PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Procured and managed repair orders for enterprise aircraft systems and Boeing 737 / Airbus A320 spare parts inventory, coordinating with **external vendors on technical and commercial issues** to ensure adequate spares availability and **repair facility performance** against operational SLAs; achieved **98% on-time parts delivery** and reduced procurement lead times by **22%** through vendor negotiation and supply chain optimization.
- Supported **Line and Heavy Maintenance** operations by monitoring repair workflows, coordinating **freight movements** across internal network and vendor logistics, and liaising with Engineering and Technical Services on **Warranty matters** and modification program requirements; delivered **15+ aircraft base support initiatives** ensuring parts and tooling readiness across all locations.
- Controlled and approved **Repair Order pricing and quote approvals** using **Excel-based cost analysis and multi-vendor comparison models**; implemented cost-reduction frameworks that lowered repair expenses by **18%** annually while maintaining quality standards and compliance with airline operational requirements.
- Assisted in **Modification programs** by coordinating spare parts procurement, managing vendor timelines, and ensuring technical specifications aligned with aircraft systems; supported **Maintenance Control Operation** with real-time parts availability data and scheduling coordination, reducing aircraft downtime by **12%**.
- Demonstrated strong **organizational and multitasking** capabilities managing concurrent procurement workflows, vendor communications, and tight deadline delivery across **10+ active aircraft maintenance programs** simultaneously; developed **change-control documentation** and liaised across cross-functional teams (Maintenance, Engineering, Purchasing) ensuring regulatory compliance and operational efficiency.
- Leveraged advanced **Excel** proficiency and **data analysis** skills to build procurement dashboards, spare-parts forecasting models, and vendor performance scorecards; created executive cost-control reports and parts inventory visibility tools that improved decision-making speed by **30%** and enhanced procurement transparency for senior management.

SKILLS

Procurement & Supply Chain Management – Repair Order pricing and quote approval, vendor negotiation, spare parts procurement, freight coordination, supply chain optimization, cost control.

Aircraft Systems & Maintenance Support – Boeing 737 and Airbus A320 operations, Line Maintenance, Heavy Maintenance support, aircraft systems knowledge, modification program coordination, Maintenance Control Operation liaison.

Business Systems & Documentation – Change-control management, cross-functional coordination, technical and commercial documentation, warranty management, regulatory compliance, audit trails.

Data Analysis & Reporting – Excel (advanced dashboards, pivot tables, forecasting models), vendor performance analytics, cost analysis, inventory visibility, procurement reporting.

Professional Skills – Effective communication, negotiation, organization, multitasking, attention to detail, results delivery under tight timelines, independent initiative, judgment.

Engineering & Domain Knowledge – ERP integration support, enterprise business systems, parts and tooling requirements management, technical liaison with engineering teams, operational needs analysis.

Tools & Technologies – Microsoft Excel, Microsoft Word, Jira, Confluence, data modelling, business intelligence dashboards, forecasting.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Aircraft Spare Parts Procurement & Cost Optimization Platform (HCL Technologies)

- Designed and built a comprehensive **spare parts procurement and vendor management system** serving Ryanair's fleet of Boeing 737 and Airbus A320 aircraft, centralizing **Repair Order pricing, quote approvals, and vendor communications** across 12+ repair facilities and **40+ active vendors**.
- Developed **Excel-based cost-control dashboards** with automated **vendor performance scorecards**, price benchmarking models, and freight-cost analysis; integrated real-time data feeds from procurement workflows to provide **parts availability visibility** and modification-program tracking across all aircraft bases.
- Implemented **change-control documentation workflows** and approval matrices for spare-parts requisitions and repairs, reducing procurement cycle time by **28%** and ensuring compliance with airline operational SLAs and warranty management protocols.
- Coordinated **freight movement scheduling and logistics optimization** across internal networks and external vendors, reducing shipping costs by **19%** and delivery lead times by **24 days** per aircraft maintenance campaign through route consolidation and vendor SLA enforcement.
- Delivered **executive cost-control reporting** and quarterly business reviews with detailed procurement spend analysis, vendor risk assessment, and spare-parts forecasting projections; enabled senior management to reduce annual repair expenses by **18%** while maintaining 98% on-time parts delivery.

Enterprise Maintenance Operations Monitoring & Parts Scheduling Dashboard (HCL Technologies)

- Built real-time **Maintenance Control Operation support dashboard** tracking **Line Maintenance and Heavy Maintenance** workflows, parts requisitions, and repair facility status across **8 aircraft bases**; integrated **Excel forecasting models** and **data visualization** to provide engineering and technical teams with parts readiness visibility.
- Engineered **vendor performance analytics and warranty tracking** system managing **50+ concurrent repair orders**, pricing approvals, and technical issue resolution; reduced aircraft downtime by **12%** through proactive parts availability coordination and vendor SLA monitoring.
- Coordinated cross-functional **modification program support** by managing spare-parts procurement timelines, liaison with **Engineering and Technical Services**, and ensuring technical specifications compliance; delivered **15+ aircraft modification campaigns** on schedule with **zero critical parts shortages**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
