects to shape well-defined business problems, translate requirements into clear user stories and acceptance criteria, and align solution options with architecture and organisational strategy—reducing requirements ambiguity by **40%** and accelerating sprint velocity.
- Produced high-quality analysis artefacts including **process maps, data flows, wireframes and mockups** for SWIFT messaging and payments-operations workflows; collaborated with **Agile/DevOps delivery teams** to ensure feasibility, clarity and alignment throughout the development lifecycle, supporting UAT planning, scenario creation and defect triage across interconnected systems.
- Analysed quantitative and qualitative data from **Splunk, CloudWatch and Dynatrace monitoring dashboards** to validate business needs, identify operational trends and strengthen decision-making for SLA management and incident response; developed **Power BI operational reporting dashboards** that consolidated payment transaction flows and dependency analysis, enabling business owners to maintain prioritised backlogs with **30% faster** root-cause identification.
- Supported business cases and benefits identification for digital transformation initiatives by conducting **evidence-based impact analysis** on enterprise systems integrations, change-control procedures and post-implementation validation; collaborated with PMO teams to document dependencies and track continuous improvement outcomes across banking and ERP domains.
- Enabled successful change adoption and digital maturity by creating **training materials, user guidance and change readiness documentation** (via Confluence) for business system stakeholders; conducted post-go-live support and UAT coordination across interconnected **PostgreSQL, Oracle and MySQL** environments, reducing training overhead by **25%** and improving user adoption rates.
- Built strong, trusted relationships with banking-domain stakeholders, BAs and operations teams through proactive engagement and clear communication of technical constraints; applied knowledge of **SWIFT messaging (MT/MX), ISO 20022, SEPA, PSD2 and regulatory compliance (GDPR)** to shape solution architecture, validate regulatory alignment and strengthen predictable, value-driven delivery outcomes in high-assurance financial environments.

SKILLS

Business Analysis & Requirements – user story creation, acceptance criteria definition, requirements gathering, discovery workshops, stakeholder engagement, process mapping, data flow analysis, wireframing, mockups, business case development, benefits identification, dependency analysis.

Agile & Delivery Practices – Agile/Scrum ceremonies, Hybrid/DevOps collaboration, backlog prioritisation, UAT planning and execution, defect triage, change-control management, post-implementation validation, continuous improvement, digital maturity enablement.

Data Analysis & Business Intelligence – Power BI (dashboards, DAX, data modelling, Power Query ETL), Tableau, quantitative analysis, qualitative data synthesis, trend identification, statistical methods, data warehousing, operational reporting.

Financial Services & Payments Domain – SWIFT messaging (MT/MX formats), ISO 20022 message flows, SEPA, instant payments, cross-border payments, PSD2, Open Banking, payments-operations workflows,

transaction-flow visibility, reconciliation, tokenization, regulatory compliance (GDPR), audit trails.

Enterprise Systems & Integration – ERP support, business system integrations, REST APIs, cross-system data flows, PostgreSQL, Oracle, MySQL, schema changes, enterprise business operations, production support monitoring.

Technical & Development Tools – Java Spring Boot, Python, SQL, AWS (EC2, S3, Lambda, CloudWatch), Docker, Git, Jenkins CI/CD, Jira, Confluence, Linux, Splunk, Dynatrace.

Soft Skills & Communication – stakeholder relationship building, cross-functional collaboration, clear communication, problem-solving, critical thinking, change adoption support, training delivery, user guidance documentation.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Digital Operational Excellence Platform – Banking Payments & ERP Integration (HCL Technologies)

- Led end-to-end business analysis for a **multi-phase digital transformation programme** consolidating SWIFT messaging, payments-operations dashboards and enterprise ERP systems across a tier-1 banking client; facilitated discovery workshops with business owners, operations teams and architects to shape a unified operational backbone serving **15+ business units** and **250+ daily banking transactions**.
- Designed and documented **process maps, system integration data flows and UAT scenario matrices** for ISO 20022 message-format migration, SEPA instant-payment enablement and cross-border reconciliation workflows; ensured solution architecture aligned with **GDPR, PSD2, regulatory audit trail and change-control requirements**, reducing compliance documentation time by **35%**.
- Developed **Power BI operational dashboards** using **DAX and Power Query ETL** that consolidated Splunk/Dynatrace monitoring data, transaction-flow metrics and SLA KPIs; automated daily reporting for business owners, reducing manual reporting overhead by **20 hours per week** and enabling real-time visibility into **P1/P2 incident impact**.
- Collaborated with **Agile delivery teams, database architects and QA** throughout the lifecycle to translate business requirements into feasible technical deliverables; supported comprehensive UAT planning, defect triage and post-go-live validation, ensuring **zero post-implementation critical defects** and **99.5% transaction accuracy**.
- Created and delivered **change adoption materials, user training guides and Confluence documentation** for **300+ banking operations staff** on new payment workflows, dashboard navigation and regulatory procedures; measured post-training user confidence scores and reduced support tickets by **28%** within 60 days of go-live.

Enterprise Business Systems UAT & Change-Control Automation Framework (HCL Technologies)

- Designed a **UAT governance and change-management framework** for interconnected ERP, banking and operational systems; documented system dependencies, impact-analysis matrices and rollback procedures to support business continuity and regulatory compliance across high-assurance financial environments.
- Conducted stakeholder interviews and built **requirements traceability matrices** linking business objectives to system configuration changes; ensured **change-control processes, documentation standards and approval workflows** aligned with banking-domain governance, reducing change-related incidents by **40%**.
- Synthesised quantitative testing metrics (pass/fail rates, defect severity distribution, regression test coverage) and qualitative feedback from UAT participants to validate solution readiness; generated executive-level

post-implementation validation reports with evidence-based go/no-go recommendations and continuous-improvement roadmaps.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
