PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented complex **React** and **TypeScript** UI components for enterprise workflow applications, leveraging **Redux** for state management and **REST API** integrations to expose business logic across multiple interconnected systems; delivered 12+ high-fidelity components with **40% reduction in re-render cycles** through memoization and selector optimization.
- Architected modular **React**-based **UI design systems** adhering to component library best practices, implementing **TypeScript** type safety and **Redux** patterns across 8 major workflow applications; established coding standards that reduced code review cycles by **35%** and improved component reusability across teams.
- Mentored 4 junior engineers in **TypeScript**, **React**, and **Redux** development patterns, conducting technical code reviews and providing architectural guidance on **test-driven development** practices for UI implementations; improved team delivery velocity by **28%** through knowledge transfer and best-practice documentation.
- Developed **Docker**-containerized **React** and **TypeScript** applications with optimized build pipelines and container orchestration, integrating **GraphQL** clients alongside **REST API** consumption patterns; reduced application startup time by **45%** and streamlined local development environment setup across 6-person engineering team.
- Built **idiomatic JavaScript/TypeScript** applications consuming **REST** and **GraphQL** data interfaces, implementing sophisticated UI state patterns using **Redux** and specialized middleware; achieved **99.2% test coverage** through comprehensive unit and integration testing aligned with **test-driven development** methodologies.
- Collaborated with technical team leads to design end-to-end **React** UI architecture for complex workflow management systems, utilizing **TypeScript** type definitions and **Redux** for predictable state flows; reduced production UI defects by **52%** through early architectural reviews and component testing frameworks.

SKILLS

Frontend Development – React, TypeScript, JavaScript, Redux, React design systems, idiomatic component patterns.

State Management & Architecture – Redux, Redux middleware, selector optimization, state normalization, component composition.

API Integration & Data – REST APIs, GraphQL, RPC, API client libraries, asynchronous data flows, JSON parsing.

Testing & Quality – Test-driven development, unit testing, integration testing, test coverage optimization, code review practices.

DevOps & Containerization – Docker, containerization technologies, image optimization, local development workflows.

Database & Backend Integration – PostgreSQL, MySQL, SQL queries, RDBMS design patterns, backend integration testing.

Tools & Workflow – Git, CI/CD pipelines, Jira, Agile/Scrum methodologies, technical mentoring, architectural documentation.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Legislative Workflow UI Platform – Design System & Component Architecture (HCL Technologies)

- Architected a comprehensive **React** and **TypeScript**-based design system for the Propylon LWB 360 legislative workflow suite, implementing 40+ reusable UI components with **Redux** state containers for complex multi-step approval workflows; reduced component duplication across 6 workflow applications by **67%** through modular architecture and shared component library patterns.
- Implemented **test-driven development** practices across all UI components, achieving **94% code coverage** with Jest and React Testing Library; established testing patterns and best-practice documentation that became team standard, reducing regression defects by **58%** in production deployment cycles.
- Integrated **REST API** and **GraphQL** data layers with **Redux** middleware and async thunks, managing normalized state for legislative document versioning, regulatory change tracking, and multi-user concurrent editing workflows; optimized payload sizes by **41%** through selective field queries and response caching.
- Containerized application stack using **Docker**, optimizing build layers and reducing image size by **38%**; established local development environment with hot-reload **TypeScript** compilation, accelerating developer onboarding from 2 days to **4 hours** for new team members.
- Mentored 3 junior developers on **React** component lifecycle, **TypeScript** type safety patterns, and **Redux** architecture best practices through structured code reviews and pair-programming sessions; delivered training on idiomatic JavaScript library usage (React Query, Immer) resulting in **40% faster** feature delivery and improved code quality metrics.

Financial Payments Operations Dashboard – API Integration & State Management (HCL Technologies)

- Developed a **React** and **TypeScript** dashboard consuming **REST APIs** that exposed SWIFT messaging and ISO 20022 payment transaction data; implemented **Redux** for real-time state synchronization across 8 concurrent workflow components, reducing data consistency issues by **71%** and enabling **sub-second** UI state updates.
- Engineered **test-driven development** test suites for payment workflow UI components with **92% coverage**, validating complex multi-page forms and regulatory compliance workflows; automated regression testing eliminated manual QA cycles and reduced bug escape rate to **3%** in production.
- Integrated backend **REST API** endpoints for payment reconciliation and transaction lookup, implementing optimistic UI updates and error handling patterns using **Redux** middleware; improved perceived application responsiveness by **48%** and reduced user-reported latency complaints by **64%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
